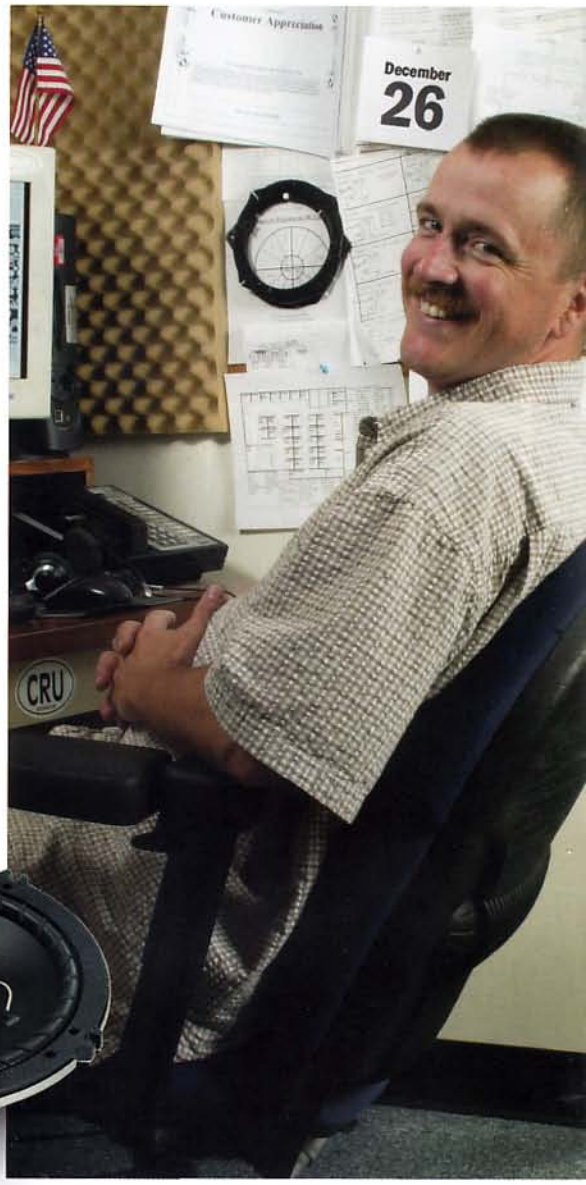
Helping you get the most from your gear

Bill Crutchfield, Founder and CEO

The best part of giving or receiving electronics happens just after you've set it all up: when you turn it on and it comes to life. At Crutchfield, we love helping you make that magic moment happen; that's why we offer free tech support on every item you buy from us. Not only can our Tech Support Advisors help you connect everything correctly right out of the box, they're available 16 hours a day, 7 days a week, for the life of your gear.

Our customers love our hands-on approach to customer service; read what they have to say on page 74. I welcome your comments, too. You can e-mail me at bill.listens@crutchfield.com.

Bill Crutchfield



Add great Bose® sound to any room
The compact Bose Wave® music system lets you enjoy your favorite CDs and radio stations in warm, natural sound. See page 100.

Save on smooth Kicker sound
Kicker DS car speakers make your music sound great, with accurate highs and deep lows. See page 53.

On the cover:
Clarion MAX675VD, pg. 39
SIRIUS Starmate 4 plug-and-play satellite radio, pg. 9
TomTom ONE portable GPS navigation system, pg. 43

Take your favorite TV shows and MP3s on the go
The big, bright screen of this Toshiba gigabeat® is great for watching pre-recorded TV shows, and its built-in speaker offers headphone-free listening. See page 99.

Deane, Conrad, Josh, Shawn, and **Phil** are some of the members of our Tech Support Team. They help you set up everything you get from us in the best way possible, so you can enjoy it all to the fullest.

Need help with your gifts? We're closed on December 25th, but we'll be ready for your calls on the 26th.

The most impressive SIRIUS radio yet
With the stylish Stiletto, you get portable reception of live SIRIUS broadcasts, storage of up to 100 hours of SIRIUS content, and MP3 playback. See pg. 7.

Compact, powerful navigation
The Garmin nüvi 660 gives you excellent GPS guidance and includes a handy digital Fodor's Travel Guide that gives you tips on restaurants, hotels, and more as you travel. See page 43.

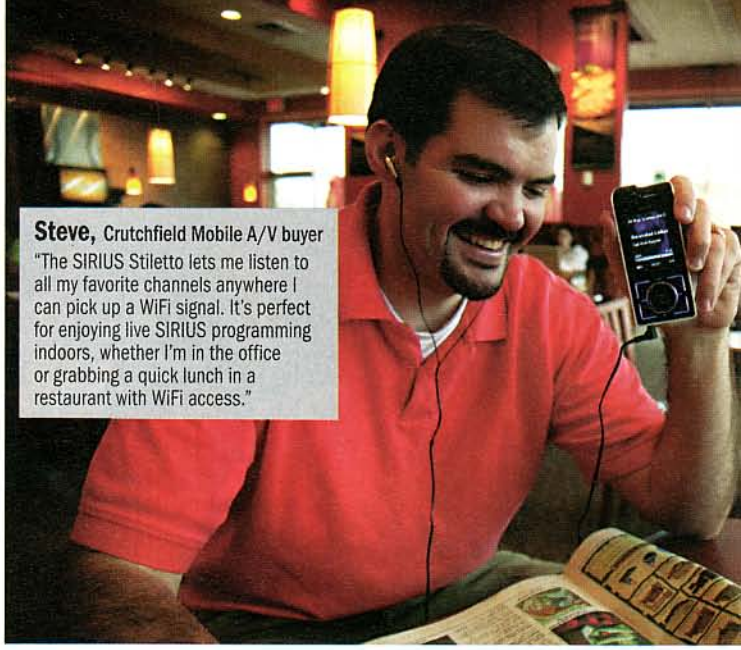
Satellite Radio

SHOPPING GUIDE

Expand your entertainment options

Instead of a few stations playing the same old songs, satellite radio gives you an enormous array of music, talk, and entertainment channels. Choose either service provider — SIRIUS or XM — and for $12.95 per month, you'll get:

- *Musical variety for every taste — over 65 channels*
- *News, sports, talk, and more such as CNN, Fox News, ESPN*
- *A clean digital signal, no static, and coast-to-coast coverage*
- *Live traffic and weather info for many metropolitan areas*
- *Access to all music channels online*



Steve, Crutchfield Mobile A/V buyer
"The SIRIUS Stiletto lets me listen to all my favorite channels anywhere I can pick up a WiFi signal. It's perfect for enjoying live SIRIUS programming indoors, whether I'm in the office or grabbing a quick lunch in a restaurant with WiFi access."

XM or SIRIUS: Which service should I pick? We think you'll love either one. They're similar services, but each has exclusive programming — examples below. You'll also find links to complete channel lists at crutchfield.com/programming.

XM SATELLITE RADIO

- Opie & Anthony; Bob Dylan; Snoop Dogg
- ACC, Big Ten, Pac-10, and Big East sports
- US Open Tennis & Spanish-language sports
- live NASCAR®, PGA TOUR®, NHL games, IndyCar™ Series, and Major League Baseball® — every team wherever you are

SIRIUS SATELLITE RADIO THE BEST RADIO ON RADIO

- Howard Stern; Jimmy Buffett; Martha Stewart; Blue Collar Comedy
- live NFL, NBA, and NHL® play-by-play
- college sports — over 150 colleges in 20 conferences
- English Premier League soccer and Wimbledon coverage

What kind of radio should I get?

The kind of satellite radio you get depends on how you're going to use it. Each radio you have requires its own subscription, with discounts for multiple-radio accounts. There are four main kinds:

Car-only radios provide the best in-car sound quality. They're great if you have, or plan to get, a compatible in-dash stereo.

Home-only radios provide the best sound quality at home, and blend in nicely with your home stereo components.

Portable radios/MP3 players give you satellite radio reception, plus program storage and playback. They let you store and play digital music files, too.

Plug-and-play radios are particularly well-suited for the car, and also work with your home stereo, with the help of a compatible kit.

If you want help choosing the satellite radio that suits your lifestyle best, just call one of our expert Sales Advisors at 1-800-555-9430. They're available 16 hours a day, 7 days a week.

I'm going to listen only in the car

Car-only satellite radios, like this one for Alpine stereos, offer you the best sound in the car.

If you have a satellite radio-ready car stereo, it controls all the functions of a compatible car-only satellite radio, plus shows you channel and song info on its display. You hide the radio behind your dash or under a seat, then use your stereo to surf channels, save presets, and more. You just need to pick up a satellite radio package that works with your brand of stereo. See pages 8 and 13 for a list of the car-only radios we carry. For other car-only options, visit us at crutchfield.com.

SAT RADIO READY **Add SIRIUS or XM, see pg. 16**

Look for this symbol when you're shopping for in-dash stereos on pgs. 20-41. It tells you that you can control a compatible car-only satellite radio with that stereo.

I'm going to listen only at home

Components like Polk's XRt12 blend in nicely with your home stereo system. Check it out on page 10 and at crutchfield.com/xrt12.

If you'll listen to satellite radio only at home, or if you'd like the best sound option for your home A/V setup, consider going with a dedicated home component. Components produce fuller sound, and they fit in with the rest of the components in your A/V rack.

Check out pages 6 and 10 for the home tuners in this catalog, and visit crutchfield.com/homesatelliteradio to see our full lineup.

There are also stand-alone table radios that offer easy, all-in-one satellite radio reception. They look great and are easy to use. See page 8 or visit crutchfield.com/tivoli for more.

I'd like to listen everywhere. Should I get a portable or plug-and-play?

Portables and plug-and-play radios offer the versatility of taking satellite radio with you just about anywhere. Here are some things to think about when you're deciding whether to get a portable or plug-and-play.

Always on the go? A portable will work best for you. Some have built-in antennas that receive live satellite broadcasts on the go, while others need to be docked in their included cradles to get a live signal.

Want more than satellite radio? Go with a portable radio from XM or SIRIUS. You'll be able to upload MP3s/WMAs files, plus save songs and programming from satellite radio. Mix the two together to get the best playlists.

Spend a lot of time in your car? Choose a plug-and-play or portable with features you'll find handy while driving — like lots of presets, so you can easily find your favorite channels — and with illumination that will suit your dash.

Will you listen more at home? Choose a radio that complements the style of your stereo, and with a large display you can read from across the room.

The SIRIUS Stiletto 100 (right, page 7) has a built-in antenna, so you can listen to SIRIUS programming anywhere. The Roady XT (below, page 12) gives you XM playback in multiple locations thanks to its car and home docking stations.

*Price after mail-in rebate, through 11/22/06; †Price after mail-in rebate, through 12/31/06; ††Receive free activation and a free month of service, if activated by 12/31/06 with 3-month commitment.

What's in the chart:

Display lines: The number of lines of text information the radio can display. The more it displays, the more information you'll get about what's playing.

Channel presets: The number of channels you can store and be able to jump to immediately with the press of a button.

Song memory: The number of song/artist names a radio will store. It alerts you any time a stored song/artist is playing on another satellite radio channel.

Info ticker: As you listen, updated stock prices and, on some models, sports scores can scroll across the display. Many are customizable.

MP3/WMA playback: The ability of a satellite radio to store and play MP3 and WMA files you've uploaded via your computer.

Car kit and home kit: Most plug-and-play and portable radios come with a car or home kit; extra kits let you can your radio in multiple locations. Kits include a dock (also called a cradle), antenna, and power adapter.

Boombox: Many radios also work with optional boomboxes, which accept batteries for portable use. Boomboxes feature a dock in which your radio mounts, built-in speakers, and an antenna.

Storage hours: The maximum amount of programming a radio can store. For radios that play MP3s, maximum storage hours will decrease when the amount of stored MP3s increases. Stored content on radios that don't play MP3s is erased when their power is turned off.

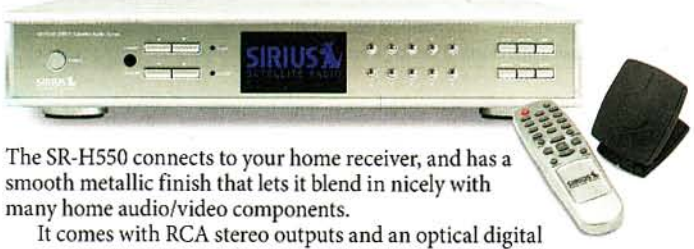
SIRIUS • SR-H550 *SIRIUS home tuner*



The SR-H550 connects to your home receiver, and has a smooth metallic finish that lets it blend in nicely with many home audio/video components.

It comes with RCA stereo outputs and an optical digital output to ensure that you can hook it into any home receiver. The optical digital output provides the cleanest sound possible. The indoor/outdoor antenna accommodates a wide range of placement options, and the tuner's signal indicator lets you know when you've got optimum reception of the SIRIUS signal. A wireless remote is included, so you can find the programming you want from across the room. SIRIUS subscription required.

Details: RCA stereo outputs and cable • optical digital audio output and cable • indoor/outdoor antenna with 20' cord • 14⅞"W x 2 3/16"H x 12⅝"D • warranty: 1 year.

#607SRH550 $269.99

SIRIUS • Conductor *Advanced remote system and SIRIUS tuner for your home stereo*

The SIRIUS Conductor combines a home tuner with an advanced remote system powerful enough to control the tuner through your walls and up to 150 feet away from your stereo. The Conductor's wireless 6-in-1 universal remote has a bright, 3-line LCD screen that displays SIRIUS program information including artist name, song title, channel name, channel number, preset number, and category. The system works with any home stereo with RCA inputs — just plug in the SIRIUS tuner, set up the satellite radio antenna, and activate your subscription.

Details: Wireless remote system • includes tuner/transceiver, universal RF/IR remote with integrated display, IR blaster, weather-proof indoor/outdoor antenna, AC adapter • stores up to 30 presets • warranty: 1 year.

#607SCH1W $119.99 after $30 mail-in rebate*

The Conductor's remote can be used from up to 150 feet away.

1-800-555-9430 or crutchfield.com

Hablamos español 1-800-955-9039 o crutchfieldenespanol.com

New SIRIUS • Stiletto 100 *Portable SIRIUS satellite radio with WiFi capability*

The next step in the evolution of SIRIUS radios is here — the Stiletto 100. It's the first true portable SIRIUS player to offer reception of live SIRIUS signal on the go, plus up to an amazing 100 hours of SIRIUS programming storage. It offers a beautiful full-color display and easy-to-use controls, comes with a slew of useful accessories, and works with a set of optional accessories that expand the number of places and ways you can listen to SIRIUS. It's truly the most impressive SIRIUS radio yet.

Storage galore The Stiletto stores up to 100 hours of content — more storage than any other portable option. You can also download and manage MP3 and WMA files with the included My SIRIUS Studio™ software.

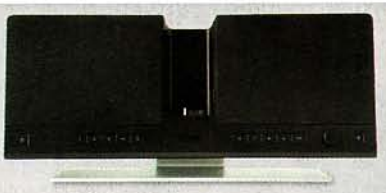
WiFi™ capability Sometimes you'll find spots where you just can't get SIRIUS reception. But thanks to the Stiletto's built-in WiFi capability, this doesn't necessarily mean that you can't hear live SIRIUS broadcasts. If you're in range of an accessible WiFi signal, you can use the Stiletto to go to the SIRIUS website and stream all of SIRIUS' music channels, Howard Stern, and more. You also make fewer demands on the battery, more than doubling its performance life, compared to listening to live SIRIUS in standard portable mode.

Lots of goodies in the box In the package, you'll get two rechargeable batteries, one standard and one extended-life, a pair of earbuds, and a set of headphones with a SIRIUS antenna built into the headband. An available car kit has a 10-button cradle, which lets you save up to 30 channel presets. There's also an available home kit and powered speaker system (see below).

#607SL100 $349.99

Take the Stiletto on the road with the available car kit (#607SLC1, $69.99). Car kit cradle shown (Stiletto not included).

Everything you need We offer a number of accessories that allow you to enjoy the Stiletto 10 and Stiletto 100 almost anywhere. See the full line at crutchfield.com/stiletto.



SIRIUS • Soloist Universal Sound System

The Soloist includes individual adapters to play an iPod® or one of seven SIRIUS radios, including the Stiletto 10 and Stiletto 100. The Soloist has a clock, front and rear auxiliary inputs, a rear auxiliary output, and a remote.

#607SOLOD1 $149.99

SIRIUS • Stiletto Boombox

Enjoy your Stiletto 10 or Stiletto 100 everywhere. Includes an indoor power cable and accepts 8 D-cell batteries for portable use.

#607SLBB1 $149.99

SIRIUS • Stiletto Executive System

Two-way speaker system with bass enhancement for richer sound. Desk or wall mountable.

#607SLEX1 $149.99

SIRIUS • Portable Kit

Armband and belt clip for Stiletto 10 and Stiletto 100.

#607SLPK1 $29.99

New SIRIUS • Stiletto 10 *Portable SIRIUS satellite radio with 10 hours of content storage*

The Stiletto 10 gives you all of your favorite SIRIUS channels in a sleek, portable package, plus room for up to 10 hours of stored music and satellite radio programming. The large, full color screen and simple controls make it easy to access all this content, whether you're in your car, at home, or enjoying live SIRIUS programming while jogging through the park.

Record your favorite music With 10 hours of internal memory space, you can listen to your favorite songs and shows anytime you want. Record live SIRIUS content and upload your favorite music from your home computer using the included software.

Music in full color The 2.2-inch Aurora screen displays SIRIUS channel information in full color, and offers large icons and easy-to-navigate menus. This helps minimize distraction when the Stiletto 10 is docked in its car kit, or when you're viewing the screen from a distance at home.

Intuitive controls You command the Stiletto 10 with the front-panel media dial. The six-way panel control is responsive without being overly sensitive, so you get to the menus you want quickly without a lot of backtracking.

Accessories to fit your lifestyle The Stiletto 10 includes two rechargeable batteries, one standard and one extended-life, a pair of earbuds, and a set of headphones with a SIRIUS antenna built into the headband. You also get an AC adapter, a PC cable, and software for managing your own music files that you've uploaded into the Stiletto 10's memory. There's an available car kit, a home kit, and powered speaker systems to enjoy your Stiletto 10 in every environment (see chart, pg. 5, and above).

#607SL10 $249.99

Enjoy the Stiletto at home with the available home kit (#607SLH1, $69.99). The home cradle (right) even charges your spare battery.

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75.

Shawn can help you with satellite radio.
Toll-free tech support for the life of your gear.

SIRIUS • S50 *50 hours of SIRIUS satellite radio and MP3 storage, in one portable package*

SIRIUS changed the way we listen to radio, and the S50 helped change the way we listen to SIRIUS itself. The S50 receives live SIRIUS broadcasts when docked in the included car kit, records SIRIUS music content for later enjoyment, and lets you store and listen to your favorite MP3s/WMAs. The bright, full-color display shows you all the info you need — channel, artist, and song titles in SIRIUS mode, and song info in MP3/WMA mode. For added ease, the S50 will call out the name of the channel you've just selected — you can find your way through all of SIRIUS' 130+ channels without taking your eyes off the road.

The S50 lets you store up to 50 hours of SIRIUS music content — song by song, or in 2-hour blocks of programming. You can also use the internal memory to store MP3s/WMAs; due to varying compression rates, when you save both SIRIUS content and MP3s, the max storage capacity will be smaller than 50 hours. When the S50 is docked in the included car cradle, you'll receive live SIRIUS programming. You can pause, rewind, and fast-forward again to catch up to the live content. To save songs, just press the button marked with a heart. The S50 is smart, too — it'll automatically capture content from the SIRIUS channels you listen to most, and store it on three different "My SIRIUS" channels, so you can enjoy a custom-crafted mix of your favorite tunes anytime.

You get the portable accessories you need to use the S50 on the go. **Note:** the S50 does not feature a built-in antenna; it will only receive live broadcasts while docked in its cradle. To hear SIRIUS live at home as well, add the compatible home accessory kit (see chart on pg. 5) or the desktop system below. SIRIUS subscription required.

#607S50 $199.99 after $100 mail-in rebate*

• S50-EX1 *Powered speaker system*

The S50 docks in the center, while the Media Dial and included remote let you control all the S50's functions. Includes wall-mount bracket. Dimensions: 7"H x 15⅞"W x 2⅛". Warranty: 1 year.

#607S50B1 $229.99

SIRIUS *Add-on satellite radio*

If your car stereo is SIRIUS-ready, chances are good that it will work with one of the SIRIUS radios listed below. You'll get convenient control of SIRIUS from your in-dash stereo.

There are no extra controllers to mount, and there's no extra clutter on the dash; hide the compact radio under a seat or behind the dash. The antenna is included, along with over 20' of wire for a clean installation. SIRIUS subscription required. Warranty: 1 year. Dimensions vary, see crutchfield.com for more information.

Call or visit our website to verify compatibility with your stereo.

SIRIUS radios that connect to the following brand-name stereos:
Alpine, Clarion, Eclipse, JVC, Kenwood, Pioneer, or Sony **$99.99**
GM vehicles that are SIRIUS satellite radio-ready **$99.99**

SIRIUS • Starmate Replay *Feature-packed plug-and-play*

Read the review:
crutchfield.com/starmatereview

The Starmate Replay may be small, but it delivers big SIRIUS performance. It'll store the last 44 minutes of the channel you're listening to. That means you can pause live broadcasts, rewind, and fast forward. The memory clears when you turn the power off or change channels.

You get all the car accessories you need packed right in the box: suction-cup mount, antenna, and car power adapter. Add a home kit or boombox for SIRIUS playback in your home or anywhere (see chart on pg. 5). The easy-to-read 4-line display shows you artist, song title, and channel info, and the built-in FM transmitter lets you play the signal wirelessly over any of 100 FM frequencies. Save up to 30 songs or artists in S-Seek, and it'll alert you whenever one is playing on another channel. You can save up to 30 channels in the preset banks, too. SIRIUS subscription required.

#607ST2 $69.99 after $20 mail-in rebate*

Everything you need

We'll help you pick the key SIRIUS accessories.

For your home —

- Hook up a SIRIUS radio, like the Conductor on pg. 6, to your stereo or home theater system, or get a table radio that plays SIRIUS all on its own. Most SIRIUS plug-and-play radios also have home kits available, so you can go from car to home and keep listening.
- You could also pick up a SIRIUS boombox — there's one available for most of their plug-and-play radios. Some radios even have two compatible boomboxes to choose from. You'll not only get great-sounding SIRIUS in your home, you can take your boombox with you everywhere.
- Can't get a signal with an indoor antenna? Pick up an outdoor antenna to ensure clear reception.

The Tivoli SIRIUS table radio

For your car —

- From extra car kits for your plug-and-play radio, to FM modulators that simplify installation, to adapters for your factory stereo, we have all the extra gear you need to get SIRIUS Satellite Radio in your car.

For your boat —

- SIRIUS Satellite Radio extends up to 200 miles off shore. Why not take advantage of that with a SIRIUS marine-grade antenna? Just hook it into your SIRIUS radio.

Call 1-800-555-9430 or visit crutchfield.com/SIRIUS to order.

Use your SIRIUS Sportster 4 in a second car with a spare vehicle kit.

Hablamos español 1-800-955-9039 o crutchfieldenespanol.com

***Mail-in rebate** when you purchase select SIRIUS radios between 10/29/06 and 11/22/06. SIRIUS subscription must be activated before 12/31/06. See crutchfield.com for complete details.

New Sirius • Starmate 4 *Plug-and-play SIRIUS satellite radio*

The Starmate 4 gets a sleek new look to go with its compact size and loads of features. It automatically stores the last 44 minutes of the channel you're listening to, and lets you pause live broadcasts, then rewind and fast-forward. The easy-to-read 5-line display showcases artist, song title, and channel information.

Find all your favorites You can scroll by channel, artist, or song title, and you can enter channel numbers directly. You can also save up to 30 of your favorite channels in the preset banks. The handy wireless remote gives you convenient system control. Save the names of up to 30 songs or artists, and S-Seek will tell you anytime one of them is playing across the SIRIUS dial. You can also save the name of your favorite sports teams, and the system will alert you whenever their games are starting.

SIRIUS through your factory radio The built-in FM transmitter relays the SIRIUS signal wirelessly over any vehicle's FM radio — and it'll transmit on any FM frequency between 88.1 and 107.9.

Car accessories The accessories needed to use your Starmate 4 in your vehicle are packed in the box, including a suction-cup mount, a roof-mount antenna, and a DC power adapter. The optional home kit gives you SIRIUS playback over your home stereo (see pg. 5). SIRIUS subscription required.

#607ST4 $99.99 after $20 mail-in rebate*

A universal solution for SIRIUS accessories

Universal Docking allows the Starmate 4, Sportster 4, and Stratus to share home and car accessories. See chart on pg. 5 for more.

New • SUBX1 *Boombox for select SIRIUS radios*

Expect great sound out of this boombox; the SUBX1's built-in subwoofer offers full low-end sound. An input lets you listen to other devices. Works with the Starmate 4, Sportster 4, and Stratus.

#607SUBX1 $99.99

SIRIUS • Sportster 4 *Plug-and-play SIRIUS radio with Universal Docking capability*

The Sportster 4 delivers SIRIUS' broad entertainment options, and has some great features that'll enhance coverage of your favorite sports teams. Like Game Alert, which you can program to tell you whenever your favorite NFL, NBA, NHL, and college teams are about play.

The Sportster 4 automatically records the last 44 minutes of the channel you're listening to. Interrupted by a call during the crucial drive? You can pause live action. Want a replay of that spectacular touchdown? Rewind and hear it again. The memory clears when you change the channel or turn the radio off. You can also program the Jump button to your city's SIRIUS traffic and weather channel, and with the press of just one button switch between the game and your traffic updates.

The Sportster 4 features 30 channel presets and an FM transmitter that lets you select the FM frequency that works best in your area. Then, if you switch frequencies for better reception while you travel, you can return to the original one with the touch of a button.

This package includes the accessories you need to play the radio over your car stereo, including a dock with suction cup, a car power adapter, and a roof-mount antenna. This radio also works with the full line of universal accessories from SIRIUS, which allows you to use several different radios in the same boombox, car kit, or home kit (see chart, pg. 5). SIRIUS subscription required.

#607SP4TK1 $119.99 after $30 mail-in rebate*

New SIRIUS • Stratus *The most affordable SIRIUS plug-and-play radio with universal docking capability*

The Stratus gives you all that SIRIUS has to offer in a tidy, no-frills package. The Stratus was designed for ease of use, and its simple layout makes navigating SIRIUS programming easy. But that's not to say it isn't packed with features. The three-line display is easy to read and shows artist, title, and channel information. There are 10 channel presets, and the One-Touch Jump feature sends you straight to traffic and weather information for your city, or to your favorite SIRIUS channel.

Universal Docking capability The Stratus also works with a full line of SIRIUS accessories. You can add a home kit for use with any home radio, or a boombox to play the Stratus in any environment. An optional remote puts control over the Stratus in your hands. See the chart on pg. 5 or visit crutchfield.com/SIRIUS for more details on accessories.

SIRIUS over any radio The built-in FM transmitter relays the SIRIUS signal wirelessly over any FM radio — and it'll transmit on any of 100 FM frequencies.

Parental controls and channel lock You can activate the channel lock on the Stratus to keep the kids from accessing channels that may have mature content. Simply select a four-digit password and apply it to the desired channels. You can also keep these channels from being displayed when scrolling channel lists.

Car ready, out of the box Your Stratus includes a vehicle cradle, antenna, and power adapter that let you receive SIRIUS music and shows in your car. Dash and vent mounts are also in the box, so you have options when placing the Stratus in your vehicle. See the chart on pg. 5 for specifications.

#607SV3 $59.99

Stratus shown in optional home dock.

Polk • XRt12 *XM Reference™ home tuner*

The XRt12 sets the standard for XM home tuners. Thanks to its top-of-the-line Burr-Brown® digital-to-analog converter, you won't hear the loss of musical warmth associated with digital compression. The XRt12 sounds better than any plug-and-play tuner connected to your home system. Wilson Rothman of Time.com said, "Try as I might, all I heard was great music."

This tuner has analog and digital outputs that let you hook it up to just about any home theater or stereo system. Its video output lets you see the display info on your TV for easy, long-distance viewing.

Details: optical and coaxial digital outputs • analog audio output (stereo RCA jacks) • composite video output • 4-line blue LCD • 10-song memory • 20 channel presets • search by channel or category • antenna with 23' cable • 17"W x 2⅜"H x 12"D • XM subscription required • warranty: 1 year.

#107XRT12 ~~$299.99~~ **PRICE BREAK 249.99**

Price break good through 1/9/07.

New XM • Mini-Tuner *XM Satellite Radio Mini Tuner*

XM Mini-Tuner shown with Home Dock (#220CNP2H, $29.99).

With the XM Mini-Tuner, XM has revolutionized the way you can receive satellite radio. It's a miniature tuner that you can transfer from one compatible device to another. You can add the XM Mini-Tuner to your "XM Ready" home audio/video receiver by using the Home Dock (available separately, required to receive XM signal), which includes a cradle for the XM Mini-Tuner, a home antenna, and a cable that connects to the dedicated XM input on your receiver. Want to listen in your car, too? When available, optional accessories will allow you to adapt your XM Mini-Tuner to work with both aftermarket and OEM in-dash stereos. No matter how you use your XM Mini-Tuner, a subscription to XM is required. Once you've assigned your subscription to the XM Mini-Tuner, you can transfer it between as many compatible devices as you'd like, without having to pay for additional subscriptions.

XM Mini-Tuner with Home Dock **#700XMTUNPK** $59.98

XM Mini-Tuner **#220CNP2000** $29.99

Samsung • neXus *Capture up to 50 hours of XM content, and play your MP3s, too*

Thanks to the Samsung neXus, you can hear all the great programming of XM, plus your favorite MP3/WMA music files.

There are two versions of the neXus — one can store up to 50 hours of XM content, the other can store up to 25 hours. Both versions come with a rechargeable battery and a set of earphones, so you can listen to all your stored music when you're out jogging, walking, or just hanging around town.

To get live XM broadcasts, you'll need to dock the neXus in the included desktop cradle and connect it to your home stereo. While it's in its cradle, use your neXus to capture XM content, including individual songs and blocks of XM programming. You can also reserve a portion of the memory for uploading MP3 and WMA files from your computer. The neXus lets you manage your stored XM songs along with your MP3s and WMAs, so you'll be able to create a fantastic playlist. Hear a song you like on XM? "Tag" it and buy it later online.

The big, easy-to-read display shows you XM programming info, along with your digital music file titles. The neXus comes with a home antenna, an audio cable that connects to your home stereo, a carrying case, and a wireless remote for convenient, across-the-room control. If you'd like to use your neXus in the car, too, you'll need to pick up the optional car kit (see chart, page 5). With it, you can use the wireless FM transmitter to play sound from the neXus over any car FM stereo. A subscription to XM is also required.

The neXus comes with a home dock to give you live XM reception.

Samsung • Helix *XM radio/MP3 player*

The two-tone Helix is packed with all the features listed below, giving you the power to listen to XM just about anywhere you are, plus enjoy a mix of MP3 and WMA files on the go.

#305HELIX $299.99 AFTER $50 MAIL-IN REBATE*

- **Portable:** A built-in antenna gives you live XM just about anywhere. A home kit and portable accessories are included in the package, and an optional car kit is available (see chart, pg. 5).
- **Recordable:** Store up to 50 hours of XM programming and listen to it anywhere, anytime.
- **Uploadable:** Use up to half the memory (512MB) to upload MP3s and WMAs from your computer. Then create your ideal playlist by mixing your recorded XM content in with your MP3/WMA library. You can manage these playlists on the fly, right on your inno or Helix.

Pioneer • inno

Pioneer proudly offers its sleek inno, with its brushed aluminum case and user-friendly design. It performs all the functions listed below, letting you enjoy XM and your MP3/WMA files everywhere.

#130INNO $299.99 AFTER $50 MAIL-IN REBATE*

- **Legible:** A 6-line color display shows you all the song, artist, and channel or playlist info. Buttons laid out for intuitive operation let you save favorites or schedule recordings with just a few clicks.
- **Versatile:** You get 99 channel presets, and you can select up to 20 songs or artists and the radio will alert you every time one is playing on XM.

Note: XM subscription required. Portable reception of live XM can vary.

Zoom in on the right satellite radio at crutchfield.com

Get a hands-on look at the Pioneer inno

"... the inno gets it right. As a portable XM radio, the inno outperforms its predecessors, offering a sweet color screen, dramatically improved reception, thoughtful design, and all the extras we've come to expect from a satellite radio, like a built-in FM transmitter, sports and stock tickers, favorites, etc.

Recording, and managing content, though, is where the inno truly shines. Recording XM is easy — just press and hold the "XM" button to record a song or channel you're listening to."

To read more, go to crutchfield.com/inno.

***Mail-in rebate** when you purchase select XM radios between 11/1/06 and 12/31/06. XM subscription must be activated before 12/31/06. See crutchfield.com for complete details.

Toll-free tech support for the life of your gear.

New Delphi • SKYFi3® *Plug-and-play XM radio with large screen and car accessories*

Delphi's new SKYFi3 is easy to use where you probably listen to XM the most — in the car. The 2.8-inch screen is the largest among all plug-and-play radios on the market, so reading programming information at a glance isn't a strain. A number of mounting options allow you to mount the SKYFi3 in the best possible position for viewing.

30-minute pause/replay Need to take a phone call? Use the SKYFi's 30-minute pause/replay feature to pause your favorite song or show and pick up right where you left off later on.

Store up to 10 hours of XM programming The SKYFi3 can record up to 10 hours of XM programming. Just press a button to record a song or show, and it's stored for you to enjoy whenever you like.

Add a MicroSD™ card for digital music playback Mix your favorite MP3 or WMA music files and store them on an optional MicroSD card to play up to 500 songs through the SKYFi3.

Accessories to fit your style The accessories you need to set up your SKYFi3 in the car is in the box, including a cradle, mounting bracket, magnetic roof-mount antenna, cassette adapter, and power adapter. You can mount the SKYFi3 horizontally or vertically to improve visibility. Add a home kit (see chart, pg. 5) to use the SKYFi3 with your home stereo system. A portable kit (see below for offer details) allows you to listen to live XM programming anywhere. XM subscription required. See chart on page 5 for specifications.

#040SA10271 $229.99

SKYFi3 shown in included car kit cradle.

The SKYFi3 package includes a promotional code that lets you receive a portable kit (allows 70-90 minutes of live XM reception), and an arm band free from Delphi. Offer is redeemable by phone or online.

Delphi • Roady XT™ *Smallest XM plug-and-play, with car kit*

Read the review: crutchfield.com/xtreview

Delphi put the Roady XT into the smallest, lightest, sleekest case — and they added some great features to boot. The bright, backlit 2-line display gives you a choice of seven colors to accent your car's interior. You can also select the sports teams you want to keep your eye on, and watch the scores scroll across your screen. The scrolling ticker lets you watch stock quotes, too, and you can choose which ones you want to see from the database of over 9,000 available stock symbols.

You can also program up to 30 channel presets, and save up to 20 songs or artists in TuneSelect™. This feature will alert you any time a saved song or artist is playing on any other XM channel.

The Roady XT comes with car accessories and a built-in FM transmitter — that wirelessly broadcasts XM's signal over any FM frequency — for a quick and easy installation. The Roady XT keeps track of the last six FM frequencies you've used, so you can usually find an open one with just the push of a button. You also have the option of buying an extra car accessory kit for fast transfer between vehicles, a home kit for in-home entertainment (see chart on pg. 5), and a remote for convenient control (see below). XM subscription required.

#040SA10175 $79.99 plus a free month of service†

Belkin • Boombox

A built-in antenna and water-resistant shell make this 'box a great outdoor companion. Indoor accessories are included. Also works with the Audiovox Xpress. Warranty: 1 year.

Delphi • SKYFi2® *XM plug-and-play radio with car kit*

SKYFi2 enhances your XM experience with user-friendly features. The best part is that the SKYFi2 automatically stores the last 30 minutes of whatever it's tuned to. This lets you pause a live broadcast if you have to leave the room or take a call, so you won't miss a thing (stored content is erased when power is turned off).

SKYFi2 also keeps you up to date on the sports world with its selectable, customizable scrolling scoreboard. You can also select stock symbols and keep an eye on your finances with the stock ticker.

The package includes the accessories you need to play it over your car stereo. If you'd like to listen when you're at home, you can also get the optional home kit (see chart on pg. 5). XM subscription required.

#040SA10162 $69.99 after $50 mail-in rebate* *Supplies limited*

Delphi • MyFi™ *Easy to use portable XM radio*

Delphi's MyFi, the original portable XM radio, is still a great choice for listening to XM on the go. First, the curvy and smooth metallic shell is comfortable to hold. The bright, backlit 6-line display shows you artist, song title, and channel information.

Next, the MyFi allows you to store up to five hours of XM programming, and listen to it anywhere, anytime. The MyFi stores content when it's in the home or car dock, and in portable mode — just hit the "2go" button. You can program future recording sessions, too. Delphi gives you all the accessories you need for car, home, and portable listening as well. XM subscription required. Specifications on pg. 5.

#040SA10161 $39.99

XM • Sportscaster *Small, bright plug-and-play*

The Sportscaster sure is small, but that's what helps it fit in so many places. The included car mounting bracket lets you put the radio just about anywhere — mount it to your windshield, your dash, or to an optional mount, such as a Pro.Fit vehicle-specific mount (see crutchfield.com). The Sportscaster comes with the accessories you need to play it over your car stereo, and you can pick up the optional home kit if you'd like to listen at home (see chart on pg. 5). A portable kit is also available, complete with headphones with built-in antenna, portable battery pack, and belt clip (654XM101WK; $79.99).

Sports fans, right out of the box, three presets are programmed to sports channels for you. Driving to the game? You can program the "favorite" button to your city's XM traffic and weather channel, and then jump there directly any time. You can also save any 30 of XM's channels as presets. XM subscription required.

#654RVK101 $59.99 plus a free month of service†

XM Direct™ *Hideaway car satellite radio*

XM Direct is the way to get fully integrated XM Satellite Radio with your compatible XM-ready in-dash stereo. View song and channel info and select channels right from your stereo.

Each package has an XM radio, an adapter for your stereo, and an antenna. XM subscription required. Check out the chart on pages 22-23 or visit crutchfield.com to find XM compatible stereos that fit in your vehicle. Warranty: 1 year. Radio dimensions: 4½"W x 1⅜"H x 4½"D.

Call or see our website to verify compatibility with your current stereo.

The XM Direct tuner box without an adapter (pictured) works directly with select Dual stereos. **#209XMD1000 $49.99**

These XM Direct packages include a brand-specific adapter for the stereo:
Audiobahn and Panasonic **$69.98**
Alpine, Kenwood, Pioneer, or Sony **$99.98**

Everything you need We'll help you pick the key accessories.

For your home –
- You can get an XM Ready home receiver, for the best possible sound.

Get XM in any room with a signal repeater –
- Great for rooms where reception is otherwise unavailable. Adding additional receiver modules gives you the ability to run multiple XM radios from one antenna.

For your boat –
- Want to take XM radio with you when you hit the water? A special antenna designed to withstand the elements is available and works with any XM satellite radio with a single antenna input.

For everywhere –
- Improve your portable radio's on-the-go reception with headphones with a built-in antenna. Or pick up a boombox for listening everywhere.

Call 1-800-555-9430 or visit crutchfield.com to order.

A signal repeater makes it easier to receive satellite radio in rooms that may not be ideal for an antenna.

***Mail-in rebate** when you purchase select XM radios between 11/1/06 and 12/31/06. XM subscription must be activated before 12/31/06.

Cris can help you with satellite radio
Toll-free tech support for the life of your gear

Finding the right car audio/video gear for you

We got our start in car audio 32 years ago. Today, whether you're shopping for yourself or for holiday gifts, you can count on our expertise to help you:

1. Find the gear that fits

How do we know what fits your car? We measured it. Our research team visits junkyards and dealerships to measure and document cars, then compiles all that info and adds it to our comprehensive fit database. There are two ways for you to tap into the database:

- Visit us online at crutchfield.com/whatfits
- Call our Sales Advisors at 1-800-555-9430.

2. Get the product info you need

- Browse this catalog for shopping guides designed to help you choose the perfect in-dash stereo, speakers, amplifier, and subwoofer. Plus, you'll find comparison charts that let you see the features and specs of all the models side by side.
- Call a Sales Advisor at 1-800-555-9430 — or send an e-mail to solutions@crutchfield.com — for friendly, personal service and answers to your questions.
- Visit crutchfield.com for how-to articles and step-by-step videos, custom comparison charts, close-up photos, and more.

3. Get it installed right

We've got you covered, with free vehicle-specific installation kits and custom instructions, plus free tech support for life. See the details below.

Michael, a Corporate Training Specialist from Atlanta, GA, with his great-sounding 2001 Chevy Cavalier.

Free accessories to help with your installation

Install it yourself and save

When you order, we'll send what you need for a clean, professional-looking installation:

- **Free custom mounting kit and wiring harness** with your purchase of an in-dash stereo priced $129.99 or more.*
- **Free custom wiring connectors and mounting brackets** with your speaker purchase.*
- **Free MasterSheet™ instructions*** Available for most vehicles on the road today, they're clear, easy to follow, and packed with detailed illustrations and photos.
- **Plus — free technical support for life** No matter what you're installing, you can count on our Technical Advisors for expert advice and assistance.

*Some vehicles don't require a mounting kit. Some need factory system integration adapters to match a new stereo to factory equipment (these are not free, but are half-price with a stereo priced $129.99 or more). Some vehicles don't require speaker connectors. Kits, harnesses, connectors, and instructions are available for most, but not all, vehicles.

Prefer professional installation?

Add an InstallCard to your order, and have your new gear installed at a professional shop in your area. Visit crutchfield.com/installcard or call 1-800-555-9430 for details and prices.

A do-it-yourself success story

Michael, from Atlanta, GA, installed a stereo and speakers in his Chevy Cavalier, with a little help from Crutchfield.

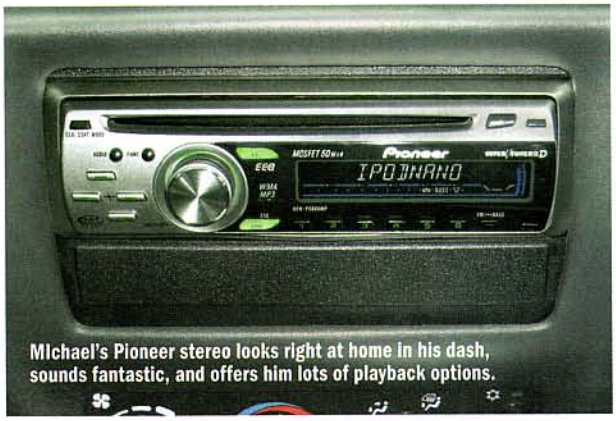
"I live and work in the suburbs of Atlanta, so I'm in the car a lot. Music helps me get through my long commutes, which makes good sound very important.

"When I bought my car, I realized pretty quickly that the factory system wasn't going to cut it. So I hopped on crutchfield.com and clicked 'Find What Fits My Car.' The system showed me the stereos and speakers that fit my car, then let me compare models, which helped me pick out the ones I thought would work best for me."

The satisfaction of installing the system himself

"I'd never installed a car stereo before, so I was a little nervous about the idea of doing it myself. But with the help of Crutchfield's MasterSheet™ instructions, the installation was easier than I thought it would be. The instructions showed me clearly what I had to do at each step, and offered essential tips and suggestions for taking my dash apart and putting it back together.

"In just a few hours, I had everything installed, and it looked and sounded great. And knowing that I'd done it all myself was definitely satisfying."



MIchael's Pioneer stereo looks right at home in his dash, sounds fantastic, and offers him lots of playback options.

The joys of improved sound

"Now that I listen to a premium sound system on a daily basis, I would never go back to a factory system. I hear more detail in my music, I can really feel the bass when it hits, and the sound never gets drowned out by road noise. I can listen to my MP3 CDs, and I can even plug my iPod® nano into the stereo's auxiliary input. I always hear exactly what I want, and it all sounds fantastic."

You can improve your sound system dramatically, too. Call a Sales Advisor or go to crutchfield.com to find out how.

Giving car audio/video for the holidays? We'll help you every step of the way.

From finding the right products, to helping your gift recipients set them up, you can rely on us.

Wayne & Ben
Research & Development

Our R&D team visits dealerships and junkyards to measure vehicles. We have info for 10,503 cars, trucks, and SUVs, making it easy for us to help you find the products that fit your loved ones' cars.

Melissa,
Sales Advisor

Our Sales Advisors have a real passion for A/V gear. When you call, e-mail, or chat with us online, your Sales Advisor will help you choose gear that fits your budget and will make everyone on your list happy.

Earl
Tech Support Advisor

When you give gifts from Crutchfield, you also give the benefit of our toll-free Tech Support. Our Tech Support Advisors offer step-by-step installation guidance, plus product help for the life of every piece of equipment you buy from us.

We're committed to helping you

Crutchfield participates in the Mobile Electronics Certified Professional program, the only nationally recognized testing program for car electronics. Most of our Tech Support Advisors have achieved Basic or Advanced Installer status, and all our Sales Advisors are certified Mobile Product Specialists. This helps us give you better advice about buying, installing, and using car A/V equipment.

Deane can help you upgrade your stereo system.
Toll-free tech support for the life of your gear.

Got a factory stereo? We've got solutions

- Are you happy with the way your factory radio looks but not so happy with the way it sounds?
- Would you like to upgrade to a new in-dash stereo without losing those great steering wheel controls?
- How about your portable music player? Do you ever get tired of all those cables cluttering up the dash when you listen in the car?

These days, you have lots of options for listening to music on the go, and it seems like new types of gear are popping up every day. That's great news — it means there are more ways than ever to customize your car stereo, even if you're keeping the factory radio.

Many of the options on these two pages integrate seamlessly with your car and stereo, and help you create a system that does what you need it to do. Don't see what you're looking for here? See **crutchfield.com/oem** or call a Sales Advisor at 1-800-555-9430 for more ways to enhance your car stereo.

Lindsey, Crutchfield Sales Advisor
"Our car fit database is great. It doesn't just show the new stereos that fit, it shows cool add-ons that will work with your factory stereo, too."

Adapter for 2003 and up Honda Accord (above), $149.99

Adapter for 1996-1999 Ford Taurus or Mercury Sable (right), $69.99

We can help you replace a "difficult" factory stereo

In some vehicles it's a challenge to replace the factory radio with a new aftermarket stereo. Often, this is because they have the climate controls and radio controls all mounted in one component. Without a special kit, you're stuck with the factory stereo, for better or (usually) for worse. But there are ways to overcome obstacles like this, such as the integration kits shown here. They fit the car's dash opening perfectly, and include the necessary wiring and controls to allow you to operate the climate controls that were built into the factory radio.

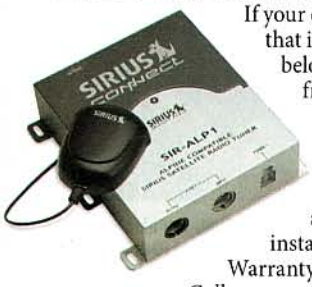
In addition to adapters for mounting a new stereo in the dash, we also carry adapters that let aftermarket stereos work with the premium sound systems in many vehicles, eliminating the need for extensive and time-consuming rewiring when you're adding a new in-dash stereo.

Give us a call at 1-800-555-9430 or go online to see what we have for your vehicle at crutchfield.com/whatfits.

Save big on adapters Get the adapter you need for half price when you purchase a new stereo priced at $129.99 or more. Savings of up to $75.

Satellite radios that plug into, and are controlled from, your in-dash stereo

SIRIUS *Add-on satellite radio*



If your car stereo is SIRIUS-ready, chances are good that it will work with one of the SIRIUS radios listed below. You'll get convenient control of SIRIUS from your in-dash stereo.

There are no extra controllers to mount, and there's no extra clutter on the dash; hide the compact radio under a seat or behind the dash. The antenna is included, along with over 20' of wire for a clean installation. SIRIUS subscription required. Warranty: 1 year. Dimensions vary.

Call or see our website to verify compatibility with your stereo.

SIRIUS radios that connect to the following brand-name stereos:
Alpine, Clarion, Eclipse, JVC, Kenwood, Pioneer, or Sony $99.99
GM vehicles that are SIRIUS satellite radio-ready **#607SIRGM1** $99.99

Learn more about your satellite radio options See pages 4-13.

XM Direct™ *Add-on satellite radio*

Get fully integrated XM Satellite Radio with your compatible XM-ready in-dash stereo. View song and channel info and select channels right from your stereo. Each package has an XM radio, an adapter for your stereo, and an antenna. An XM subscription is required to receive XM broadcasts. Warranty: 1 year. Radio dimensions: 4½"W x 1⅜"H x 4½"D.

Call or see our website to verify compatibility.

The XM Direct radio without an adapter (pictured) works directly with select Dual stereos. **#209XMD1000** $49.99

These XM Direct packages include a brand-specific adapter for the stereo:
Panasonic $69.98
Alpine, Clarion, JVC, Kenwood, Pioneer, or Sony $99.98

Improve your factory stereo

Some cars have factory stereos that are so deeply integrated into the vehicle's electronics that they cannot be replaced. This makes it difficult to create a custom stereo system; and cars with these kinds of systems are becoming more and more common.

Fortunately, we're starting to see products like the Rockford Fosgate 3SIXTY. It improves the sound coming from your factory stereo, and lets you add external amplifiers, so you can replace the factory speakers and add subwoofers, too. You end up with a great-sounding aftermarket system, while keeping the vehicle's electronics intact.

The rest of this page illustrates other ways of enhancing or customizing your car's stereo. Call us at 1-800-555-9430 or visit crutchfield.com to learn more about your options.

Rockford Fosgate • 3SIXTY.1 • 3SIXTY.2

Revolutiona ry signal processor for any car stereo

No matter what kind of stereo you have, factory or aftermarket, Rockford Fosgate's 3SIXTY.1 and 3SIXTY.2 Interactive Signal Processors give you the power to fully master the way your system sounds. They remove any factory equalization and let you customize the sound to *your* liking with a 15-band equalizer (upgraded to an astounding 153 bands on the 3SIXTY.2). You also get an auxiliary input for adding to your listening options (such as an iPod®, plug-and-play satellite radio, etc.).

You need a Bluetooth® enabled Palm® device to set up and adjust the processor. It's all done wirelessly. The processor sends the adjusted signal to your external amps via the 5-volt front, rear, subwoofer, and center channel preamp outputs.

Dimensions: (3SIXTY.1): 7 5/16"W x 1¾"H x 4½"D, (3SIXTY.2): 8 5/16"W x 1¾"H x 5"D. Warranty: 1 year.

#5753SIXTY1 $299.99
#5753SIXTY2 $599.99

Get the full details about the 3SIXTY at crutchfield.com/3sixty.

PAC *Keep your steering wheel controls*

Install a new stereo in your vehicle without losing the convenience of the radio controls on your steering wheel. PAC's SWI-X interface lets you use the steering wheel controls in most vehicles to command almost any brand-name radio that has a wireless remote.

Installation is a 3-wire hook-up in many vehicles. Step-by-step LED confirmation makes it easy to program your commands into the unit. The SWI-X can learn up to 12 functions from your stereo's wireless remote. *Call or see our website to verify compatibility with your stereo.*

SWI-X universal remote control interface **#127SWIX $69.99**

PAC also offers remote control interfaces designed to work specifically with the brands below. A brand-specific interface makes setup a little easier.

For Alpine, Blaupunkt, JVC, Kenwood, Pioneer, or Sony stereos **$69.99**

Pro.Fit *Mounting brackets for your portable player*

Pro.Fit VSM for 1999-up Chevy trucks and Cadillac Escalade

Looking for an easy way to mount your plug-and-play satellite radio or portable music player in your vehicle? Pro.Fit has a solution for you. Pro.Fit International manufactures Vehicle-Specific Mounts (VSMs) that let you mount your audio devices in convenient locations in your car, truck, or SUV.

The Pro.Fit VSM puts your favorite player within easy reach, without altering the interior of your vehicle — good news if you lease your car. You can expect a great-looking professional fit every time. Each Pro.Fit VSM comes with comprehensive installation instructions. To see if we have one for your car, call a Sales Advisor at 1-800-555-9430. Lifetime warranty.

Pro.Fit vehicle-specific mounts range from **$35.99 - $37.99**

USA SPEC *Add a CD changer to your car's factory system*

The SCD-VW44 ($269.99) shown here works with most 1998-and up Volkswagens.

If your car's factory stereo can control a CD changer, it's likely USA SPEC has a changer that you can add without paying the dealership's high price. A CD changer is perfect for the person who always wants their favorite discs in the car. Store six discs safely out of the way in the changer and they'll be ready to play at the push of a button.

USA SPEC makes factory-matched 6-disc changers to work with many of the vehicles on the road today: BMW, Ford, GM, Honda, Hyundai, Jeep, Toyota, Nissan, Mercedes, VW, and Volvo. Call us at 1-800-555-9340 to see if we have one for your vehicle.

Details: includes a CD changer and a vehicle-specific adapter cable • five different mounting angles • 9 15/16"W x 2 1/16"H x 7 3/16"D • warranty: 3 years.

Prices range from **$209.99 to $299.99** *(BMW* **$349.99** *Mercedes* **$599.99***)*

Pro.Fit *miGrips will hold your audio device securely*

Give your iPod®, portable MP3 player, cell phone, or PDA a secure seat in your car with Pro.Fit's miGrip.

This universal holder features a sliding clamp that can be adjusted to fit and secure portable devices from 2⅜" to 4½" wide. You can attach the miGrip with its adjustable clamps on the top and bottom or on the sides, depending on where your device's inputs and outputs are. The adjustable supports on the bottom of the mount accommodate several types of device power plugs.

The miGrip works best with a Pro.Fit universal or Vehicle Specific Mount (above). Call us or go to crutchfield.com/whatfits to see if a Vehicle Specific Mount is available for your car.

Universal miGrip (black) **#042Mi400B $24.99**
Universal miGrip (white) **#042Mi400W $24.99**

iPod® in your car

SHOPPING GUIDE

Connect your iPod to your car's sound system

Want to listen to your iPod through your car stereo? We'll help you make it happen. To find the best solution for your car, call 1-800-555-9430 or visit our **digital drive-thru™** at crutchfield.com/drive-thru. Just answer a few questions about your iPod, your car, and your stereo. You'll get a personalized list of all the ways to connect your iPod, and detailed info on the benefits of each.

Fran, Crutchfield Photo Studio Assistant, loves being able to take his music out into the field.

How many ways are there to connect your iPod?

Here are the four general approaches to hooking up an iPod to a car stereo.

- **Best sound, plus control and power: iPod control adapters**
  Control and charge your iPod with your stereo. You get optimal sound, and song titles are displayed. Available for most brand-name and factory stereos.
  Prices range from $29.99 – $199.99
- **Best sound quality: Auxiliary input and Bluetooth®**
  Use an input on your stereo to pipe in your tunes, or do it wirelessly via Bluetooth. Use the iPod for making selections. Some stereos require input adapters.
  Input adapters $9.99 – $99.99
  Bluetooth adapters $199.99
- **Good sound quality: Wired FM modulators**
  Send the music from your iPod to your car's stereo through the FM radio. Sound quality is good, but you have to hard-wire (permanently install) the adapter.
  Wired FM modulator $29.99
- **Convenient: Cassette adapters and wireless FM transmitters**
  The easiest ways to get music from your iPod into your car stereo are cassette adapters (good sound quality) and FM transmitters (sound quality can vary).
  Wireless FM transmitters $29.99 – $99.99
  Cassette adapters $13.99 – $29.99

How do I get the best sound?

There are several ways to get your music into your stereo, but which way sounds best? We recently looked at this very question. To see what we came up with, read our article at crutchfield.com/ipodsound.

I'm new to iPod. How does it work?

Read our new *Guide to Life with iPod* on our website at crutchfield.com/ipodlife to learn the ins and outs of getting the most from your iPod.

Find the gear you need to add your iPod to your stereo with our online digital drive-thru

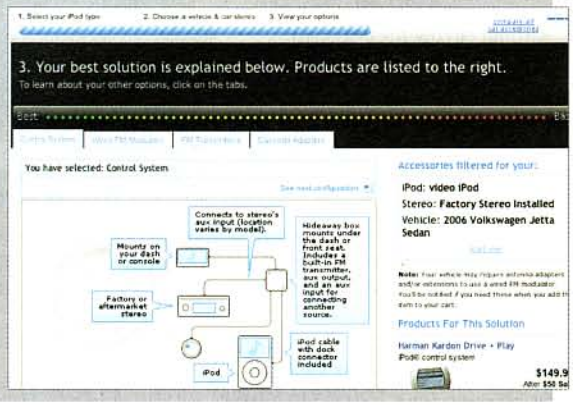
Our digital drive-thru takes the work out of finding an iPod solution for your car. Its simple, three-step process gets you right to your hook-up options. With just a few clicks, you'll get specific product recommendations. Here's how it works.

Step 1
Tell us which kind of iPod you have.

1. Select your iPod
We'll filter the results to match your specific type of iPod. If you need an iPod, shop now.
iPod Classic 1st/2nd
iPod Classic 3rd/4th
iPod mini
iPod photo
video iPod
iPod shuffle
iPod nano
non-iPod mp3 player

Step 2
Tell us what kind of vehicle and stereo you have.

Step 3
We'll show you your options for connecting your iPod. You choose an option, and we'll list the accessories that you need to make it happen.



3. Your best solution is explained below. Products are listed to the right.
You have selected: Control System
Accessories filtered for your:
iPod: video iPod
Stereo: Factory Stereo Installed
Vehicle: 2006 Volkswagen Jetta Sedan
Products For This Solution
Harman Kardon Drive + Play
iPod® control system
$149.9

iPod accessories for home or office. We carry a variety of accessories for using your iPod at home. See crutchfield.com.

Harman Kardon • DP1US Drive + Play *Award-winning iPod control that works with any car stereo*

Harman Kardon's Drive + Play is more than just an iPod adapter — it's a complete digital music control system. While your iPod is connected to it, you can control every aspect of playback. It even charges your iPod's battery. In fact, because the Drive + Play handles the iPod so well, and can be used with any car stereo, it was a Consumer Electronics Show "Innovations 2006" award winner.

Controller

The Drive + Play's Text Commander Controller handles file navigation with ease and elegance. This remote-mount command center works just like the click wheel on your iPod — just press the outer buttons to play, pause, fast-forward, or rewind, and twist the knob to scroll through the menus. Install it on your center console for a handy, easy-to-reach controller.

Display

The system's backlit display mounts up high on the dash for easy visibility. And since it matches the display on your iPod — with the same menu style and general layout — you already know how easy it is to navigate the menus.

Connections

The central "brain" unit can be mounted out of the way in the glove box or under a seat. If your radio has an auxiliary input, you can connect the Drive + Play's audio output to it for the best possible sound performance. The Drive + Play also offers its own auxiliary input for connecting an additional component to your stereo system.

The built-in wireless FM transmitter gives you a quick and easy way to play the sound through your vehicle's FM radio. The Drive + Play now also comes with a wired FM modulator. If your stereo doesn't have an auxiliary input, you can hook up the wired FM modulator for improved sound quality over the wireless transmitter.

The Drive + Play now includes a wired FM modulator (a $30 value)
If your stereo doesn't have an aux input, you can still count on good sound. Offer good through 11/23.

Details: connect your iPod to any car stereo • dash-mountable display • remote-mount control knob • compatible with all dockable iPods • auxiliary input • 3-meter cables for display and controller • mounting hardware • 12-volt power adapter • display: 3¾"W x 2½"H x 1"D; brain unit: 6"W x 1⅜"H x 3½"D • warranty: 1 year.

#108DP1US $99.99 after $50 mail-in rebate
Price $149.99 – $50 rebate = $99.99. Offer ends 11/23/06.

iPod control adapters for factory stereos

Peripheral *iPod2car factory stereo adapter*

Control your iPod through your compatible factory stereo with Peripheral's iPod2car adapter. Use the iPod's click wheel to choose a playlist, then use your stereo controls to skip ahead or backward through the playlist. And you give the iPod's battery a fresh charge.

The adapter connects to your stereo's CD changer port. We carry adapters for Audi, Chrysler, Ford, GM, Honda, Toyota, and Volkswagen vehicles, but please give us a call or go to crutchfield.com to confirm that the iPod2car is compatible with your vehicle. Warranty: 1 year.

Peripheral iPod adapters ~~$199.99~~ PRICE BREAK **$149.99**

USA SPEC *All-in-one iPod adapters for factory stereos*

Adding one of these USA SPEC iPod adapters to your factory stereo lets you operate your iPod with your car's CD changer controls. You can control volume, source, song selection, and up to five playlists right from your stereo. The adapter charges your iPod, too. There's also an auxiliary input for your other audio gear.

Call us or visit crutchfield.com to confirm that we have an adapter for your vehicle. Degree of control and display text may vary depending on the car. We carry adapters for BMW, Chrysler, Ford, GM, Honda, Nissan, Toyota, Volvo, and Volkswagen vehicles. Warr.: 3 yrs.

USA SPEC iPod adapters **$139.99**

Mounts to secure your iPod and more

Pro.Fit *Grips to hold your iPod secure*

Select the Pro.Fit iPod grip to match the size of your iPod, or one of the miGrip universal mounts so you can use it with other gear, too. The grip gets a snug hold on your iPod. You'll need to mate it with a separate Pro.Fit Vehicle Specific Mount (below) for best performance. Warranty: 1 year.

Pro.Fit miMount for iPods **$19.99**

Pro.Fit miniGrip for iPod minis **$24.99**

Pro.Fit miGrip (available in black or white) **$24.99**

Pro.Fit *Mounting brackets for your iPod*

A ProFit Vehicle-Specific Mount (VSM), when used with a Pro.Fit grip (above), is an easy way to mount your iPod or other portable music player in your vehicle. The Pro.Fit VSM puts your audio device within easy reach, without altering the interior of your vehicle — good news if you lease your car. You can expect a great-looking professional fit every time. Each Pro.Fit VSM comes with comprehensive installation instructions. To see if we have one for your car, call us at 1-800-555-9430. Lifetime warranty.

Pro.Fit VSM for Chevy trucks and Cadillac Escalade

Pro.Fit vehicle-specific mounts range from **$35.99 – $37.99**

In-dash Stereo

SHOPPING GUIDE

We make holiday shopping easy

Every day, we help customers work their way through our large offering of car stereos down to the one in-dash receiver that meets their needs. Whether you're looking for the perfect stereo for yourself, or to give as a gift, Crutchfield Sales Advisors can help. And if the stereo is priced $129.99 or more, we'll even include all of the necessary hardware for installation (details on pg. 14).

Oscar, a Crutchfield Sales Advisor, helps customers find the right stereos every day.

How do I choose one from the crowd?

With so many in-dash stereos to choose from, how do you pick the right one? This shopping guide will help you get started, and remember — our Sales Advisors are available toll-free at 1-800-555-9430 if you have any questions.

76 more car stereos at crutchfield.com

Where does the CD go?

We get this question all the time. Many stereos hide the CD slot behind the face, which protects the mechanism from dirt and grime. It also frees up space on the face for a larger display and better control layout.

How can I connect my iPod®?

- Available for most stereo brands, an iPod control adapter lets you access the iPod's functions from your stereo's faceplate.
- A stereo with an auxiliary input lets you listen to an iPod or any other external music source through your car's audio system.

For more info about adding your iPod to your car stereo, see pg. 18.

Why should I consider a high-end display?

Enhanced graphics with smoother text make it easier to read the display, and to see it in bright sunlight. They can also show you more information — up to three lines, in some cases. This can make it easier to see song text and make adjustments to the stereo.

Why should I consider stepping up to a more expensive stereo?

As good as lower-priced stereos can be, many people are attracted to the improved performance and great features of high-end stereos.

- **Better sound.** Higher-priced stereos often have upgraded power supplies, improved processors, and more flexible fine tuning.
- **Easier to use.** Upgrades like touchscreen controls or multi-function control knobs can make it easier to operate the stereo.
- **Cool features.** For example, you could put your own photos on the display, or maybe gain a USB connection for your portable. A select few even let you download navigation maps.

Which stereos will fit my car?

This is a very important question. Visit crutchfield.com/whatfits or call 1-800-555-9430, and we'll answer it for you. We can also tell you if there are any special issues with your vehicle regarding stereo size or adapting a new stereo to your factory electronics.

What about the installation?

We can help you install your new stereo yourself (see pgs. 14-15). Or, add an InstallCard to your order and have your stereo installed by a qualified professional at a shop in your area. You can get more information at crutchfield.com/install.

For more advice and helpful tips on selecting a new stereo, read our full in-dash stereo shopping guide: crutchfield.com/carstereoguide

More details on our website

Consider the above points as you look over the next 16 pages of car stereos. For more detailed information about any of the stereos, visit crutchfield.com. You'll also find close up photos, and custom comparison charts for easier shopping.

Want more options?

Consider an in-dash DVD receiver (pgs. 37-41). Besides playing DVDs, they have better displays, touchscreen controls, and more connection options, including GPS navigation systems.

Make the right choice when shopping for a new car stereo

How we help you shop for new gear

- **Find out what fits your car**
  For easier shopping, our online Car Selector lets you choose from only the gear that fits your car. Give it a try at crutchfield.com/whatfits.

- **Our comparison charts save you time**
  You'll find plenty of handy information in the car stereo comparison charts on pages 22 and 23.
  On our website, you can select the models that interest you and get a side-by-side look at their key features.

- **Learn before you buy**
  By reading our website, you can get a well-informed opinion of the products we carry. We present detailed information about each item. Plus, we post helpful product reviews linked right from the product's web page. The reviews are either professional reviews by us, or comments submitted by other consumers. This feedback can help you gain a real-world perspective on the product.
  We also have a library of hundreds of informative articles on our website. You can get realistic expectations about how your car stereo, or any other gear we sell, will perform. Our aim is to make you more comfortable with your shopping experience.

- **Questions?**
  Our Sales Advisors are the best in the business. They know the products and they're here to help you find the car stereo that's right for you. You can call them at 1-800-555-9430, or contact them via online chat or e-mail.

Why give someone a new car stereo from Crutchfield?

- **A car stereo is something they'll use and enjoy every day**
  These days, many people spend a lot of time in their cars. A nice stereo can make a big difference in how enjoyable that time is. Whether the person listens to music, news, sports, an audiobook, or a new podcast, they'll never forget how they got the stereo.

- **They can try it out in their car for 30 days**
  Choosing a stereo for someone else can be tough, and we understand that. The best way to know if it's right for your loved one is for them to install the stereo in their car and start playing with it. If it's not quite right, they can send it back to us and try something else. We'll even pay for the return shipping.

- **We include the installation accessories they'll need**
  With any purchase of car audio gear from Crutchfield, we'll send detailed custom installation instructions for their vehicle. If the car stereo is priced at $129.99 or higher, we'll also include free installation hardware — a custom mounting kit and wiring harness (see pg. 14).

- **What if the person you're giving the stereo to is not a "do it yourselfer"?**
  If you think they'd prefer professional installation, add an InstallCard to your order. Your gift recipient can have the new gear installed by a professional car stereo installer at a shop in their area. Call 1-800-555-9430 or visit us online at crutchfield.com/installcard for details and prices.

Custom Car Center

Need gift ideas? Check out other people's stereo systems.

Crutchfield's Car Showroom is the place to see some of the most exciting mobile A/V systems on the road. You'll see serious show cars that feature intensive modifications and jaw-dropping competition set-ups, along with customer systems that range from simple upgrades to complete overhauls.

And you can join the fun. Tell us about your system and submit your photos, and we'll add your vehicle to the list. Whether you have something simple or something out of the ordinary, we want to hear about it. Come on into the Showroom at crutchfield.com/showcar.

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75.

Brian can help you install your car stereo.
Toll-free tech support for the life of your gear.

Two ways to find the stereos that fit

1. Call 1-800-555-9430 Ask your Sales Advisor for the appropriate size code (see below) and installation depth for your vehicle.

Size codes: I, J, E, CG, DD Size codes are listed in each stereo's "Details" section and help you quickly identify which ones will fit in your vehicle.

2. Visit crutchfield.com Click on "Find What Fits My Car" to create a list of stereos that fit your vehicle. Then sort your options by price, brand, or features to narrow your search.

Install your stereo with confidence

Crutchfield has taken the guesswork out of car stereo installation by carefully documenting the installation process for over 10,500 vehicles (so far).

Available for most, but not all vehicles, these exclusive MasterSheets™ installation guides are free with your car audio purchase. They're specific to your car, showing you the location of every screw and wire involved. See page 14.

† Auxiliary input adapter is free for a limited time. **after mail-in rebate * Prices refer to optional equipment needed to use these functions; optional aux inputs are rear-mounted

What's in the chart?

Installation depth: How deep the stereo is; this tells you how much room you need behind the dash. Call a Sales Advisor to get the depth of your dash.

Auxiliary input: A connection on the stereo that lets you plug in an external listening source.

Controls: Many stereos let you connect and control external equipment, like a CD changer, satellite radio or iPod® adapter.

- **Satellite radio controls:** Most stereos give you direct control of a hideaway XM or SIRIUS satellite radio. Song text is displayed on the stereo.
- **iPod controls:** Add an optional adapter to control your iPod with your in-dash stereo.

Music formats: Most car stereos can play MP3 files you've burned to disc. Many can also play WMA or AAC files.

RMS power vs. peak power: RMS power is the amount of power a stereo can produce continuously. Peak power is the maximum power a stereo can supply during a brief musical burst. The RMS rating is more important.

CEA compliant: These car stereos have power ratings that are in accordance with the Consumer Electronics Association's (CEA) voluntary power rating standards. That means the manufacturer has met strict testing guidelines to realistically represent the internal amp's power.

Preamp outputs: Connectors on the rear of a stereo that let you use RCA patch cables to send signal to one or more external amplifiers.

Preamp output voltage: The preamp output rating. Higher preamp output voltage can mean better sound from your external amplifier(s).

FM mono sensitivity: How well a stereo can pick up FM radio signals. The smaller the number, the better the reception will be.

Signal-to-noise ratio: A measure of how well a CD player silences background noise. Higher ratings indicate less noise.

See page 20 for our in-dash stereo shopping guide.

Alpine • CDE-9842 *"Bass Engine®" sound controls*

The CDE-9842 CD receiver lets you master your music using Alpine's Bass Engine control system. With Bass Engine, you can choose which bass and treble frequencies to adjust, control the bass level settings for your subwoofer, and more. On top of that, the CDE-9842 offers a loudness control for fuller sound. The Source Tone Memory feature lets you assign different tone settings for each of your music sources. That means you don't have to deal with adjusting the volume when you switch from CD to radio.

Details: detachable face • Bass Engine sound controls • 16 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 22 for specifications.

#500CDE9842 $129.99

Alpine • CDE-9846 *Add MP3 playback to your options*

Take your MP3 collection on the road with Alpine's CDE-9846 CD/MP3 receiver. Its QuickSearch™ function lets you scroll through your titles with ease, while the MP3 text display shows off artist names and track information. You can fit up to 10 hours of music on one CD-R or CD-RW disc, so you won't have to fumble between CDs while you're on the go. Performance-wise, the CDE-9846 features a powerful built-in amplifier for clear sound and Alpine's Bass Engine sound-shaping system.

Details: detachable face • MP3 playback • Bass Engine sound controls • 16 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 22 for specifications.

#500CDE9846 $149.99

Alpine • CDE-9852 *iPod® interface — just add the cable*

The CDE-9852 CD receiver lets you control your iPod via Alpine's built-in "Full Speed" interface. Just add the optional connecting cable shown below (#500KCE422i, $30), and you'll get fast, complete access to your iPod tunes. The MP3 text display shows off your track information. Bring along your MP3 and WMA discs, too, and browse through your files on the fly with Alpine's QuickSearch buttons.

Details: detachable face • MP3/WMA playback • iPod ready (requires KCE-422i adapter) • Bass Engine sound controls • optional remote control • 16 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 22 for specifications.

#500CDE9852 $179.99

"Do it yourself" doesn't have to mean doing it on your own

When we say that we're here to help, we mean it. Crutchfield customers enjoy a one-of-a-kind convenience — a highly-trained technical staff that's available 16 hours a day, seven days a week. And they're just a toll-free phone call away.

Our call centers are only closed two days a year. Christmas Day is one of them, but we'll be back on the 26th and ready to help you with that new gear.

With an Alpine stereo, you can create the car audio system *you* want

How does Alpine do it?

Many of Alpine's stereos — those with "CDA" in the model name — feature the Ai-Net connection protocol. That means that you can connect another piece of Alpine equipment (like the options listed at the right) to the stereo and have full control. Everything works together seamlessly.

Alpine • KCE-422i *Fast, full iPod® control*

Most of Alpine's 2006 line of in-dash stereos integrate iPod control into the stereo itself, for faster and more complete control than most other iPod adapters on the market. Just add this cable so you can connect your iPod and get total control of, and total access to, your playlists and songs. iPod not included.

#500KCE422I $29.99

Customize your Alpine system with these helpful add-ons

Bluetooth® interface module — Use your compatible Alpine stereo to talk hands-free on your cell phone (the phone must have Bluetooth capability).

#500KCA1BT $199.99

USB adapter — Access the tunes stored on your USB device using your 2006 Alpine's controls.

#500KCA620M $149.99

Auxiliary input adapter — Connect any portable music source to your compatible Alpine stereo.

#500KCA121B $15.99

Multi-source switcher — If you want it all, this versatile piece lets you add two of the items listed above and has two auxiliary inputs.

#500KCA410C $149.99

Alpine • CDA-9857 *Two lines of song text make this stereo the perfect choice for adding an iPod®*

Bring the striking style and readability of Alpine's BioLite™ display technology to your dash with the CDA-9857 CD receiver. The clean BioLite display is easy to read in just about any light and offers plenty of space for your song and system information.

The CDA-9857 plays MP3s and WMAs that you've burned to disc. Alpine's QuickSearch™ function makes searching through them easy and intuitive.

The high-performance show doesn't stop there. A powerful, built-in amplifier ensures crisp reproduction from your speakers, while Alpine's Bass Engine gives you sound-shaping control. BBE® processing fills out the high and low frequencies for better sound from your compressed music files, like MP3s. An auxiliary input and three sets of preamp outputs provide connections for adding other components to your system.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: detachable face • MP3/WMA playback • controls for iPod (requires adapter, $30) and HD Radio tuner ($250) • Bass Engine • BBE processing • auxiliary input • remote control • 18 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 22 for specs.

#500CDA9857 $349.99

Alpine • Package deal *Get an entire Alpine car audio system and save $60*

As a follow-up to last year's popular "1K System" package, Alpine presents their "System of the Gods" package. Upgrade your mobile audio gear with a premium sound system from Alpine. This killer package includes Alpine's best sellers:

SAT RADIO READY Add SIRIUS or XM, pg. 16

CD Receiver Details: detachable face • plays MP3/WMA discs • satellite radio and iPod ready • Bass Engine • optional aux input • optional remote • 18 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, pg. 22.

CDA-9856 *CD receiver*

Not only will the CDA-9856 CD receiver play your MP3- and WMA-loaded discs, the "Full Speed" iPod feature lets you access and play the music stored on your iPod from the Alpine's faceplate (requires the KCE-422i cable, included). Expand your listening choices by adding an optional satellite radio or auxiliary input.

Bass Engine sound shaping gives you control over the stereo's audio performance, and even lets you adjust your subwoofer's level. Built-in BBE processing ensures clearer highs and more full-bodied sound. *(#500CDA9856, $199.99)*

KCE-422i *iPod connecting cable*

This cable gives you fast control of, and total access to, your playlists and songs. *(#500KCE422i, $29.99)*

Two pairs of SPS-17C2 *6½" speakers*

You'll want to crank up the volume when you hear how terrific these speakers sound. The silk dome tweeters furnish high notes that are clear, smooth, and comfortable to the ears. The bass response is full, strong, and accurate. See pg. 50. *(#500SPS17C2; $99.99 per pair)*

#700ALPSYS ALPINE PACKAGE PRICE **$699.99** *Offer valid 10/01/06 - 12/31/06*

MRP-M450 *220 x 1 amplifier*

The MRP-M450 V-Power amplifier drives your sub with the sound and quality that made Alpine famous. A highly efficient power supply provides fast response, and the case's design dissipates heat that can rob your amp of power. A low-pass filter and variable bass boost give you control over the output. See pg. 67. *(#500MRPM450, $199.99)*

SWS-1042D *10" subwoofer*

Put that amplifier to work with this perfectly matched sub-woofer. The 10" dual voice coil subwoofer will deliver deep low notes that sound good, whether you want subtle bass or a booming thump. *(#500SWS1042, $129.99)*

Lee can help you install your car stereo.
Toll-free tech support for the life of your gear.

Kenwood • KDC-132 *CD receiver*

Time for an audio upgrade? The KDC-132 CD receiver delivers with useful features and classic Kenwood performance. A powerful onboard amp fills your car with clean sound, plus you get a set of preamp outputs for connecting an external amp or powered subwoofer. System Q sound controls give you treble, bass, and midrange adjustments along with six preset tone curves to customize the audio performance. So give your factory stereo the heave-ho and move up to Kenwood.

Details: detachable face • System Q 3-band equalizer • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 22 for specs.

#113KDC132 ~~$99.99~~ **PRICE BREAK $79.99**

Kenwood • KDC-MP232 *Plays MP3 and WMA files*

MP3 and WMA playback means the KDC-MP232 can serve as your in-dash jukebox. And with Kenwood's iPod® interface ($49.99) or an optional satellite radio, you can listen to just about anything you want to.

With all of that music at hand, it's a good thing Kenwood includes a full-function remote control for easy access. If you want to add more power or bass, you'll appreciate the KDC-MP232's set of preamp outputs.

SAT RADIO READY **Add SIRIUS or XM for $100, pg. 16**

Details: detachable face • MP3/WMA playback • 3-band EQ • 22 watts RMS x 4 • remote control • warranty: 1 year • size I, J & E • specs, pg. 22.

#113MP232 ~~$129.99~~ **PRICE BREAK $109.99**

Kenwood • KDC-MP2032 *Free installation accessories*

Free Kenwood aux-in adapter $20 value; limited time offer.

The KDC-MP2032 CD receiver uses a high-powered amplifier to drive clean, clear sound to your speakers. And if you want to add external amps, you'll have two sets of preamp outputs to work with, for greater flexibility in creating your system. For a limited time, you'll get free vehicle-specific installation hardware — normally only free with stereos priced $129.99 or more (pg. 14). You'll also get Kenwood's optional aux input, for connecting your portable player.

Details: detachable face • 3-band EQ • MP3/WMA playback • remote • 22 watts RMS x 4 • warr.: 1 yr. • size I, J & E • specs, pg. 22.

#113MP2032 ~~$139.99~~ **PRICE BREAK $119.99**

Kenwood • KDC-MP332 *Plays AAC music files*

In addition to MP3 and WMA music files, the KDC-MP332 CD receiver will play the AAC music file format, too. Kenwood's "Supreme" audio processing creates better high-frequency response for improved all-around sound from those compressed music files.

SAT RADIO READY **Add SIRIUS or XM for $100, pg. 16**

Details: detachable face • System Q 3-band EQ • plays MP3, WMA, and AAC files (except Digital Rights-protected files) • remote control • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • (KDC-MP532U adds a USB input) • specs, pg. 22.

#113MP332 $149.99 **Add Kenwood speakers and save $50***

• KDC-MP532U *USB connection for your portable player*

The KDC-MP532U CD/MP3 receiver (pictured) adds a USB input for your USB-capable music device (will not work with iPods).

#113MP532 $179.99 **Add Kenwood speakers and save $50***

Kenwood • KDC-MP4032 *Sound-focusing filters and a third set of preamp outputs*

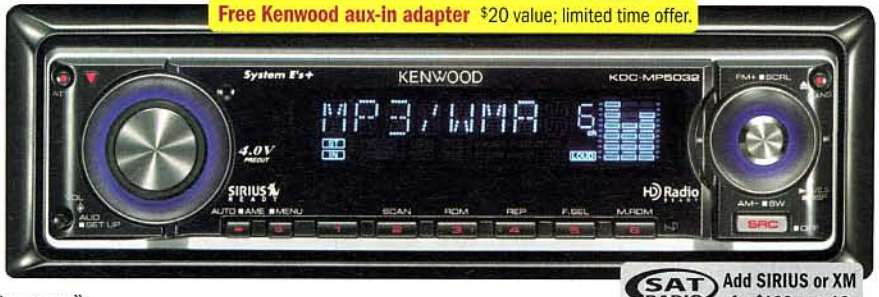
Upgrade your car audio system with the KDC-MP4032 CD receiver from Kenwood. It features "System E's+" high- and low-pass filters that let you optimize the stereo's output to match your speakers. The result is that your speakers work more efficiently and produce cleaner sound. Plus, a third set of preamp outputs gives you a dedicated subwoofer channel, making it easier to route signal to outboard amps.

The stereo has a snazzy, fluorescent display and a faceplate that flips down to accept your discs. Kenwood's "Supreme" audio processing breathes new life into MP3 and WMA music files for more realistic lows and highs. You can customize the sound with one of System Q's six preset tone curves or its 3-band equalizer.

Details: detachable face • System Q 3-band equalizer • plays MP3, WMA, and AAC files (except Digital Rights-protected files) • remote control • 22 watts RMS x 4 • warranty: 1 year • (KDC-MP5032 adds a motorized face and dual-zone controls) • size I, J & E • see pg. 22 for specs.

#113MP4032 $159.99 **Add Kenwood speakers and save $50***

Free Kenwood aux-in adapter $20 value; limited time offer.



SAT RADIO READY **Add SIRIUS or XM for $100, pg. 16**

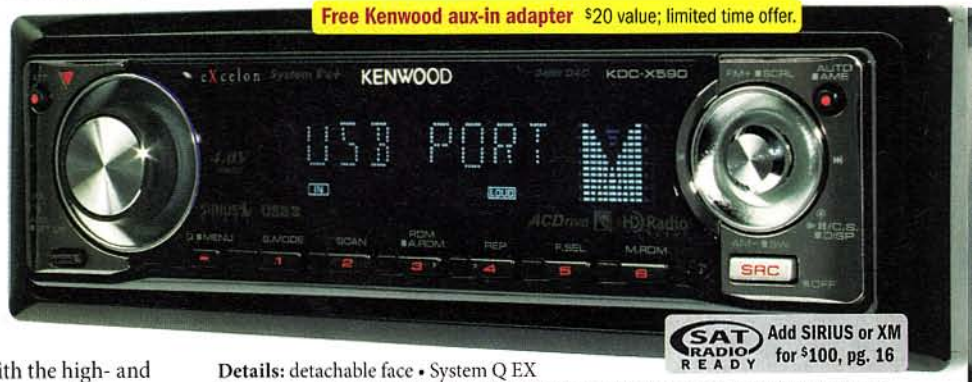
• KDC-MP5032 *Adds a motorized face*

The KDC-MP5032 CD/MP3 receiver (pictured) has everything you'll find on the KDC-MP4032, plus Kenwood's "Auto Slide" motorized face. You'll be surprised at how convenient the motorized action is for day-to-day use. Plus, you can select from three different angles for the face, to maximize visibility. With the free auxiliary input adapter, you can use the stereo's dual-zone controls to play one source on the front speakers and another over the rear speakers.

#113MP5032 $199.99 **Add Kenwood speakers and save $50***

Kenwood Excelon • KDC-X590 *Premium sound quality and a USB input that works with your iPod®*

Free Kenwood aux-in adapter $20 value; limited time offer.



SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

The Kenwood Excelon KDC-X590 CD receiver gives you outstanding audio performance and nearly endless playback variety. Its powerful built-in amplifier and premium digital-to-analog converter deliver crystal-clear sound for all of your tunes.

The stereo will play just about anything you throw at it. A USB input lets you connect and control a USB-capable music player, including your iPod. The ACDrive's voice prompts make it easy to navigate through the iPod's playlists, plus your discs full of MP3 and WMA files. The free auxiliary input lets you add the music from your other gear.

A 3-band parametric equalizer offers adjustment of the bass, midrange, and treble settings. You can adjust the frequencies going to your various speakers with the high- and low-pass filters. The result — you'll get optimum performance from your system. Three sets of preamp outputs make it easy to connect your external amps and subs. And it's reassuring to know that Kenwood Excelon stereos have a 2-year warranty.

Details: detachable face • System Q EX 3-band equalizer • MP3, WMA, & AAC playback (except Digital Rights-protected files, such as those purchased from the iTunes® store) • USB input (controls iPod) • remote control • 22 watts RMS x 4 • warranty: 2 years • size I, J & E • specs, pg. 23.

#113KDCX590 $229.99 Add Kenwood speakers and save $50*

Kenwood Excelon • KDC-X790 *Full-color display*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

The KDC-X790 includes a Graphic Motion Analyzer car performance computer and ACDrive in one neat package. The performance computer gives you a graphical representation of your car's performance specs, like acceleration and cornering G-forces. ACDrive's voice prompts guide you through song folders on MP3 discs or digital devices.

Details: motorized, detachable face • System Q EX 3-band EQ • plays MP3, WMA, and AAC files (except Digital Rights-protected files) • auxiliary input • car performance computer • remote • 22 watts RMS x 4 • warranty: 2 yrs. • (KDC-X890 adds a USB input — compatible with iPod) • size I, J & E • see pg. 23 for specs.

• KDC-X890 *This one is iPod compatible, right out of the box*

Connect an iPod or other music player to the KDC-X890's (pictured) USB input.

#113KDCX890 $429.99 Add Kenwood speakers and save $50*

Kenwood Excelon • DPX-701 *Double-sized stereo*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

The DPX-701 is a double-sized CD/MP3 receiver that'll play WMA and AAC files too. The 64-color display shows off your song titles, and tracks your car's performance with the help of the "Graphic Motion Analyzer." You can choose from five different performance measurements — like torque, horsepower, G-force, or a stopwatch function. The three sets of strong, 5-volt preamp outputs will send a clean signal to your amplifiers.

Details: System Q-EX 3-band equalizer • MP3/WMA/AAC playback (except Digital Rights-protected files) • ACDrive • USB (controls iPod) and auxiliary inputs • remote control • 22 watts RMS x 4 • warranty: 2 years • size DD • specs, pg. 23.

#113DPX701 $449.99 Add Kenwood speakers and save $50*

***Save $50** Purchase a Kenwood in-dash car stereo priced $149.99 or higher and two pairs of Kenwood car speakers on the same order, and get a $50 savings instantly. Offer good 11/01/06 - 12/31/06. Call 1-800-555-9430 for more info.

Kenwood Excelon • KDC-X990 *Better sights and sounds*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Kenwood's KDC-X990 treats you to the best of their car stereo options. A brilliant, full-color display renders clear, exciting animations and easy-to-read text. Kenwood's SRS® WOW feature steps up the sound. It has three settings that bring out the bass in your music and create a convincing, 3-dimensional musical image — especially effective for making your compressed music (like MP3 files) sound full-bodied and lively.

Details: motorized, detachable face • OEL display • System Q EX 4-band equalizer • plays MP3, WMA, and AAC files (except Digital Rights-protected files) • ACDrive • auxiliary input • car performance computer • remote control • 22 watts RMS x 4 • warranty: 2 years • size I, J & E • see pg. 23 for specifications.

#113KDCX990 $579.99 Add Kenwood speakers and save $50*

Don't forget the speakers

If you're still listening to factory speakers, then you're not going to hear everything you're paying for in a new stereo.

New, aftermarket speakers deliver more details from your music.

Kenwood KFC-1690ie, pg. 51.

Everything you need We'll help you pick the key accessories.

A new stereo is only the beginning of your car audio system. It's easy to add to your listening options. Here are some popular ideas:

- **iPod adapter** — play and control your iPod through your stereo.
- **Auxiliary input adapter** — listen to any music source you want through your new stereo.
- **CD changer** — keep your favorite discs ready to play.

Pioneer • DEH-1800 *No frills, but great sound*

The DEH-1800 CD receiver delivers lots of power, sleek styling, and a detachable faceplate — all for just $100. Pioneer's famous Supertuner IIID AM/FM tuner uses digital processing to lock onto stations and give you more spacious stereo sound than standard analog tuners. You get a 3-band equalizer to customize the sound, plus six preset tone curves for quick adjustments.

Details: detachable face • Easy EQ 3-band EQ • 22 watts RMS x 4 • warranty: 1 year • (DEH-2800MP adds MP3/WMA playback) • size I, J & E • see pg. 23 for specs.

#130DEH1800 $99.99

• DEH-2800MP *Plays MP3 and WMA tunes on disc*

The DEH-2800MP (pictured) plays MP3 and WMA discs with high-speed access to your folders and files.

#130DEH2800 $119.99

Pioneer • DEH-P3800MP *Versatile CD/MP3 player*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Anchor your mobile entertainment system with the versatile, easy-to-use DEH-P3800MP. It puts MP3 and WMA playback, satellite radio controls, and optional iPod® integration (adapter required, $50) at your fingertips. A rotary volume control lets you make quick adjustments. Your music will sound great, thanks to the strong onboard amp. If you need more power, just use the two sets of preamp outputs to add an external amp or a powered sub.

Details: detachable face • Easy EQ 3-band EQ • MP3/WMA playback • remote • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, page 23.

#130DEHP380 $129.99

Pioneer • DEH-P4800MP *Stylish, fold-down face, and an auxiliary input for system expansion*

Bring some style to your dash with the Pioneer DEH-P4800MP CD/MP3 receiver (pictured). Its fold-down face features a big, bright LCD with a clean design that's easy to see, even in bright sunlight. A big volume knob makes adjustments easy.

You've got lots of entertainment options with this stereo. Not only will it play your MP3- and WMA-loaded discs, its auxiliary input lets you connect a portable audio player. To improve the sound, you get high- and low-pass filters, plus a 3-band EQ. If you want more thump from your system, use the stereo's three sets of preamp outputs to connect external amps.

Details: detachable face • Easy EQ 3-band equalizer • MP3/WMA playback • works with Pioneer's iPod adapter ($50) • aux input • remote control • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, pg. 23.

#130DEHP480 $149.99

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

• DEH-P5800MP *3-D animated display*

The DEH-P5800MP CD receiver's striking "OEL" display (photo at right) adds full-motion animations and 3-D graphics to your dash. It provides day-and-night legibility and plenty of real estate for your song information. The button lighting is red instead of green, and there's no auxiliary input.

#130DEHP580 $199.99

Pioneer • DEH-P6800MP *Optional iPod control*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Pioneer's DEH-P6800MP CD/MP3 receiver lets you take your iPod on the road — connect Pioneer's optional adapter ($50) and plug it right in. The 7-way Rotary Commander (the big knob) fills in for the iPod's Click Wheel, while artist names, track info, and menus show up on the stereo's animated display. Three lines of text make file and folder navigation a breeze.

Details: motorized, detachable face • Easy EQ 7-band equalizer • plays MP3, WMA, AAC files (except Digital Rights-protected files) • auxiliary input • remote • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • see page 23 for specs.

#130DEHP680 $259.99

Pioneer • DEH-P47DH *GM/Chrysler-fit CD player*

The DEH-P47DH is the perfect size for a snug fit in many GM or Chrysler dash openings. (Visit crutchfield.com/whatfits or call to see if it'll fit yours.) The oversized face has a large volume control, big buttons, and a multicolor display.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: detachable face • Easy EQ 3-band equalizer • 22 watts RMS x 4 • works with Pioneer's iPod adapter ($50) • one set of preamp outputs • warranty: 1 year • (DEH-P77DH has three sets of preamp outputs • 4-volt preamp output voltage • remote control) • size CG • see page 23 for specifications.

#130DEHP47D $249.99

• DEH-P77DH *Adds a remote control and more outputs*

The DEH-P77DH (pictured) gives you three sets of preamp outputs for more system-building flexibility. A handy remote control rounds out the package.

#130DEHP77D $299.99

Pioneer • DEH-P7800MP *Get a beautiful, full-color display and an outstanding set of audio control tools*

With its striking, full-color display and array of entertainment options, the DEH-P7800MP CD/MP3 receiver offers a lot to get excited about. You can customize the "Organic EL" display with your own photos. Press a button and the motorized faceplate slides down to reveal the CD slot. MP3 and WMA playback let you listen to your favorite song mixes, and the DEH-P7800MP can even handle the AAC files you've ripped from your discs.

The DEH-P7800MP's "Auditory User Interface" lets you keep tabs on the stereo without taking your eyes from the road. Four different alert sounds let you know what the stereo's doing, making driving safer and adjustments more convenient.

Want hands-on control? Pioneer's Easy EQ gives you a 16-band equalizer for fine tuning the sound, while the stereo's digital sound processor and time alignment feature let you match the system to your car's acoustics.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: motorized detachable face • Easy EQ 16-band equalizer • plays MP3, WMA, AAC files (except Digital Rights-protected files) • works with Pioneer's iPod adapter ($50) • auxiliary input • remote control • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 23 for specifications.

#130DEHP780 ~~$419.99~~ *Call for price 1-800-555-9430*

Pioneer • DEH-P9800BT *Bluetooth® wireless technology for hands-free calling*

Today's car stereos can be about more than just music. The Pioneer DEH-P9800BT is packed with all the high-end audio features you'd expect from Pioneer — like MP3, WMA, and AAC file playback, digital sound processing, and a 16-band equalizer. But this stereo also comes with a built-in Bluetooth wireless receiver — so you can use your compatible cell phone hands-free without installing any extra gear.

One quick setup ensures that the stereo will always recognize your phone automatically. Then use the included microphone to ask the DEH-P9800BT to dial numbers for you, while Auto Answering lets you pick up calls without taking your hands off the wheel. Download your phone book into the stereo so you can scroll through and search contacts right from the dash.

To expand your musical offerings, add Pioneer's optional adapter ($49.99) to control and charge your iPod®. The stereo can also handle a satellite radio or CD changer, and has an aux input for other portable devices.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: motorized, detachable face • Bluetooth wireless cell phone reception • Easy EQ 16-band equalizer • plays MP3, WMA, AAC files (except Digital Rights-protected files) • works with Pioneer's iPod adapter ($50) • auxiliary input • remote • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, pg. 23.

#130DEHP980 ~~$549.99~~ *Call for price 1-800-555-9430*

Sanyo • FXCD-550 *Plays your CDs and cassettes*

With both CD and cassette playback in one standard-size stereo, Sanyo's FXCD-550 lets you listen to both types of recordings without having to install extra gear (like a CD changer) or give up on a favorite old format.

The strong internal amp delivers your tunes with authority, while two sets of preamp outputs make it easy to connect external amplifiers when building a larger system. The electronic tape section has playback features like Automatic Music Search, which makes it easier to jump from song to song. The 40-second skip protection on the CD section ensures smooth playback. Bassxpander has two settings to help enhance your sound. So bring your tapes *and* your discs — the FXCD-550 is ready to play.

Details: detachable face • full-logic electronic tape mechanism • 20 watts RMS x 4 • warranty: 1 year • size I, J & E • see page 23 for specifications.

#140FXCD550 $269.99

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75.

Cris can help you install your car stereo.
Toll-free tech support for the life of your gear.

New Sony Xplōd • CDX-GT110 *Front-panel audio input*

Replace your factory stereo with Sony's CDX-GT110 CD receiver. You can connect your portable music player to the front-panel input, and listen to your playlists through the car stereo. There's plenty of power to make the music sound good, and you can tweak the sound with the loudness function and six tone settings.

Details: detachable face • 6 EQ Lite preset tone curves • front-panel auxiliary input • 16 watts RMS x 4 • warranty: 1 year • (CDX-GT210 plays MP3 and WMA files and has 17 watts RMS) • size I, J & E • see pg. 23 for specifications.

#158GT110 $79.99

New • CDX-GT210 *Adds MP3/WMA playback*

The CDX-GT210 (pictured) plays your MP3 and WMA music files from disc, and scrolls the song titles across the display.

#158GT210 $99.99

New Sony Xplōd • CDX-GT310 *3-band equalizer*

Take charge of your audio system with the CDX-GT310 CD receiver's sound controls. The 3-band equalizer lets you tune in the kind of sound you like and bring out the best in your music. There's an auxiliary input on the front, and you can add Sony's optional iPod® adapter ($49.99). It gives you full control of your iPod and scrolls song text across the stereo's display.

SAT RADIO READY Add SIRIUS or XM, see pg. 16

Details: detachable face • EQ3 3-band equalizer • plays MP3 and WMA files • front auxiliary input • optional iPod adapter ($49.99) • remote control • 17 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 23 for specifications.

#158GT310 $119.99

New Sony Xplōd • CDX-GT510 *This Sony CD/MP3 receiver can even handle music files in AAC format*

If you use iTunes® as your music software, Sony has some good news for you. The CDX-GT510 CD receiver adds AAC files to the list of music formats that you can play from CD. It won't play songs bought from iTunes music store (those are rights-protected), but it'll play the songs you've ripped from regular CDs and stored on your computer in the high-quality AAC format. It also plays MP3, WMA, and Sony's own ATRAC3plus music files.

Besides song-laden discs, you can also play music from your portable audio player — just connect it to the miniplug input on the stereo's faceplate. You can also add satellite radio or an iPod adapter to further expand your music selections.

This stereo is packed with other features, too: a flip-down faceplate with a large, easy-to-see display, a 3-band equalizer for fine tuning, and two sets of preamp outputs. DSO (Dynamic Soundstage Organizer) is great if your front speakers are mounted near the floor. It raises the music so that it sounds like it's all around you instead of pointed at your feet.

SAT RADIO READY Add SIRIUS or XM, see pg. 16

Details: detachable face • EQ3 3-band equalizer • MP3/WMA/AAC/ATRAC3plus playback • auxiliary input • optional iPod adapter ($49.99) • remote control • 17 watts RMS x 4 • warr.: 1 yr. • size I, J & E • specs, pg. 23.

#158GT510 $139.99

Sony Xplōd • CDX-RA700 *Cool looks and incredible sound*

Sony's CDX-RA700 CD/MP3 receiver combines great looks and stellar performance. It has a fluorescent display that adds style to your dash, and sound features that give your tunes depth and clarity. Sony's powerful EQ3 provides three highly adjustable tone controls and seven sound curves for custom sound. The Dynamic Soundstage Organizer and BBE® processing enhance the music, especially MP3 or WMA files. Two sets of preamp outputs are on hand for connecting external amps.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: motorized, detachable face • EQ3 3-band parametric equalizer • MP3/WMA/ATRAC3plus playback • auxiliary input • optional iPod adapter ($49.99) • remote control • 17 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, pg. 23.

#158RA700 $249.99

Sony Xplōd • CDX-GT705DX *Precise sound controls*

The CDX-GT705DX CD/MP3 receiver features Sony's X-DSP digital sound processor — you get all the hands-on tone control you could want. It has a 13-band equalizer, BBE processing, and Dynamic Soundstage Organizer to make your tunes sound more full-bodied, crisp, and life-like. In addition to all of this sound control, you get plenty of power to bring the music to life.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: detachable face • 13-band equalizer • MP3/WMA/ATRAC3plus playback • auxiliary input • optional iPod adapter ($49.99) • remote control • 17 watts RMS x 4 • warranty: 2 years • size I, J & E • see pg. 23 for specifications.

#158GT705DX $279.99

Sony Xplōd • CDX-GT805DX *Motorized faceplate*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Use the CDX-GT805DX CD receiver's motorized face to select the perfect viewing angle for the control panel's bright display. As for sound control, the stereo's audio "tool box" contains a 13-band equalizer for tweaking the sound, BBE® MP to add clarity and depth to your compressed music, like MP3s or satellite radio, and DSO for "lifting" the soundstage.

Details: motorized, detachable face • EQ13 13-band equalizer • MP3/WMA/ATRAC3plus playback • auxiliary input • optional iPod adapter ($49.99) • remote control • 17 watts RMS x 4 • warranty: 2 years • size I, J & E • see pg. 23 for specs.

#158GT805DX $329.99

Sony Xplōd • XR-CA350X *Cassette receiver*

The XR-CA350X cassette receiver breathes new life into your tapes. Seven preset tone curves allow for quick and easy sound adjustments, while the 3-band equalizer helps you fill out the bottom end, add clarity to the mids, or sharpen the highs.

((XM)) SATELLITE RADIO CONTROLLER Add XM for $100, pg. 16

Details: detachable face • 3-band equalizer • 22 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, pg.23.

Cassette player/CD changer package **#700XRCA10D $199.99**

Sony Xplōd • MEX-1GP *Store your music in the stereo — 1GB of internal memory is built right into the faceplate*

Sony's Giga Panel faceplate has 1 gigabyte of flash memory built in, so the MEX-1GP CD receiver is able to store many hours' worth of your favorite music.

All you have to do is connect the faceplate directly to your PC, and you can transfer MP3 and WMA files in a flash. And don't worry if you already have a library of digital music on discs — this CD receiver can handle those, too. It'll play MP3, WMA, and Sony's ATRAC3plus music files.

Plenty of built-in power drives the speakers to make your tunes sound their best. Sony's EQ3 sound shaping offers seven preset tone curves and three tone controls for custom tuning, while the Dynamic Soundstage Organizer feature improves the dull sound of low-mounted car speakers by "lifting" the soundstage up to ear level. Two sets of preamp outputs are on hand for your external amps and subs. You can switch the rear ouputs to subwoofer mode and control the frequency and level of your bass system from the stereo.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: detachable face • EQ3 3-band equalizer • MP3/WMA/ATRAC3plus playback • auxiliary input • optional iPod adapter ($49.99) • remote control • 17 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 23 for specs.

#158MEX1GP $299.99

Download your music files directly into the faceplate.

Sony Xplōd • MEX-BT5000 *CD receiver with Bluetooth® technology for hands-free calling*

The MEX-BT5000 is Sony's first car CD receiver with Bluetooth capability. It links to your Bluetooth mobile phone, letting you make and receive calls hands-free. You'll see your phone book data on the bright, high-visibility screen, while Bluetooth technology allows the wireless transfer of up to 50 phone book contacts to the stereo. Six speed-dial entries let you access frequently dialed numbers quickly. You'll hear your callers over the car's speakers, and talk using the stereo's built-in microphone, so there's nothing extra to install.

The MEX-BT5000 is your gateway to the next generation of wireless music, too. Upcoming music phones and audio players will take advantage of Bluetooth technology to ensure a wireless world free of connecting cables, auxiliary inputs and plugs. With the MEX-BT5000, you'll be primed to incorporate the newest gear. And the stereo offers playback control for essential features, like play and pause, over remote sources so you'll enjoy truly seamless connectivity with new music players.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: detachable face • EQ3 3-band equalizer • MP3/WMA/ATRAC3plus playback • auxiliary input • optional iPod adapter ($49.99) • remote control • 17 watts RMS x 4 • warranty: 2 years • size I, J & E • see pg. 23 for specs.

JVC • KD-HDR1 *Built-in HD Radio tuner, for better sound and more listening options*

JVC's KD-HDR1 CD receiver includes a built-in HD Radio tuner. There's no extra gear to install, no extra wires to worry about, making it easier than ever to upgrade to the improved reception and excellent sound quality of participating HD Radio stations. More and more radio stations offer HD Radio broadcasts every day, but if there's not one in your area yet, JVC's DiAS tuner offers exceptional AM and FM reception.

If you're looking for more entertainment options, connect an XM or SIRIUS radio to get more than 120 channels of music, news, sports, and entertainment. Or hook up your iPod® with JVC's optional interface ($50). Whatever you're listening to, the powerful built-in amplifier will ensure great sound. SRS® Circle Surround® Automotive delivers convincing simulated surround sound from your car's speakers, even from standard stereo CDs.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: detachable face • MP3/WMA playback • iEQ tone curves • SRS Circle Surround • receives HD Radio multicasting content (where available) • works with JVC iPod adapter ($50) • remote • 20 watts RMS x 4 • warr.: 1 year • size I, J & E • specs, pg. 22.

#257KDHDR1 $174.99 after $25 mail-in rebate

Price $199.99 - $25 rebate = $174.99. Stereo must be purchased by 1/14/07 to be eligible for rebate.

Discover the next wave of broadcasting — HD Radio™

HD Radio™ Pure Digital. Clear Radio.

What is HD Radio? HD Radio technology allow broadcasters to transmit a high-quality digital signal, unlike the analog signal we're used to. The benefits of this digital broadcast are clear: FM radio that approaches CD-quality sound, and AM radio that sounds as good as current FM. What's missing? Only the static, crackling, and fading of analog radio.

There's more than great sound. You'll get more programming with HD Radio. Buy an HD Radio receiver with multicasting, and you can tune into the more listening options offered by many stations. Stations broadcasting HD Radio signals often broadcast news and music channels simultaneously, so you have more choices in what you listen to. You'll also be able to read song title or artist name info on your radio's display. And best of all, there's no subscription to sign up for. Like the stations you listen to now, HD Radio programming is free.

How do I get HD Radio? Installing a new stereo with a built-in tuner, like the JVC KD-HDR1 (above), is the easiest way to tap into the new world of HD Radio. Or add a special tuner like Kenwood's KTC-HR100TR (right) which works with compatible Kenwood car stereos.

Save money on HD Radio products. Save $25 to $50 with rebates on HD Radio items. Rebates offer ends on 1/14/07. Call 1-800-555-9430 or go to crutchfield.com for details

JVC • KD-G120 *Sleek, budget-friendly CD receiver*

The silver face-plate of the KD-G120 has clean, flowing lines that'll look right at home in your dash. The stereo drives your speakers with 17 watts of power for clear sound. A set of preamp outputs offers a connection for an external amplifier or a powered sub. And you'll be able to manage your bass right from the front seat with JVC's Super Bass Control feature and subwoofer level control.

Details: detachable face • cEQ tone curves • 17 watts RMS x 4 • warranty: 1 year • (KD-G220 adds MP3/WMA playback) • size I, J & E • see pg. 22 for specifications.

Panasonic • CQ-C5403U *Motorized faceplate*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

The bright, blue display of Panasonic's CQ-C5403U receiver is mounted on a motorized faceplate that folds down with the touch of a button, so you can load up your favorite CD, MP3, or WMA disc and hit the road. But don't limit yourself. Expand the CQ-C5403U by adding satellite radio or Panasonic's iPod® interface cable ($50), and enjoy even more entertainment options. However you choose to use it, the receiver's clean design and rotary knob make it a snap to control. The three sets of high-voltage preamp outputs send powerful signals to external amps.

Details: motorized, detachable face • MP3/WMA playback • 18 watts RMS x 4 • remote control • warranty: 1 year • size I & E • specs, pg. 23.

#133C5403 ~~$189.99~~ SPECIAL PURCHASE **$159.99** get a free $15 iTunes card*

Panasonic • CQ-C7203U *Bright, 3-D animations*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Panasonic's CD CQ-C7203U receiver has some very impressive features, like a powerful amplifier, a 3-D display, and a motorized face with three different viewing angles. Your MP3 and WMA files will sound great, and you'll be able to read artist and song info at a glance on the bright, high-contrast, 2-line display.

And for a limited time, you get Panasonic's optional CA-DC300U iPod interface free with this stereo. It gives you total control of your iPod.

Details: motorized, detachable face • MP3/WMA playback • 3-band EQ • aux input • 18 watts RMS x 4 • remote control • warranty: 2 years • size I & E • specs, pg. 23.

#133C7203 **$199.99** and get a free $25 iTunes gift card*

Free iPod adapter Purchase the Panasonic CQ-C7203U and get Panasonic's iPod control cable free – that's a $50 value. Limited time offer.

Panasonic • CQ-C8803U *Special purchase — save $200 on colorful graphics and powerful amplification*

Anchor your car audio system with the flexible, powerful CQ-C8803U CD/MP3 receiver from Panasonic. You'll enjoy an amplifier that packs an astounding 31 watts per channel, along with some serious hands-on tone controls. And this stereo is hard to beat in the style department — the motorized, fold-down faceplate offers a stunning "Organic EL" display, complete with vibrant colors and over a dozen animated and still-image 3-D graphics.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Panasonic's powerful SQ9 offers a 9-band equalizer and six preset sound curves for precise sonic adjustments. The SRS® Circle Surround® Automotive feature lets you experience a natural sound field anywhere in the vehicle. SRS TruBass® kicks up the lows, while SRS Focus™ electronically "elevates" the speakers for improved stereo imaging.

Got an iPod? Enjoy full control from the stereo with Panasonic's optional iPod interface cable ($50).

Details: motorized, detachable face • MP3/WMA playback • 9-band EQ • works with Panasonic's iPod control cable ($50) • auxiliary input • remote control • 31 watts RMS x 4 • warranty: 1 year • size I & E • see page 23 for specifications.

#133C8803 ~~$499.99~~ SPECIAL PURCHASE **$299.99** and get a free $25 iTunes gift card*

Panasonic • CQ-C8303U *Colorful and versatile*

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

The Panaonic CQ-C8303U CD receiver brings your sound system the best of both worlds: great looks and great performance. Its motorized faceplate comes loaded with a full-color "Organic EL" display for amazing visual depth and detail. You can even add your own images and custom slide shows to the display.

Use the auxiliary input to connect your portable music player. Adjust the sound with the 7-band equalizer. Three sets of preamp outputs make system-building easy, and you get high- and low-pass filters for optimizing the stereo to match your speaker setup. Add Panasonic's optional iPod cable ($50) and get full, fast control of your iPod from the stereo's faceplate.

Details: motorized, detachable face • MP3/WMA playback • 7-band EQ • auxiliary input • remote control • 18 watts RMS x 4 • warranty: 1 yr. • size I & E • specs, pg. 23.

***Free iTunes gift card** Purchase a qualifying stereo and get an iTunes gift card by mail from Panasonic. Offer good through 12/31.

New speakers make all the difference

Your new stereo may look great in the dash, but it won't sound its best if you're playing it through inferior factory speakers.

New aftermarket speakers will improve the entire range of sound, providing lows with punch and highs with shimmering detail and clarity.

Many models (like the Pioneer TS-A1681R speakers on the right) have multiple drivers, so you'll hear all the nuances of your favorite tunes.

Finding speakers that fit your car is easy – just go to crutchfield.com/whatfits, or give our Sales Advisors a call at 1-800-555-9430.

Pioneer TS-A1681R page 52

Trip can help you install your car stereo.
Toll-free tech support for the life of your gear.

New Blaupunkt • Laguna CD36 *Free installation kit*

Liven up the music with the Laguna CD36. Its three preset tone curves let you adjust the sound quickly, and you can kick in the X-Bass boost for fuller sound. Blaupunkt's optional auxiliary input ($12.99) makes it easy to add satellite radio or an MP3 player. And for a limited time, you'll get free vehicle-specific installation hardware — normally only free with stereos priced $129.99 or more (see pg. 14).

Free mounting kit and wiring harness
Limited time offer. Kit/harness info on pg. 14.

Details: detachable face • opt. aux input • remote • 15 watts RMS x 4 • warr.: 1 year • (Bermuda adds MP3 playback, has 18 watts RMS x 4) • size I & E • specs, pg 22.

#023LAGUNA6 $99.99

New • Bermuda MP36 *Plays MP3 discs*

The Bermuda MP36 (pictured) adds MP3 playback and has more power.

Blaupunkt • Monterrey MP35 *$100 savings*

The Monterrey MP35 CD/MP3 receiver has three sets of preamp outputs, including a dedicated subwoofer output for greater flexibility when adding external amplifiers. The stereo's strong internal amp pushes full-bodied sound out of your speakers. The intelligent indexing system makes it easy to find your favorite MP3 tunes while you're on the go. You can customize the appearance with the 4,096 colors of Blaupunkt's Vario Colour display.

Details: detachable face • variable-color display • plays MP3s • optional auxiliary input ($12.99) • remote control • 18 watts RMS x 4 • warranty: 1 year • size E • see page 22 for specifications.

#023MONTERR ~~$199.99~~ SPECIAL PURCHASE $99.99

Blaupunkt • Key West MP36 *Vario Colour display offers over 4000 color choices*

Ride off into the sunset with this sleek CD/MP3 receiver playing the tunes. You can match the Key West MP36's display to your mood by picking a display color from the more than 4,000 options. And you'll control the tunes with the stereo's handy, oversized buttons and conveniently located volume control knob.

Enjoy excellent radio reception (a Blaupunkt hallmark), and playback of MP3 files you've burned to discs. Plus, you can hook up your portable music player if you add the optional aux input ($12.99).

Details: detachable face • MP3/WMA playback • opt. aux input • remote • 18 watts RMS x 4 • warranty: 1 year • (Bahamas adds 3-line display) • size E • specs, pg. 22.

#023KEYW36 $149.99 qualifies for a free cordless screwdriver*

• Bahamas MP46 *Get a 3-line text display*

The Bahama's 3-line, variable-color display (pictured) simplifies navigation through your music files and folders.

#023BAHAMAS $179.99 qualifies for a free cordless screwdriver*

Blaupunkt • St. Louis MP56 *Big display for easy reading, and a USB input for your portable audio player*

Big and bold — the oversized display on Blaupunkt's St. Louis CD/MP3 receiver displays three lines of text for your track and system information. And you can select from more than 4,000 colors to get the perfect background shade on the display.

That's not the motorized, fold-down faceplate's only trick. You can use the USB input to upload your own photos into the display.

You can connect a compatible MP3 player with the USB input, too. You can also play your digital music files that are burned onto CD-R/CD-RW discs, or use the SD card slot for music files and to upload pictures for the screen. Expand your entertainment options even further with the two optional aux inputs ($12.99 each).

Details: motorized, detachable face • MP3/WMA playback • 6-band equalizer • USB input • 2 optional auxiliary inputs • remote control • 25 watts RMS x 4 • warranty: 1 year • (Memphis adds a mulitcolor display) • size E • specs, pg. 22.

#023STLMP56 $299.99 qualifies for a free cordless screwdriver*

More info at **crutchfield.com/memphis**

• Memphis MP66 *Bright and bold multicolor display*

The Memphis (pictured) offers all the audio performance features of the St. Louis with a multicolor display (rather than a single background color), for a look that really stands out in your vehicle's dash.

#023MEMMP66 $499.99 qualifies for a free cordless screwdriver*

***Free Cordless Screwdriver** when you purchase any combination of Blaupunkt brand products totalling $149 or more. The Skil IXO palm-sized cordless screwdriver is a $39.99 value. Limited quantity; offer good while supplies last. Call for details.

Eclipse • CD1000 *CD/MP3 receiver*

Eclipse kicks off its impressive lineup with the CD1000 CD/MP3 player. It has a sleek, two-color display to match your dash, and a powerful onboard amp for clear sound. You can tweak that sound to your liking with six tone curves (five fixed, one customizable). The CD1000 has two sets of preamp outputs for adding external amplifiers and subwoofers. MP3 and WMA compatibility means you can load lots of your favorite music files onto a disc and hit the road.

Details: detachable face • MP3/WMA playback • optional remote control • 18 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 22 for specifications.

#099CD1000 $159.99

Eclipse • CD2000 *Excellent expandability*

With the Eclipse CD2000 CD/MP3 receiver, you'll start building an excellent audio system without dropping a lot of cash. Three sets of preamp outputs send a strong, 5-volt signal to your external amps and subs. Options for iPod®, SIRIUS Satellite Radio, or HD Radio™ make it easy to add to your fun. EQ3 offers three tone curves and a 3-band equalizer for sound shaping. Eclipse's ESN anti-theft function uses a digital "key" to help protect your investment.

SIRIUS READY Add SIRIUS for $100, pg. 16

Details: ESN security (non-detachable face) • GEQ 3-band EQ • plays MP3 files • optional remote • 14 watts RMS x 4 • warranty: 1 year. • size I, J & E • specs, pg. 22.

#099CD2000 $199.99

Eclipse • CD3000 *Downloadable navigation makes your drive easier, while incredible sound makes it more fun*

Get mobile navigation-style directions without a high navigation-system price tag. The CD3000 sports Eclipse's Area Shot feature, with included software that lets you download point-to-point details about your route from Eclipse's website, then load the data into the stereo via a CD-R or -RW disc. The stereo will display direction arrows and text information to guide you to your destination.

Add the optional auxiliary input ($29.99) or Eclipse's optional iPod adapter ($49.99) and hook up your portable player. Three sets of high-voltage preamp outputs offer great signal quality and plenty of connections for external amps.

SIRIUS READY Add SIRIUS for $100, pg. 16

Details: motorized face with ESN security (non-detachable) • GEQ 3-band equalizer • MP3/WMA playback • E-iSERVE • Area Shot • optional remote • 14 watts RMS x 4 • warr.: 1 yr. • (CD4000 adds an auxiliary input, remote) • size I, J & E • specs, pg. 22.

#099CD3000 $249.99

• CD4000 *Step up the style*

The CD4000 CD/MP3 player (pictured) adds a few choice refinements. It starts with a little added color on the display (the red and blue accents). You can add to your listening options with the built-in auxiliary input, plus you get a handy remote control for making adjustments.

#099CD4000 $349.99

Eclipse • CD5000 *Animated display for maps of your route*

SIRIUS READY Add SIRIUS for $100, pg. 16

The CD5000 CD/MP3 receiver has a highly detailed display that enhances the Area Shot mapping system (see the explanation at right). Want more? The stereo plays MP3/WMA discs, has an auxiliary input, and even sports a Memory Stick input for music files or Area Shot maps. Eclipse's digital signal processor and a 7-band EQ give you excellent audio control. Top it all off with an optional iPod adapter ($49.99).

Details: motorized face with ESN security (non-detachable) • 7-band EQ • advanced DSP • MP3/WMA/ATRAC3 playback • E-iSERVE • Area Shot • Memory Stick input • auxiliary input • remote • 14 watts RMS x 4 • warr.: 1 yr. • size I, J & E • specs, pg. 22.

#099CD5000 $549.99

Eclipse's E-iSERVE

This feature lets you use Eclipse's website to customize your stereo's performance to meet your needs.

- Customize your sound settings (CD5000 and CD7000*)
- Use the Area Shot feature to create point-to-point navigation instructions. Download these instructions into the stereo via a CD-R, and they'll guide you on your journey, one turn at a time (CD3000 and up; CD5000 and CD7000 show route maps on the display)
- Customize the animated display (CD5000 and CD7000)
- If you drive a late-model Toyota, you can make your Eclipse stereo compatible with your car's steering-wheel controls — no extra hardware needed, just a download from Eclipse's website (CD3000 and up).

**CD7000 available at crutchfield.com*

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75.

Earl can help you install your car stereo.
Toll-free tech support for the life of your gear.

Dual • XDM6820 *Plays MP3 and WMA discs*

For only $80, the XDM6820 CD receiver gives you MP3 and WMA playback, and has the audio controls and external connections you need — like five tone settings and a set of preamp outputs for adding a powered sub. A powerful internal amplifier coaxes detailed sound from your music.

You can mount the included iPlug™ auxiliary input in just about any handy spot in the front of your car — under the dash or in the center console — then use it to plug in your iPod® or other portable music source.

Details: detachable face • MP3/WMA playback • iPlug auxiliary input • 18 watts RMS x 4 • warranty: 1 year • size I, J & E • see page 22 for specifications.

#070XDM6820 $79.99

Dual • XDM6830 *Motorized face and easy control*

The oversized control knob on Dual's XDM6830 CD/MP3 receiver makes system and volume adjustments a snap, and the stereo's large, bright display will turn heads. Press a button, and the whole faceplate motors down to accept your disc, then glides back up into place. Soft blue illumination lights up the control buttons.

Five preset tone curves make on-the-fly sound adjustments easy, while the loudness setting helps fill out the lows at all volume levels.

Details: motorized, detachable face • MP3/WMA playback • iPlug auxiliary input • remote control • 18 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, pg. 22.

#070XDM6830 $129.99

Dual • XDMR7710 *Stylish look and loads of options*

Slide some style into your dashboard. The faceplate of the XDMR7710 glides down at the touch of a button to reveal the display screen and CD slot, leaving the oversized knob and other controls within easy reach.

((XM)) CONTROLLER Add XM for $50, pg. 16

Connect the XDMR7710 to Dual's optional PlaysForSure® adapter ($49.99), and you can plug in and control many thumb drives or portable MP3 players (sorry, no iPods). With this adapter, you can even record directly to USB thumb drives from the tuner, CD, or auxiliary input.

Details: motorized, detachable face • MP3/WMA playback • iPlug auxiliary input • remote control • 18 watts RMS x 4 • warranty: 1 year • size I, J & E • specs, pg. 22.

#070XDMR771 $199.99

Clarion • DB365USB *USB input on the faceplate*

Plug your USB device into the front panel's handy USB input and give the Clarion DB365USB access to your digital music files. The stereo can handle tunes loaded onto a portable MP3 player or even a thumb drive. The USB input isn't compatible with an iPod, but the stereo also has an auxiliary input located on the rear that you can use to pipe in the tunes from your iPod or other sources. The DB365USB plays MP3 and WMA music on disc, too, so you'll always have plenty to listen to.

Details: detachable face • MP3/WMA playback • USB and auxiliary inputs • remote control • 19 watts RMS x 4 • warranty: 1 year • size I, J & E • see pg. 22 for specs.

#020DB365US ~~$159.99~~ PRICE BREAK $129.99

Clarion • DXZ865MP *Touchscreen controls*

A touch of the finger to the DXZ865MP CD/MP3 receiver's display lets you control all of its functions. The sharp, full-color display makes the stereo look great, too. A high-quality digital-to-analog converter ensures superb sound from your discs and a low-pass filter promises crisp bass. The Anti-Distortion Filter revitalizes the sound from your MP3 and WMA music files. In a nutshell, this stereo is easy to use, looks great, and sounds incredible.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: motorized, detachable face • MP3/WMA playback • 2-band EQ • auxiliary input • remote • 22 watts RMS x 4 • warranty: 2 years • size I, J & E • specs, pg. 22.

#020DXZ865 ~~$549.99~~ SPECIAL PURCHASE $349.99

Clarion • DFZ675MC *Record with the Music Catcher*

The DFZ675MC is one of the hottest-looking double-sized stereos around. The rows of buttons have variable color settings so they'll blend perfectly with your dashboard.

And check out the Music Catcher. Just slide in a CD and press the red button — the Music Catcher will record and store six or more CDs' worth of music in its internal memory, so you can listen to your favorite tunes at any time. An auxiliary input and an SD card slot lets you add other players or music files.

SAT RADIO READY Add SIRIUS or XM for $100, pg. 16

Details: MP3/WMA playback • Digital Z-Enhancer equalizer • SD card slot • aux input • remote • 19 watts RMS x 4 • warranty: 1 year • size DD • specs, pg. 22.

#020DFZ675M $399.99

Mobile Video

SHOPPING GUIDE

Music, movies, and navigation

A mobile video system is made of the three basic building blocks shown below. The fun part comes in putting it all together in the way that suits you and your car best. Whether you're looking for a high-tech surround-sound system with built-in navigation, or an easy-to-install backseat DVD player for the kids, we have what you need. Call us at 1-800-555-9430 or see crutchfield.com/carvideo for our informative articles on mobile video.

Matt, Crutchfield Copywriter
"I spend a lot of time testing out the mobile video products I write about. In-dash DVD players with navigation have really taken off this year because they're incredibly useful, *and* entertaining at the same time."

The building blocks of a mobile video system:

1 A video source such as a DVD player. This can be built into an in-dash player like the model shown here, or mounted separately.

2 An audio component such as wireless headphones or your car's speakers, to hear your music or movies.

3 A screen for displaying the images. It can go in the dash, strapped to the back of a seat (as shown here), in a headrest, or in an overhead console. It can also be custom-mounted.

Getting started: choose your in-dash DVD receiver

An in-dash DVD receiver is the starting point for many mobile video systems. There are three basic types of these receivers available now:

- **A DVD receiver without a built-in screen** gives you two of the three things you need for a video system: source (the DVD player) and sound (by sending the audio to your car's existing speakers). Video outputs let you add screens for your backseat passengers.
- **A DVD receiver with a built-in screen** lets you watch films from the front seat while you're parked, and the screen acts as your system's command center while you drive.* Most in-dash DVD receivers with screens offer touchscreen control, and have outputs for adding additional screens. Some models, like the Alpine IVA-W200 on pg. 40, also have inputs for external navigation systems.
- **A DVD receiver with a built-in screen *and* navigation system** gives you DVD playback plus navigation in one in-dash component. Some models have built-in hard drives that hold the navigation info, while others get their info from included DVD-ROMs.

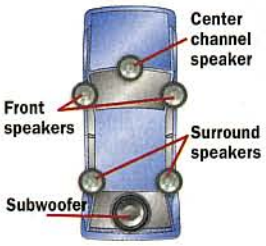
**Note: By law and for safety reasons, you may watch videos on in-dash screens only when the vehicle is parked, with the emergency brake engaged.*

Let your passengers enjoy movies while you drive

If you'd like your backseat passengers to be able to watch movies while you drive, look for an in-dash DVD receiver with "dual-zone mode" (see chart on page 38). This feature lets you load a DVD into the in-dash player, then send the picture and sound to backseat screens and wireless headphones you've connected. At the same time, you can listen to the radio and use your navigation system up front.

Add surround sound for maximum impact

Some in-dash DVD receivers offer DTS® 5.1-channel surround sound or Dolby® Digital, just like in a home theater system. A few models also play DVD-Audio, a high-end surround-sound format for music. To get the most from surround sound, you need the proper speaker setup as shown here. Since most vehicles come equipped with front and rear speakers, this is often just a question of adding a powered center channel speaker and sub. For more info, see crutchfield.com/carsurround.



Audiovox D1020 backseat video system
#220D1020 $299.99

Just want a video system for the back seat?

For a system that looks factory-installed, try a headrest screen package from Vizualogic. It replaces your factory headrests, is simple to install, and matches your vehicle's upholstery perfectly. For something more portable, check out the Audiovox D1020 (shown at left). It can be installed between two front seats, and includes accessories that let you use it indoors, too. For these and other options, see crutchfield.com or call a Sales Advisor at 1-800-555-9430.

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75.

What's in the chart?

Dual-zone mode: Sends picture and sound from one source, usually the DVD player, to a second screen and wireless headphones you've connected. While the DVD plays, you can listen to another source over the car speakers.

Secondary display: A secondary display shows basic system info and provides a basic set of controls for use when the screen is retracted. Sometimes found on size I, J, & E receivers.

5.1-channel decoding: The ability of a stereo to decode and play 5.1-channel surround-sound Dolby® Digital or DTS® soundtracks from DVDs. Often, an optional processor must be connected to finish the decoding. However, some models have built-in decoding. In either case, the proper speaker setup is required: center channel, front left and right, rear left and right, and subwoofer.

Camera input: A dedicated input for a rear-view camera.

Navigation: Some stereos have built-in navigation, indicated by a ✔. Others work with add-on systems, indicated by a price in the chart.

Note: Other features are discussed in our in-dash stereo shopping guide on pgs. 20-21.

JVC • KD-AVX2 *In-dash DVD/CD/DVD-Audio receiver with a 3.5" screen*

The KD-AVX2 gives you options: use it alone for music and video entertainment, or as the centerpiece of a bigger mobile video system. The 3.5" screen built into the faceplate lets you watch DVD videos while you're parked, and load up your own custom images to enjoy any time. With the proper speaker setup you can get real surround sound; the KD-AVX2 features 5.1 Dolby Digital and DTS decoding for movies — just add a powered sub and center-channel speaker. And if you're into music, you'll be glad to hear that the same surround setup will help you enjoy the high-end DVD-Audio format, too.

Details: plays MP3/WMAs • Giga MP3 (plays up to 100 hours of MP3/WMAs recorded on a DVD) • 7-band "iEQ" • A/V output • front, rear, center, and sub preamp outputs • remote • dual-zone mode • size I, J & E • see chart, above, for specifications.

#257KDAVX2 ~~$649.99~~ **PRICE BREAK $549.99**

JVC • KD-DV4200 *In-dash DVD/CD receiver with Giga MP3*

The KD-DV4200 will play your DVDs and CDs, and it adds a special kick: Giga MP3. Burn up to 100 hours of MP3s or WMAs on a DVD, and the KD-DV4200 will play them all. You can even connect a video screen so the folks in back can watch DVDs while you drive.

Details: detachable face • MP3/WMA playback • cEQ soundshaping system • remote control • optional auxiliary input • size I, J & E • see chart, above, for specifications.

#257KDDV420 ~~$249.99~~ **PRICE BREAK $229.99**

• KD-DV6200 *Adds a USB port and a rear auxiliary input*

The KD-DV6200 (pictured) adds a USB port for music file playback, rear auxiliary input, four 2.5-volt preamp outputs, and a 7-band equalizer.

#257KDDV620 ~~$329.99~~ **PRICE BREAK $299.99**

Jensen • VM9311TS *In-dash DVD/CD receiver with a 7" touchscreen*

Get into mobile video at a great price. The VM9311TS from Jensen sports a motorized, 7" touchscreen and plenty of options for system expansion.

You can watch videos on the in-dash screen when you're parked. While you drive, enjoy your CDs or the AM/FM tuner. Add an optional XM satellite radio tuner and subscription for even more entertainment (see pg. 16). Connect the optional iPod® adapter, and you can play your iPod through the VM9311TS, control it with the touchscreen, see song and artist info on the display, and even recharge the iPod's battery.

(XM) CONTROLLER Add XM, see pg. 16

The VM9311TS is especially ideal for long trips; it'll play MP3s you've recorded onto a DVD. You can fit up to 999 songs on a single DVD disc, for hours of music right at your fingertips.

Details: plays MP3s on CD and DVD • Audio Sound Processing • compatible with Jensen iPod adapter (#110JLiNKiC, $19.99) • front, rear, and subwoofer preamp outputs • size I, J & E • see chart, pg. 38, for specifications.

#110VM9311T $429.99

New Dual • XDVD8181 *In-dash DVD/CD receiver with a 7" touchscreen*

The Dual XDVD8181 (pictured) gives you an impressive number of features, including touchscreen controls, inputs for a rear-view camera and game system, outputs for external amps, and a high-quality processor that makes your music sound great. And all for less than $500. The XDVD8181 has two video outputs for adding more screens (find screens online at crutchfield.com/screens), and a secondary display offers system information when the screen is folded down. You can play MP3 and WMA music files recorded on CD *and* DVD and control everything with the wireless remote.

Details: MP3/WMA playback on CD and DVD • 24-bit digital-to-analog converter • iplug™ auxiliary audio input • size I, J & E • see chart, pg. 38, for specifications.

#070VD8181 $499.99

• XDVD8182 *System expansion and control over your iPod*

The XDVD8182 gives you all the features of the XDVD8181 plus a dedicated cable and controls for an iPod, including video playback.

#070VD8182 $599.99

Clarion • VRX765VD *In-dash DVD/CD receiver with a 7" touchscreen*

On its own, Clarion's VRX765VD is a stellar mobile video component. It has a 7" motorized video screen for your DVDs, plus touchscreen controls for easy system management. But when you take advantage of the expansion opportunities this powerful player provides, it really blossoms as the hub of your total mobile video system.

With an optional adapter, the VRX765VD offers iPod integration. You control all your iPod's functions from the touchscreen — and since the on-screen interface is inspired by the iPod's click wheel, it's super-easy to use.

Hook up a backseat screen and wireless headphones, and your passengers can watch DVDs while you drive. Put the system in dual-zone mode, and you can listen to another source, like the radio, at the same time. You also get built-in satellite radio controls, which let you add a SIRIUS or XM radio and antenna, and inputs for a DVD changer and a portable music player. And thanks to the powerful signal processor, you get great sound, too.

Details: MP3/WMA playback • 3-band parametric EQ • Magna Bass EX • works with iPod adapter (#020CCA649, $49.99) • 24-bit digital-to-analog converters • dual-zone mode • size I, J & E • see chart, pg. 38, for specifications.

#020VRX765 ~~$999.99~~ SPECIAL PURCHASE $749.99

New Clarion • MAX675VD *Double-sized in-dash DVD/CD receiver with iPod video capability*

Fill your double-sized radio opening with the Clarion MAX675VD and you instantly have a world of options for listening and viewing entertainment. Add the optional iPod cable and the 7-inch touchscreen mimics your iPod's clickwheel for a familiar way to flip through your digital music files. You even get playback of video files from a compatible iPod, so your favorite movies, shows, and clips come through bright and clear for easier viewing.

Clarion's 2-Zone Entertainment keeps everyone in the car entertained. Just add a rear monitor and wireless headphones, and backseat passengers can enjoy a movie, while you enjoy any other media source, including CDs, tunes from your iPod, or optional satellite radio.

The touchscreen also controls the optional Clarion NAX970HD navigation system (#020NAX970, $999.99), with 3-D menus that make choosing destinations easy. The system is designed to tuck out of the way, with no map discs to load. The high-speed hard disk drive processes routes and commands quickly so you spend more time enjoying your trip and less time waiting for your navigation system to find the right roads.

Details: MP3/WMA playback • 3-band parametric EQ • Magna Bass EX • works with iPod adapter (#020CCA649, $49.99) • 24-bit digital-to-analog converters • dual-zone mode • size DD • see chart, pg. 38, for specifications.

#020MAX675 $999.99

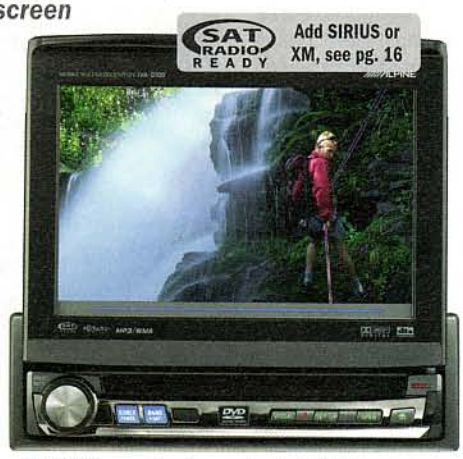
Alpine • IVA-D100 *In-dash DVD/CD receiver with a 6.5" PulseTouch™ screen*



If you're in the market for a centerpiece to your mobile video system, Alpine's IVA-D100 really does the trick. Its 6.5" screen features the acclaimed PulseTouch control system — your fingers touch the flat screen, but it feels like you're touching actual sliders and buttons.

The IVA-D100 handles an impressive array of music and video formats, including your standard and home-burned CDs and DVDs, and MP3 files you've burned onto DVD — up to 100 hours' worth of music fits on a single disc. The QuickSearch™ feature makes finding the songs you want to hear easy and quick. All your music will sound fantastic, thanks to premium digital-to-analog converters that create an impressively rich soundscape. Alpine's handy Bass Engine® sound controls let you adjust the music to fit your taste, and you can even create custom sound settings at Alpine's website.

Details: plays MP3/WMAs on CD and DVD • Bass Engine sound shaping • works with iPod® adapter ($29.99), Bluetooth® adapter ($199.99), HD Radio™ tuner ($249.99), surround-sound processor ($499.99), and navigation system (#500NVEN872, $1699.99) • size I, J & E • see chart, pg. 38, for specifications.

#500iVAD100 $1099.99

Alpine • IVA-W200 *Double-sized CD/DVD receiver with an integrated 6.5" PulseTouch screen*

Now you can fit the quality of an Alpine DVD receiver perfectly in your double-sized stereo opening. The IVA-W200 features a 6.5" screen that sits flush in your dash for a sleek, factory look. You control the player with Alpine's famous PulseTouch system — tap the flat screen and tiny vibrations make it feel like you're touching real buttons.

Premium signal processors deliver rich, full sound from your CDs, DVDs, digital music files, and any of the external components you choose to connect — a SIRIUS or XM satellite radio, HD Radio tuner, or iPod adapter. And those aren't the only ways to add to your system; Alpine also lets you hook up an optional navigation system or a Bluetooth adapter (for making hands-free calls from your compatible cell phone). You can add more juice by connecting amplifiers to power your speakers. And you can even get into real movie-theater sound when you add Alpine's optional surround-sound processor, plus an amplified center-channel speaker and subwoofer.

Details: plays MP3/WMAs on CD or DVD • Bass Engine sound shaping • works with iPod adapter ($29.99), Bluetooth adapter ($199.99), HD Radio tuner ($249.99), surround-sound processor ($499.99), navigation system (#500NVEN872, $1699.99), and XM NavTraffic® receiver (#500HCE100X, $299.99) • size DD • specs, pg. 38.

#500iVAW200 $999.99

Alpine • IVA-D310 *In-dash DVD/CD receiver with a 7" PulseTouch screen*

The IVA-D310 delivers Alpine's largest in-dash PulseTouch screen. Your fingers press the flat, 7" screen, but it feels like you're touching buttons and sliders. The screen generates eight different sensations, so you can make adjustments without taking your eyes off the road.

With the IVA-D310, you get Alpine's Bass Engine Plus sound-shaping system. Its advanced capabilities include time correction that lets you delay the sound from the speakers closest to you, so the sound from all four speakers reaches your ears at the same time. Dual-zone mode is built in, too. Hook up a screen and headphones in the back, and your passengers can watch movies while you drive. Car audio isn't "one size fits all" — music sounds different in different cars. That's why Alpine also includes the iPersonalize™ feature. It lets you create and download custom audio settings from Alpine's website, then load them into the receiver. You get sound that's a perfect match for *your* ride.

Details: plays MP3/WMAs • Bass Engine Plus sound shaping • works with Bluetooth adapter ($199.99), iPod adapter ($99.99), surround-sound processor ($499.99), and nav system (#500NVEN872, $1699.99) • dual-zone mode • size I, J & E • specs, pg. 38.

#500iVAD310 $1299.99

Kenwood • DDX6019 *Double-sized in-dash CD/DVD receiver with a 7" touchscreen*

Nothing looks better in a double-sized dash opening than a video screen — the DDX6019 is a great example. Its screen sits flush in your dash, and gives you touch control over all the system's functions. To entertain the kids, integrate a backseat screen and wireless headphones. They can watch movies while you enjoy music up front. And that music isn't limited to AM/FM; with optional tuners, you can enjoy satellite radio and crystal-clear HD Radio broadcasts (where available). Or add Kenwood's iPod adapter, and get control over your iPod from the touchscreen. The DDX6019 also works with Kenwood's Bluetooth hands-free adapter (#113BT100, $199.99). With it, you can access your compatible phone's contact list and make calls without taking your eyes off the road.

Details: MP3/WMA playback • System Q • System E's crossovers • works with HD Radio tuner ($199.99), iPod adapter ($99.99), and rear-view camera ($199.99) • dual-zone mode • size DD • see chart, pg. 38, for specifications.

#113DDX6019 $999.99

Get the DDX6019 plus Kenwood's KNA-G150 add-on navigation system. The KNA-G150 sells separately for $799.99, so you save $100 with this package deal.

#700NAV6019 $1699.98

***Pick up a $300 gift card** when you purchase and Eclipse AVN5500 or ANV6600 in-dash navigation system. Gift card applicable toward your next Crutchfield purchase. Offer good for a limited time. Call or visit crutchfield.com for details.

Pioneer • AVIC-Z1 *Double-sized in-dash navigation system with DVD/CD, hard-disk drive, and 7" touchscreen*

We think it's safe to say there's never been an in-dash DVD player quite like the AVIC-Z1. It features a big, bright, 7" screen and an on-board, 30-gigabyte hard drive that facilitates advanced navigation and the storage of up to 10 gigabytes of music ripped from your CDs. *And* it gives you touchscreen control, voice control over several navigation functions, and playback of your DVDs and CDs.

Smart, accurate navigation

What makes navigating with the AVIC-Z1 so cool? For starters, all maps are already loaded up and stored on the built-in hard drive. To navigate, just punch in your destination using the touchscreen. You can enter a street name or address, or choose from nearly 11 million points of interest. Wherever you go, you'll be able to find hotels, restaurants, gas stations, and more. The AVIC-Z1 is intelligent, too: it remembers roads you travel frequently, and over time suggests routes on roads with which you'll be comfortable. There's also a "smart routing algorithm" that takes data like posted speed limits into account when calculating your course, so you'll be sure to get the most efficient route.

You and your AVIC-Z1 can carry on a dialogue, too. The included microphone lets you control many aspects of the system using voice commands. And the system is programmed with a large vocabulary to make giving commands easy. For example, just say "L-A-X" — no need to specify the category "airport." Text-to-speech technology lets the AVIC-Z1 announce most street names as you're approaching your turn, so you'll know exactly which street to turn onto without taking your eyes off the road.

XM NavTraffic™ and Roadside Assistance

Add a compatible tuner and subscribe to XM's NavTraffic service for continuously updated traffic information in many major metropolitan areas. The AVIC-Z1 also comes with a Roadside Assistance package that lets you access emergency contact info with the push of a button. Pioneer includes an offer for a free year of roadside assistance service from a national auto club.

SAT RADIO READY Add SIRIUS or XM, see pg. 16

Add your iPod, and make phone calls without touching a button

Use Pioneer's optional iPod® adapter and you can play your iPod through the AVIC-Z1, control it with the touchscreen, and even recharge its battery. Add the optional Bluetooth® wireless adapter, and if you have a cell phone with Bluetooth technology, you can use the AVIC-Z1 to make calls without touching your phone.

Details: MP3/WMA playback • XM NavTraffic requires tuner (#130P10XMT, $199.99) and subscription • 30GB hard drive (20GB for navigation, 10 for music storage) • 3-band parametric EQ • works with backup camera (#130NDBC1, $249.99), iPod adapter (#130iB100ii, $49.99), and Bluetooth adapter (#130NDBT1, $119.99) • dual-zone mode • size DD (double DIN) • see chart, pg. 38, for specs.

#130AVICZ1 $2249.99

Pioneer • AVIC-D2 *Double-sized in-dash navigation system with 6.5" screen — plus a free backup camera or gift card†*

Pioneer's AVIC-D2 offers navigation, CD playback, and touchscreen control in a package that fits perfectly in vehicles with double-sized dash openings. If you connect an external DVD player, you can also watch DVDs on the built-in 6.5" screen while you're parked.

SAT RADIO READY Add SIRIUS or XM, see pg. 16

To navigate, enter your destination using the touchscreen controls. As you drive, the map on the display shows you where you are and where you need to make your next turn. Voice prompts also assist, telling you *when* you need to make a turn. Plus, the AVIC-D2 works with XM's NavTraffic service to keep you updated on delays on your route in many metro areas.

The AVIC-D2 also has room for *two* disc slots behind the fold-down faceplate: one for your CDs and one for the included navigation discs. You won't have to remove the navigation disc to enjoy your favorite tunes.

Details: MP3/WMA playback • XM NavTraffic requires tuner (#130P10XMT, $199.99) and subscription • displays acceleration and other vehicle performance specs • 3-band parametric EQ • works with iPod adapter (#130iB100ii, $49.99) and backup camera (#130NDBC1, $249.99) • size DD (double DIN) • see chart, pg. 38, for specs.

#130AViCD2 $1499.99 and receive a $200 gift card and a free gift†

†Choose Your Gift when you purchase the AVIC-D2 in-dash system. Choose from a backup camera (#130NDBC1, $250 value) or an InstallCard (#597421018, $200 value). You'll also get a $200 gift card towards your next Crutchfield purchase. Offer good while supplies last. Call 1-800-555-9430 for details.

Eclipse • AVN5500 *Double-sized in-dash navigation system with DVD/CD player and 6.5" touchscreen*

The AVN5500 does the work of multiple components — CD player, DVD player, and navigation system — effortlessly, all in one chassis. And since there are two disc slots (one for CDs, the other for the navigation disc and your DVD movies), you don't have to stop the music to get directions to your destination. The included DVD-ROM stores the maps the system uses; just slide it in when you're ready for turn-by-turn, voice-guided navigation. Easy-to-use menus let you enter your destinations quickly. Choose an address, street name, or intersection, or select from millions of points of interest, including restaurants, hotels, and gas stations.

Details: plays MP3s • works with HD Radio tuner (#099HDR105, $449.99) and iPod adapter (#099iPC106, $49.99) • 9-band EQ • 5 preset soundfields • (AVN6600 has two DVD slots, dual-zone mode, and Circle Surround® II) • size DD • specs, pg. 38.

#099AVN5500 $1699.99 and get a $300 gift card*

• AVN6600 *Navigate while passengers watch a movie*

The AVN6600 (not shown) has dual DVD slots, one for the included navigation discs and the other for DVD movies. Connect a backseat screen and wireless headphones, and your passengers can watch a movie while you navigate. Circle Surround II simulates surround effects with just four car speakers.

#099AVN6600 $1999.99 and get a $300 gift card*

Getting there really *is* half the fun

Plug-and-play navigation systems are ideal if you want the convenience of in-car navigation without a permanent installation. They're compact and come with preloaded maps, and many feature handy touchscreens. Extras like MP3 playback, optional live traffic-info services,* and photo viewers are available in many models. Compare features in the chart below, and look at the specific models on pages 42-44.

What's in the chart

Extended capabilities: Any function besides navigation. **MP3** means MP3 (and possibly WMA and/or audio book) playback. **Photo** lets you upload and view your digital photos. **Video** lets you upload and view digital video in WMV or other video file formats.

Traffic-ready:* There are several options for traffic-information service, most of which require a subscription and antenna or receiver. A "✔" means the device is compatible with at least one service, and some models include the receiver or antenna. Visit crutchfield.com/navtraffic for more info.

Bluetooth®: Plug-and-play navigation devices with Bluetooth let you make and receive phone calls, hands-free, with compatible cell phones.

Give GPS a test drive

Our online navigation demo tool lets you take a hands-on look at just how easy in-car navigation can be. Just go to crutchfield.com/navdemo to get some hands-on experience.

Car Speakers

SHOPPING GUIDE

45 more car speakers at crutchfield.com

Jason, Crutchfield Tech Support Advisor
"Since I installed the first set of aftermarket speakers in my car, I've been a big fan of replacing factory speakers. Great speakers make a remarkable difference in a car's sound quality."
62.71
Infinity
kappa

Good sound makes all the difference

The daily commute to work, rush-hour traffic jams, road trips . . . with all the time you spend in your car, a good sound system is essential. New speakers offer an easy and affordable way to create a "live" sound experience. Find out which speakers fit your car by calling a Crutchfield Sales Advisor or visiting crutchfield.com/whatfits.

Which would you rather listen to?

There's a huge difference between factory speakers and aftermarket speakers — just take a glance below to get an idea. Poor-quality materials and low power-handling render factory speakers insufficient and unimpressive compared to new aftermarket speakers. New speakers don't just look better — they sound better, too.

Factory speaker

Foam or paper surrounds can deteriorate quickly, causing the woofer to distort.
This worn speaker lacks a separate tweeter, so the highs are muddy and weak.

Aftermarket speaker

Long-life rubber surrounds allow the woofer to move farther for cleaner bass.
A larger motor structure (behind the woofer) leads to greater power handling and deeper bass.
The woofer is made of a stronger material for accurate bass response.
A tweeter promotes well-defined high notes.
This 3-way has a supertweeter for better high frequency detail.

Speaker compatibility with your car stereo

- If you have a factory radio, keep in mind that it's probably low-powered. Look for speakers that have a high sensitivity rating (around 90 dB) and don't require much RMS power to sound great. See pgs. 55-56 for more info on these specifications.
- Most brand-name stereos will power any of our full-range speakers comfortably. If you want the best performance from your speakers, consider adding an amplifier (pgs. 67-70).

Ingredients for amazing sound

- If you prefer bright and snappy highs, look for tweeters made of hard materials like titanium or aluminum. Select tweeters made of soft materials, like Mylar or silk, for more refined, mellow sound.
- Full-range speakers can do a great job with bass, especially larger sizes (like 6½" and 6"x9"). In our chart on pgs. 55-56, look at the ***Frequency response*** column. The lower the first number in the range, the more bass you'll get.
- Lightweight, rigid woofer materials, such as Injection-Molded Polypropylene (IMPP), offer the best bass from full-range speakers. See the ***Details*** section for info on materials.
- For deep, booming bass, see our subwoofer section (pgs. 57-66).
- Log onto **crutchfield.com/whatfits** or call us at 1-800-555-9430 to determine which speakers will fit your vehicle.

Get the best results with good stereo imaging

- **Stereo imaging** describes how a system reveals the location of instruments and vocalists as they would be positioned on stage. You should be able to envision instrument placement in front of you from left to right (see right).

You'll be able to pick out instruments and vocals as if you were at a live show.

- You'll notice the most imaging detail from the high notes produced by your front speakers because you're closest to them. An in-dash stereo or an external amplifier that has high- and/or low-pass filters can send most of the low notes to the rear to keep the image up front.
- In most cases, great imaging requires equal distances between your speakers and your ears (see right), and well-aimed tweeters. To improve aiming, look for speakers with swiveling tweeters, or tweeters that spread the highs over a wide area. For ways to compensate for unequal distances, see the component speaker section (pgs. 46-48), or call us at 1-800-555-9430.

The more equally spaced your speakers are to your ears, the better imaging you get.

Cris can help you install your speakers.
Toll-free tech support for the life of your gear.

One-on-one help With in-depth, ongoing training and the industry's best product database, our Sales Advisors help you find the perfect gear.

Transform you car into a concert soundstage with components

- Component systems have separate woofers and tweeters, unlike full-range speakers, which house the woofer and tweeter together. External crossovers in components direct the lows to the woofers and highs to the tweeters, whereas most full-range speakers filter only the lows from the tweeters.
- As a result, components give you more natural and defined sound (in both treble and bass ranges) than you can get from most full-range speakers.
- Components direct the sound path to your ears for more realistic stereo imaging (see pg. 45). Some installations require you to cut new holes in the mounting location. Try Q-Forms kick panel pods for a great mounting option — they give you superb imaging while maintaining a factory look. See below for more information.
- Component systems often require more power than full-range speakers. To maximize your components' potential, we recommend powering them with a high-powered stereo (pgs. 20-41) or an external amplifier (pgs. 67-70).
- To find out more about the sound benefits of component speakers, visit crutchfield.com/components or call 1-800-555-9430.

The Polk db6500 component system (pg. 48).

Watch our component speaker installation video: crutchfield.com/componentvideo

New Car-specific Q-Forms kick panel pods now available for 6½" components to deliver the details

Use Q-Forms kick panel pods to achieve outstanding stereo sound in a clean installation. These custom-designed and color-matched replacement kick panels come in two sizes — for 5¼" and now 6½" component speakers with aftermarket grilles. You can angle each speaker to maximize sound quality, so it sounds more like you're sitting in a concert hall than in a car. To see if Q-Forms fit your vehicle, call 1-800-555-9430, or visit crutchfield.com/whatfits.

5¼" **$149.99 pair**

New 6½" **$179.99 pair**

A kick panel pod before speakers are installed (left), and a kick panel pod afterwards (right). Kick panel pods are designed for specific vehicles, can match just about any car interior, and offer excellent stereo imaging capabilities.

ALPINE® SPS series

Advanced materials and construction

Expect brilliant sound from Alpine SPS series components, thanks to a combination of unique materials and design.

The multi-layered woofers produce deep, natural-sounding bass due to their straight, accurate cone movement. The surface- and flush-mountable tweeters pivot up to 15° to deliver the ideal stereo imaging for your vehicle. External 2-way crossovers direct the frequencies to the proper speakers for seamless and efficient sound.

Details: layered hybrid fiber woofers • rubber surrounds • 1" textile dome tweeters • 12 dB/octave, 6 dB/octave high/low-pass crossovers • tweeter attenuation circuits (0, -3, -6 dB) • warranty: 1 yr. • system includes 2 woofers, 2 tweeters, and 2 crossovers.

Specs: freq. response: 35-35K Hz • power range: 8-50 watts RMS • sens.: 90 dB • depth: 2½".

• **SPS-171A** 6½"/6¾" **#500SPS171A** **$199.99**

Not into do-it-yourself car stereo installations? No problem.

- A prepaid InstallCard gets your new speakers installed by any professional who's a member of the InstallCard network.
- There are more than 1,500 installer locations across the nation.
- Enter your zip code into the online database to find an installer near you.
- Along with the convenience and peace of mind you get with a qualified professional installation, InstallerNet warranties their labor for the life of the vehicle.
- You get all the benefits of buying from Crutchfield — and you save time, too.

Infinity Reference series

The ideal replacements for factory components

You'll enjoy the time spent in your car by replacing the flat sound of factory speakers with the luxurious harmony of Reference components. You can use Infinity's unique Starfish™ mounting brackets to quickly install your Reference tweeters. The oversized woofers deliver deep, clean bass, so you'll feel as if your favorite band's drummer is pounding it out in the back seat. Vocals and guitars benefit from the home-audio quality tweeters, which radiate smooth highs that won't fatigue your ears. Reference components enhance your music so that you'll notice all the details. The music sounds lush and full thanks to the crossovers, which direct the notes to the proper speakers. If you want a higher upgrade, check out Infinity Kappa series speakers, which boast a low-impedance and high-efficiency design.

Details: Plus One+ Injection-Molded Polypropylene (IMPP) woofers • hi-roll rubber surrounds • 1" edge-driven silk dome tweeters • I-Mount™ tweeter mounting system • 18 dB/octave, 3,500 Hz high- and low-pass external crossovers • tweeter adjustment circuits (0, -3 dB) • warranty: 1 year • system includes 2 woofers, 2 tweeters, and 2 crossovers.

Buy one, get one half off Buy a pair of Infinity Reference speakers and get a second pair of equal or lesser value at half price. Offer valid 11/1/06-12/31/06.

- **5010cs** 5¼"

  #1086810CS $199.99

Kappa series

Efficient motors for thunderous drum beats and stunning vocals

Your key is the ticket, your car is the stage, and a concert awaits you with a turn of the ignition. Outfit your car with Infinity Kappa component speakers and you'll look forward to every drive.

Kappa speakers' accurate sound stems from a smart design. Efficient motors pound out plenty of energy to the woofers. Built-in heatsinks ensure steady play and long life. Infinity builds its woofers out of extremely stiff material to minimize cone movement and eliminate distortion. As a result, the woofers give you clean, natural, and more "live" sound.

Kappa speakers deliver music with incredible detail. You'll be able to distinguish the crashing of the symbols from the stroking of the violin thanks to the dome tweeters' precise, faithful sound reproduction. Infinity provides plenty of installation options so you can create the best stereo imaging for your car (see pg. 45). Just use the included brackets to install the tweeters in most factory locations or custom-install them with the tweeter mounting system.

Details: Plus One+ woven-glass-fiber woofers • neodymium motors • hi-roll rubber surrounds • 1" edge-driven Metal Matrix Diaphragm (MMD) dome tweeters • I-Mount tweeter mounting system • 18 dB/octave, 3,500 Hz high- and low-pass external crossovers • tweeter adjustment circuits (0, +3 dB) • 2-ohm impedance • warranty: 3 years • system includes 2 woofers, 2 tweeters, and 2 crossovers.

- **60.7cs** 6½"/6¾"
  Specs: frequency response: 45-25,000 Hz • power range: 2-90 watts RMS • sensitivity: 95 dB • depth: 1¹⁵⁄₁₆".
  #108607CS $299.99

Boston

SX series

Crisp, clear sound

Surround yourself in the unruffled sound of Boston SX component speakers.

Boston prides itself on audio expertise, designing and engineering all products in-house. SX speakers employ high-quality materials, such as Neodymium magnets, to enhance the way you listen to music. Neodymium is an incredibly strong yet lightweight element that delivers power beyond its size. The magnets ensure accurate cone movement and, as a result, clear sound. Just rotate the tweeters toward your ears and you'll feel as if the guitarist is seated on your dash.

Details: copolymer woofers • rubber surrounds • Kortec® dome tweeters • tweeter attenuation circuits (0, -2, -4 dB) • warranty: 2 years • includes 2 woofers, 2 tweeters, 2 crossovers.

- **SX50** 5¼"
  Specs: freq. response: 58-20K Hz • power range: 2-65 watts RMS • sensitivity: 90 dB • depth: 2⁵⁄₁₆".
  #065SX50 $249.99

- **SX60** 6½"/6¾"
  Specs: freq. response: 55-20K Hz • power range: 2-65 watts RMS • sensitivity: 90 dB • depth: 2⁵⁄₁₆".
  #065SX60 $249.99

Pro series

Like having your own private concert

When you demand enormous power handling and incredible clarity, go for Boston's Pro series components. Your car will quickly become your favorite place to listen to music once you hear the speakers in action. The rigid woofers boast large voice coils for big sound, while the *two* cooling devices shed heat so your music plays clear song after song. Strong magnets drive the speakers with authority. Rotating dome tweeters make the vocals sound crystal-clear. Separate woofer and tweeter crossovers have their own inputs and outputs to give you many wiring options, while tweeter volume controls (0, -2, -4 dB) make balancing the sound easier.

Details: copolymer woofers • rubber surrounds • 1" Type-M2 dome tweeters (flush- or surface-mount) • external crossovers • warranty: 2 years • includes 2 woofers, 2 tweeters, 2 crossovers.

- **Pro50** 5¼"
  Specs: frequency response: 60-22,000 Hz • power range: 2-125 watts RMS • sensitivity: 90 dB • depth: 2¼".
  #065PRO50 $599.99

- **Pro60** 6½"/6¾"
  Specs: frequency response: 50-22,000 Hz • power range: 2-125 watts RMS • sensitivity: 90 dB • depth: 2⅜".

polkaudio db series

Component speakers specifically designed to minimize distortion

More models, including Polk/MOMO speakers, at **crutchfield.com/polk**

Polk's db series component speakers bathe you in sound that's big, bold, and crystal clear. Dynamic Balance (db) speakers result from a study of woofer movement — they combine the right materials with the perfect cone shape to perform distortion-free. Innovative heatsinks help them withstand the stresses of heat that damage other speakers. Polk equips its tweeters with lightweight, powerful magnets so even the highest pitch comes out clean and crisp. You can surface-mount the tweeters or install them with the included flush-mount swivel cups. The 2-way crossovers direct the right frequencies to the tweeters, so they'll never get overloaded. Upgrade to Polk's Italian-designed, high-performance MOMO series for even better reliability and incredible sound.

Details: polymer/mica composite woofers • butyl rubber surrounds • 1" liquid-cooled silk/polymer composite dome tweeters • 12 dB/octave, 4,000 Hz high/low-pass external crossovers (3,400 Hz on db6750) • electronic tweeter protection circuits • neodymium magnets • marine certified (protect against moisture, UV rays) • Kapton® voice coil formers • warranty: 1 year • includes 2 woofers, 2 tweeters, and 2 crossovers.

Buy one, get one half off Buy a pair of Polk db speakers, and get a second pair of equal or lesser value for half price. Offer valid 11/17/06-1/2/07. Call for details.

JBL GTO series

Sophisticated design makes these speakers sing

Love the loud, powerful music you hear at live concerts? Chances are you've heard it via JBL speakers. The majority of theaters and concerts worldwide depend on JBL speaker systems to deliver clear, flawless sound. If you're ready to upgrade your system to get enhanced detail and clear imaging, JBL's GTO components are a great way to go.

The dual-layer My-Ti™ tweeters blend titanium and Mylar for smooth, accurate sound. Special mounting brackets allow easy tweeter mounting in your factory tweeter locations. Don't have factory tweeters? JBL includes another mounting system that gives you plenty of options for smart placement. The Plus One woofers' enlarged surface area allows for high efficiency and incredible bass. Your music will play loud and deep. The speakers' special 2-ohm impedance design brings out maximum power from your amp so your system can reach its potential.

Details: Plus One Injection-Molded Polypropylene (IMPP) woofers • rubber surrounds • Mylar/titanium composite edge-driven dome tweeters • external crossovers • electronic tweeter protection circuits • warranty: 1 year • system includes 2 woofers, 2 tweeters, and 2 crossovers.

  Specifications: frequency response: 55-21,000 Hz • power range: 2-70 watts RMS • sensitivity: 92 dB • depth: 2¼".
  #109GT8607C $199.99

The benefits of add-on tweeters

You can enjoy many of the benefits of component speakers simply by adding tweeters to your existing system. Or you can replace worn-out factory tweeters and breathe new life into your tunes. There are several reasons to add new (or replace old) tweeters:

- High notes contain most of the musical details; high-quality, brand-name tweeters bring out those details.
- You can aim most brand-name tweeters for better stereo imaging. See pg. 45.
- Factory tweeters often can't handle much power, so the highs are distorted. New tweeters can handle much more power, making your highs strong and clean.

Infinity • Reference 1011t *Tweeters*

If you want a more realistic musical experience in your car, consider adding a pair of Reference 1011t tweeters. These 1" silk domes will add sparkle to your music and improve your stereo image, without tiring your ears. Infinity includes crossovers to prevent lower frequencies from damaging the tweeters.

You can add these tweeters to almost any sound system. The I-Mount™ system lets you surface- or flush-mount your tweeters, while the Starfish™ brackets simplify mounting in factory tweeter locations. If you flush-mount them, you can also angle the tweeters to direct the sound straight to your ears. Specifications on pg. 56.

#1081011T $79.99 pair

Pioneer • TS-T110 *Tweeters*

Hear a dramatic improvement in your music's stereo imaging and clarity with Pioneer's light and responsive TS-T110 ⅞" hard dome tweeters. These tweeters project the high notes in sizzling detail thanks to the PPTA material, which effectively dampens harsh resonances. One of the lightest speaker materials around, PPTA domes move quickly and accurately to reproduce crisp, detailed sound. The tweeters feature high-pass crossovers so they're not burdened with bass. You can surface- or flush-mount them. Specifications on pg. 56.

Infinity Reference series **Unwavering sound quality**

The elements that produce the trademark silky sound of Reference speakers are elegantly simple in theory, refreshingly effective in practice. The lightweight woofers deliver solid low tones, and it's no wonder — their oversized design means they have more surface area than other woofers in the same size category. Powder-coated, sturdy, steel baskets hold the woofers and absorb annoying vibrations that could color your music. The silk dome tweeters play crisp and light highs that you'll find comfortable to listen to. Infinity builds the tweeters from the same materials as fine home speakers, and they're made to pivot on models 5¼" and up. You can aim the tweeters right at your ears to detect even the subtlest details in your music.

Details: Plus One+ Injection-Molded Polypropylene (IMPP) woofers • hi-roll rubber surrounds • ¾" silk dome tweeters (1" on the 9612i) • UniPivot™ 355° swiveling tweeters (5¼" and up, except 9613i and 6012si) • priced per pair • specifications on pgs. 55-56.

Buy one, get one half off Buy a pair of Infinity Reference speakers, and get a second pair of equal or lesser value for half price. Offer valid 11/1/06-12/31/06. Call for details.

Kappa series **Raises the power-handling, lowers the temperature**

Combine exquisite sound with high power-handling and you wind up with Infinity's Kappa series speakers. Infinity makes its Kappa Plus One woofers nearly 30% larger than most competing speakers of the same size category. As a result, the stiff woofers play deeper and louder than factory woofers, showing off great efficiency and low distortion.

Dome tweeters keep the high notes clean and crisp, even at high volume. On models 5¼" and up (except 63.7i and 693.7i), the tweeters rotate up to 270° so you can direct the music to your ears. The rotating tweeters enhance your audio experience to make you feel as if you're at a show. Infinity's computer-optimized crossovers seamlessly blend the highs and lows from the tweeters and woofers. The crossovers feature tweeter output controls so you can fine-tune the sound to fit your liking.

Kappa speakers handle lots of power without overheating. Their integrated heatsinks rid the system of excess heat. The combination results in clean sound, low distortion, and cool speakers at all volumes.

Details: Plus One woven glass-fiber woofers • hi-roll rubber surrounds • edge-driven Metal Matrix Diaphragm (MMD) dome tweeters • UniPivot 270° swiveling tweeters (5¼" and up) • external computer-optimized, voice-matched crossovers • 2-ohm impedance • 63.7i and 693.7i have EMIT tweeters with MMD midranges • priced per pair • specifications on pgs. 55-56.

Speaker FAQs (read them all at crutchfield.com/carspeakerfaqs)

Q: What innovations in brand-name speakers can help improve the sound of my system?

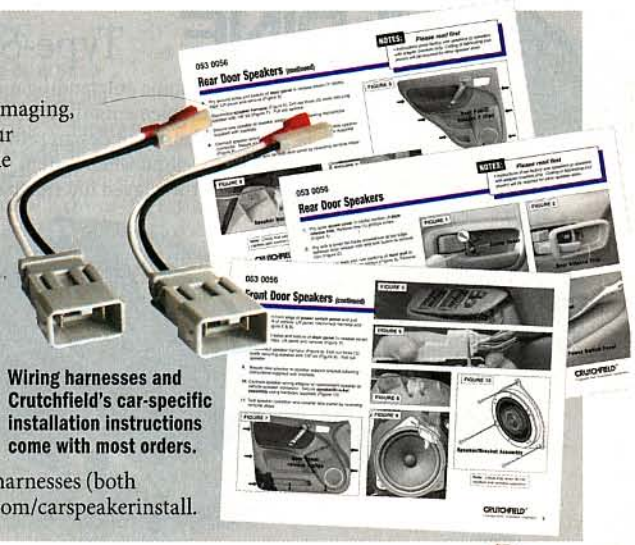
A: Many manufacturers offer some great performance-enhancing features. For improved imaging, many tweeters come in adjustable mounts that let you aim high frequencies towards your ears. Some speakers have smaller, more powerful magnets for louder, clearer tunes, while others have larger woofer cones for deeper bass. Look at each speaker's distinguishing qualities to see if they match up to the sound improvements you want to make.

Q: How does a speaker's power handling relate to the power output of a stereo or an amp?

A: First, the RMS number is always more significant than the peak number (see pg. 55). You should pick an amplifier with a power rating in the upper end of your speaker's power range. For example, if a speaker handles up to 35 watts of RMS power, it will perform better as your amp approaches delivery of 35 watts. It's better to overpower a speaker than to underpower it — the distortion caused by pushing a low-powered amp to its limit is much more likely to harm a speaker than too much power.

Q: How difficult will it be to install my new speakers?

A: New speakers are usually the easiest components to install in your vehicle. As a Crutchfield customer, you'll benefit from free vehicle-specific instructions, free wiring harnesses (both available for most vehicles), and our toll-free tech support. For details, visit crutchfield.com/carspeakerinstall.



Wiring harnesses and Crutchfield's car-specific installation instructions come with most orders.

Trip can help you install your speakers.
Toll-free tech support for the life of your gear.

db650

polkaudio db series

An irresistible combination of quality and price

Polk constructs db series speakers to deliver the powerful, precise sound of premium speakers — without the expensive price tag. These speakers sport stiff woofer cones that move accurately to minimize distortion. The rubber surrounds add to the production of crisp, clean sound. You'll enjoy the way the liquid-cooled tweeters keep the treble sounding smooth and accurate. The built-in 2-way crossover networks send the high and low notes to the proper drivers, producing considerably cleaner sound and advanced stereo imaging (see pg. 45). The db690 adds midrange drivers that enhance and define the mids. Install a pair or two of Polk db speakers for a price that's as sweet as the sound.

Details: polymer/mica composite woofers • butyl rubber surrounds • ¾" liquid-cooled silk/polymer composite dome tweeters (1" on the db675) • marine certified (protects against moisture, UV rays) • built-in 2-way crossovers • priced per pair • specifications on pgs. 55-56.

- **db400** 4" #107DB400 $79.99

JBL GTO series

Technologically advanced materials and design

JBL builds GTO series speakers to give you the best possible sound performance in your car — where you probably listen to your music the most.

A special 2-ohm impedance design extracts more power from your amplifier for louder, punchier sound. The Plus One woofer cones boast more surface area than most speakers from the same size category to give you improved efficiency and deeper bass.

GTO speakers feature My-Ti™ dome tweeters, a blend of Mylar and titanium that supplies consistently smooth and controlled high notes. Most models feature built-in high- and low-pass filters so your woofers and tweeters play only the frequencies they're designed to play. You can adjust the tweeter output controls to suit your sound preferences. Many GTO tweeters rotate 350° so you can aim them towards your ears, not your knees. You'll create great stereo imaging (see pg. 45), making your car sound more like a concert soundstage.

Details: Plus One oversized woofers • rubber surrounds • Mylar/titanium composite edge-driven dome tweeters • Unipoint™ 350° swiveling tweeters (except the GTO427, GTO6427, GTO637, and GTO937) • built-in crossovers (except the GTO427 and GTO6427) • 2-ohm impedance • tweeter output controls (except the GTO427 and GTO6427) • priced per pair • specifications on pgs. 55-56.

ALPINE® Type-S series

Built for all road and music conditions

The Type-S series speakers from Alpine combine outstanding materials with superior construction for a package that complements all types of music.

The speakers' efficient design provides vigorous sound when system power is low, while the rugged internal parts can handle cranks in volume — and you'll want to turn it up when you hear just how terrific these speakers sound. The silk dome tweeters furnish clear, smooth high notes that you'll find comfortable to the ears. Rubber surrounds encircle the aluminum-coated woofers so they hold their shape while moving freely — the bass response is full, strong, and accurate.

SPS-17C2

Details: aluminum-coated polypropylene woofers • air-injected rubber surrounds • silk dome tweeters (swiveling on models 5¼" and up, except SPS-69C3) • NOMEX® spiders • 4"x6" fits metric openings, such as for Mercedes • priced per pair • specifications on pgs. 55-56.

Boston

S series — Intelligently engineered for faithful sound reproduction

Boston Acoustics constructs their S series speakers to suit any car system, high- or low-powered, tricked-out or bare-bones. A magnetic liquid cools the ¾" tweeters for good reliability and excellent power handling. Boston mounts the tweeters on contoured planes in order to spread the high notes throughout the car, so all your passengers can enjoy great sound. The efficient tweeters feature Boston's AMD™ (Amplitude Modification Device), a simple series of tubes that cancel undesirable resonances. You'll hear pure, natural sound.

Sturdy, copolymer woofers team up with durable rubber surrounds to allow for smooth cone movement. The cones flex accurately to produce tight, clean bass with minimal distortion. Internal crossovers contribute to the unbroken full-range performance of the speakers. Boston specifically tunes the crossovers to ensure a smooth blending of the treble and bass. And Boston's advanced engineering enables these speakers to produce robust sound, no matter your system power.

Details: copolymer woofers • butyl rubber surrounds • ¾" ferrofluid-cooled soft dome tweeters • built-in crossovers • priced per pair • specs on pgs. 55-56.

KENWOOD

ie series — Innovative design for clear sound

Kenwood's second version of the Image Enhancer does a great job of preventing distortion. It uses smooth oval rings to surround and stabilize the tweeters. The rings banish fuzziness in the high notes, so your music plays bold and clear.

Rubber surrounds support the lightweight yet strong woofers. The combination optimizes the bass without introducing annoying resonances. The speakers' efficient design and wide sound range make them a great upgrade. If they fit your car, choose the KFC-1690ie or KFC-1390ie, which boast titanium-coated woofers and soft dome tweeters.

Details: mica Injection-Molded Polypropylene (IMPP) woofers* • rubber surrounds (urethane on the KFC-1680ie) • polyetherimide (PEI) balanced-dome tweeters* • KFC-6960ie and KFC-C1739ie add midranges • priced per pair • specs on pgs. 55-56. *except where indicated

Buy a Kenwood car stereo or amp plus car speakers and save $50 instantly

Purchase a Kenwood car stereo $149.99 and up, or a Kenwood amplifier, plus two pairs of Kenwood car speakers, and you'll save $50 on the combined price instantly. Offer good 11/01/06-12/31/06.

S series — Dimpled cones for strong, accurate bass

You don't have to shell out a lot of cash to improve your car's sound — you'll love upgrading to these affordable Kenwood speakers.

Uniquely dimpled woofer cones pound out deep, punchy bass. The dimples provide extra stiffness, so your bass booms accurately. The efficient, semi-dome tweeters disperse the sound over a wide area, so you'll hear great treble no matter what your stereo's power. You'll enjoy faithful reproduction of the full spectrum of your music and hear musical details that inferior factory speakers simply can't reproduce.

KFC-1060S

Details: dimpled Injection-Molded Polypropylene (IMPP) woofers • treated cloth surrounds • polyetherimide (PEI) balanced-dome tweeters • 4" speakers fit openings common to Toyotas and Mazdas (4T) and metric openings (4M), like those for Mercedes • priced per pair • specs on pgs. 55-56.

- **KFC-1060S** 4"/4T/4M **#113KFC1060** $49.99
- **KFC-1360S** 5¼" **#113KFC1360** $49.99
- **KFC-1660S** 6½"/6¾" **#113KFC1660** $49.99

C series

Dependable upgrades for hard-to-fit vehicles

Are you looking to boost your car system's sound, but having trouble finding speakers that fit? Drop in a pair of Kenwood C series speakers, and make your worn-out factory speakers a distant memory. Each of these 2-way speakers dishes out sound that rings loud and clear, thanks to the stiff, injection-molded woofers. Responsive semi-dome tweeters make the vocals and stringed-instrumentals sound natural and smooth.

Details: Injection-Molded Polypropylene (IMPP) woofers • KFC-4675 (with cloth surrounds) and KFC-415C (with foam surrounds) have polyamide tweeters • KFC-4675C have PPTA (high-strength polymer film) tweeters and treated cloth surrounds • priced per pair • specifications on pg. 55.

TS-A1781R

Pioneer TS-A series **Enhance the details**

You've heard the saying "strength in numbers;" now hear why it's true. Pioneer's TS-A series speakers incorporate up to five drivers, adding richness and detail to your music. The injection-molded woofers are reinforced with Aramid fiber — the same material that keeps your tires strong — to pump out big bass without distortion. Pioneer constructs its midrange speakers out of exceptionally light materials that resist annoying vibrations, so you'll enjoy accurate reproduction of the vocals in your music. The dome tweeters deliver incredible detail and do a great job of rounding out the sound of your music.

Details: Injection-Molded Polypropylene (IMPP) woofers with Aramid fiber* • rubber or cloth surrounds* • PET (Mylar) silver film dome tweeters* • PET silver film supertweeters on 4- and 5-ways* • priced per pair • specs on pgs. 55-56. *except where indicated

TS-G series **Improve your sound and save some money**

If you need to conserve a little cash but want better sound than your car's factory speakers can produce, then Pioneer's TS-G series speakers are just what you're looking for. These 2-way speakers feature Injection-Molded Polypropylene (IMPP) woofers so you hear the belting of the drums. They're complemented by crisp-sounding poly film tweeters that add remarkable detail and life to your music. Put a pair (or two) in your car and relish your tunes, along with the fact that you saved some money.

Details: IMPP composite woofers • treated cloth surrounds • PEI (polyetherimide) film dome tweeters • priced per pair • specifications on pgs. 55-56.

Rockford Fosgate Punch series **Elevate your car's sound**

P162C

Rockford Fosgate has found a way to satisfy your ears without draining your wallet — Punch series speakers. You'll find these speakers to be an excellent step-up from flabby-sounding factory speakers. Sturdy steel frames support stiff, lightweight woofers — a combination that ensures your music sounds distortion-free without any annoying rattles or hums. Rockford Fosgate makes the hard dome tweeters from durable and responsive titanium to radiate crisp, clean highs. The tweeters can handle lots of power so they sing clear and snappy at any volume level.

Details: Injection-Molded Polypropylene (IMPP) woofers • butyl rubber surrounds • ¾" titanium composite dome tweeters • titanium dome midranges and PEI (polyethermide) tweeters on 3-ways • cold-rolled steel vented baskets • priced per pair • specs on pgs. 55-56.

Save 20% when you purchase any pair of Rockford Fosgate full-range speakers through 11/30/06. Call 1-800-555-9430 for details.

BLAUPUNKT ProComponent series

Dependability at a great price

The cool blue color of Blaupunkt ProComponent speakers may be subdued, but the quality these speakers will add to your car stereo system is anything but subtle. The ProComponent series continues Blaupunkt's tradition of dependable and affordable car speakers that'll please any listener. Thanks to their great efficiency, ProComponent speakers make the most of your music — even if you're hooking them up to a factory radio. All your drives will be more fun once you've experienced their great sound.

These 2-way speakers pound out the drumbeat courtesy of lightweight, stiff woofers. Mylar semi-dome tweeters deliver the stringed instrumentals and vocals. For extra punch, the PCxb573 and PCxb693 3-way speakers feature Mylar midranges that bring clarity and presence so you'll feel as if your favorite band is right beside you.

Details: injected polymer woofers • foam surrounds • 1" Mylar semi-dome tweeters • priced per pair • specifications on pgs. 55-56.

Velocity series

Rugged voice coils for powerful sound

Liven up your drive to work with Blaupunkt's Velocity Series coaxial speakers. Blaupunkt designs these speakers to deliver extremely powerful yet clear sound. The woofers sport stiff, woven carbon-fiber cones that minimize distortion for clean sound, while the 3-inch voice coils (the same size found on subwoofers) make these speakers a great choice for the power-lover.

Your music will sound great all-around — the silk tweeters add crisp details while complementing the deep, powerful beat of the woofers. The Vx573 and Vx693 sport dome midranges to fill out the spectrum. Of course, what's the point of great sound if it won't last? Blaupunkt builds Velocity speakers for the long haul. The stiff, cast-aluminum baskets relieve pressure from the speakers, resulting in good reliability for years to come.

Velocity speakers' design simplifies installation. The grilles have sturdy, reliable front-mount screws, and you can remove the magnet caps for tight installations. Blaupunkt deeply recesses the tweeters for a better fit wherever you choose to install them.

Details: woven carbon-fiber woofers • Santoprene™ rubber surrounds • silk dome tweeters • internal crossover networks • priced per pair • specifications on pgs. 55-56.

Buy Velocity speakers and save $150 on a 55 watts x 4 amplifier

Purchase two pairs of Blaupunkt Velocity car speakers or components and you can get a GTA4 amp for just $50. Offer valid through 12/31/06. Visit crutchfield.com/amps for specifications.

Free Cordless Screwdriver when you purchase any combination of Blaupunkt products totaling $149 or more. The Skil IXO palm-sized cordless screwdriver is a $39.99 value. Offer good while supplies last. Call for details.

Brian can help you install your speakers.
Toll-free tech support for the life of your gear.

SONY VH series **For intensity and clarity**

XS-V680HP

Combine crisp vocals, strong drumbeats, and solid power handling into car speakers, and you'll end up with Sony's VH Series.

The rugged, durable woofers produce authoritative bass that's free of distortion. Sony supports its woofers in rubber surrounds, which help the cones move accurately and hold up under extreme temperatures. The dome tweeters radiate the vocals brilliantly. The sound cuts through road and wind noise for a wide soundstage that makes your music sound more "live."

Details: H.O.P. (Highly Oriented Polyolefine) woofers • rubber surrounds • aluminum or film dome tweeters • pulp cone midranges on XS-V690HP • priced per pair • specifications on pg. 56.

- **XS-V160HP** 6½"/6¾" **#158XSV160H** $99.99
- **XS-V680HP** 6"x8" **#158XSV680H** $99.99
- **XS-V690HP** 6"x9" (3-way) **#158XSV690H** $99.99

VA series **Multiple drivers fill out the frequency spectrum**

Sony's VA speakers split up the audio spectrum into four parts and assign a specific driver to each, so you'll enjoy details from every range of frequencies. Each 4-way speaker has a woofer, midrange, tweeter, and supertweeter. Sony builds the woofers to accommodate deep bass, and they include durable cloth surrounds that resist environmental degradation. The midranges make the vocals sound rich and alive. Dome tweeters and supertweeters present the treble in crisp detail — it'll soar through heavy bass *and* your car's noise level.

Details: H.O.P. (Highly Oriented Polyolefine) woofers • cloth surrounds • paper dome tweeters (balanced-dome on XS-V6942A) • paper balanced-dome mids (cone on XS-V5742A) • priced per pair • specs on pgs. 55-56.

- **XS-V1342A** 5¼" **#158XSV1342** $64.99
- **XS-V1642A** 6½"/6¾" **#158XSV1642** $69.99
- **XS-V5742A** 5"x7"/6"x8" **#158XSV5742** $59.99
- **XS-V6942A** 6"x9" **#158XSV694A** $79.99

XS-V1642A

Everything you need — We'll help you pick the key accessories.

- **Window/door clip remover** — makes removing door parts easy and quick for a simpler installation.

- **Trim and panel remover** — carefully pries up plastic and metal door panels without damaging the door or the panel fasteners.
- **Baffles** — protect your speakers from dirt and moisture and decrease speaker rattle for clean, clear, long-lasting music.
- **InstallCards** — Get a prepaid InstallCard, and you can have your new speakers put in by any professional who's a member of the InstallCard network — more than 1,500 locations across the nation. You get all the benefits of buying from Crutchfield, and you save time, too.

Call us at 1-800-555-9430 or visit crutchfield.com to order.

- **Dynamat speaker kits**
Dynamat dampens annoying vibrations that impair speaker performance. Apply a high-tack speaker kit to the resonant metal or plastic surrounding your speakers for a noticeable improvement in the sound. For the best performance, choose Xtreme — it has four times more dampening effect than Original.

- **Dynamat door kits**
Get a handle on distracting road noise with Dynamat door kits. A single layer of Dynamat applied inside your doors will block outside noise and potentially provide the same effect as doubling your system's power — for a lot less money than you'll spend on an amplifier.

Installation helpers Tools for a quicker, smoother speaker installation

Car stereo tool kit

This kit includes a screw/nut driver with a variety of bits to help remove your old gear, a wire stripper/crimper, a digital multimeter for testing your connections, a handy panel removal tool, and connectors.

#142TK12V $19.99

Wavetek manual multimeter

Get fast, safe measurements of your car's electronics, then use it on your home appliances. Includes 9V battery.

#1205XP $59.99

Autoranging multimeter

Faster, easier voltage measurements

#12015XP $99.99

Wire cutter/stripper

A pull of the trigger strips 12- to 22-gauge wire. A built-in ruler measures the length of insulation to be stripped. It automatically adjusts for solid or stranded wire. The handle features a built-in wire cutter.

#18119000 $19.99

40-bit ratcheting screwdriver

The Pro Kit has an adjustable ratchet handle that angles for easy torque. It's perfect for removing screws that secure dash speaker grilles, getting to screws in hard-to-reach trim pieces, or working in any tight areas, whether in your car or at home.

#180SPK4042 $49.99

What's in the chart

Sensitivity: The higher a speaker's sensitivity rating, the louder it will play from the amount of power it receives. If you have a system without external amplifiers, or want to maximize output of the amplifier you do have, this is an important specification to consider.

Frequency response: This specification tells you the range of frequencies the speaker can reproduce. In general, the human ear can detect sound from 20 to 20,000 Hz.

Power ratings: RMS power is the power range a speaker can handle continuously without distorting. Peak power refers to how much power a speaker can handle during a brief musical burst.

Tweeters: Tweeters deliver different sound qualities based on their materials and construction. In general, a soft material like silk will produce subtler, more refined highs. Hard materials like metals will emit crisper, sharper highs. Cone shapes are built for efficiency, while domes disperse the sound over a wider area for more accurate sound reproduction. Semi-domes are a combination of the two designs. You can also enhance your system by adding component tweeters (pg. 48) or replacing your old tweeters. Think about what kind of sound you'd prefer before you decide. For more information on each speaker's material and construction, see the comparison chart below (and pg. 56) or visit crutchfield.com/carspeakers.

Surrounds: The surround is the soft ring around the woofer that supports the woofer and lends it mobility. Rubber surrounds are considered more durable and less prone to decay, and may provide better extension from the basket than foam or cloth. Foam and cloth are generally less expensive yet provide adequate support.

Mounting depth: Mounting depth in the chart is for a top-mount installation. Find bottom-mount depth and cut-out diameter specifications when you compare speakers at crutchfield.com. For more info call 1-800-555-9430.

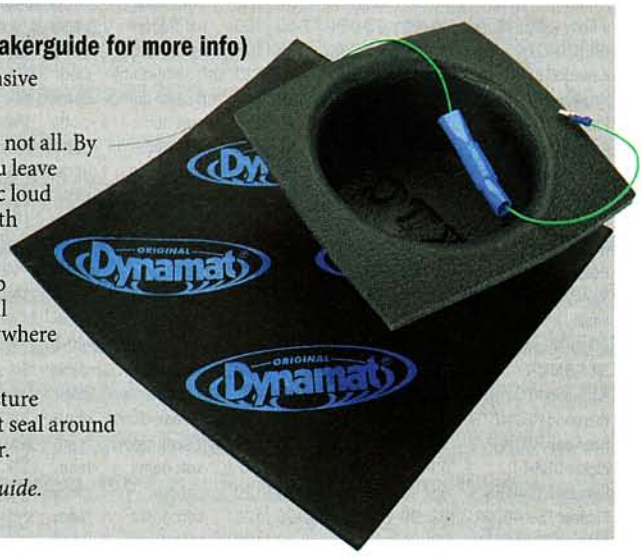
Help your speakers sound their best (see crutchfield.com/carspeakerguide for more info)

New speakers will greatly improve your car's sound system, and several easy, inexpensive accessories make them sound even better.

- **Bass blockers** Front speakers can handle some of your music's low frequencies, but not all. By transferring the lows to your biggest speakers, like a subwoofer or pair of 6"x9"s, you leave your other speakers to handle the high frequencies. You'll be able to play your music loud without distortion. Installed in-line on speaker wires, bass blockers are available with different filter settings, so you'll get the right ones for your speakers.
- **Noise dampeners** Products like Dynamat and HushMat (see pgs. 54 and 61) absorb and deaden the natural resonance of your car's body. These materials reduce general road noise and enhance the listening environment. They can be used just about anywhere there's a rattle on your car's body, even your license plate.
- **Speaker baffles** Fitted foam baffles serve a dual role. First, they keep dirt and moisture away from your speakers to maximize speaker life. Second, each baffle forms a tight seal around the speaker, which helps reduce resonance between your door panel and the speaker.

Find other helpful speaker articles and installation tips at crutchfield.com/carspeakerguide.



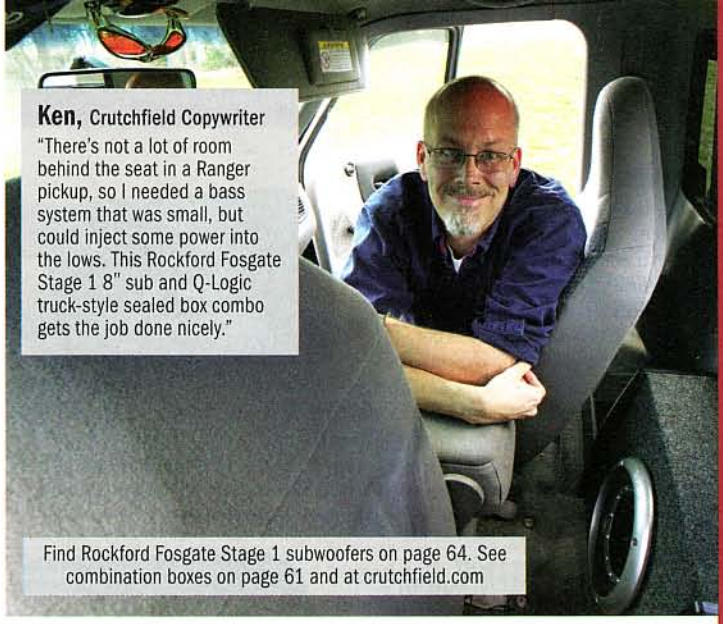
Free vehicle-specific installation instructions with your car speaker purchase. We take apart and put back together the car stereo systems of thousands of vehicles. Since we document every step of the process, you get the most accurate installation instructions in the business. See page 14.

Bass Packages

SHOPPING GUIDE

Easy options for fantastic bass

Without a subwoofer system in your car, you could be robbing your music of its full richness, as small car speakers aren't designed to produce lower tones. Subs aren't just for people who like loud music —all music benefits from added depth. Below, we'll discuss a few simple options for adding bass to your vehicle — these enclosed subwoofers are tuned at the factory to give you great sound, and are designed for easy installation. For a custom setup, see pages 64-66 for component subs.



Ken, Crutchfield Copywriter
"There's not a lot of room behind the seat in a Ranger pickup, so I needed a bass system that was small, but could inject some power into the lows. This Rockford Fosgate Stage 1 8" sub and Q-Logic truck-style sealed box combo gets the job done nicely."

Find Rockford Fosgate Stage 1 subwoofers on page 64. See combination boxes on page 61 and at crutchfield.com

Powered subwoofers — sub, amp, and enclosure in one

If you want the simplest method for adding bass, check out our powered subs, which include a sub (or subs), the enclosure and an amplifier. Most powered subs have speaker-level inputs, which easily connect to your factory stereo. Tap into your rear speaker wires, run power and ground wires, and enjoy the added presence of bass.

Which powered sub is right for you?

When choosing a powered sub, it's important to think about just how much bass you want. You'll be limited by how much power the amp has since it's built into the enclosure. Generally, higher wattage specifications for the subs and amps mean louder, deeper bass, but the enclosure type and placement are important too, as boxes interact differently with car interiors. Be sure to check your car's available space before deciding on a powered sub. See crutchfield.com for more information on our full selection of powered subwoofers. For a demonstration video on the installation of a powered sub, visit crutchfield.com/subvideo.

The Alpine LAT powered sub provides great bass without taking up much space. See page 58 for details.

Subwoofers in enclosures — just add an amp

Adding a subwoofer that's preloaded in an enclosure is a convenient way to get great bass. The sub and box are matched and tuned by the manufacturer to get the best possible response, so there's no need to research box and sub specifications on your own.

You'll need an amplifier to power your enclosed sub. When adding an amp, compare the sub's power-handling rating with the amp's output; it's best to keep the amp rating in the upper half of the enclosed sub's range. For example, if your enclosure's sub can handle 200 watts of RMS power, choose an amplifier that will deliver at least 100 watts continuously.

Which sub and enclosure combo sounds the best?

It depends on what kind of bass you want to hear. For tight, precise bass, consider the sealed enclosures. For more boom, check out ported and bandpass boxes with subs. Where you put these enclosures in your car and the amp you use will also affect their sound, so make sure you have enough room in your vehicle, and try a few different spots for sound if you can.

The TS10L5 includes a Kicker L5 sub that can handle plenty of power. See page 59.

Infinity • BassLink II *Compact powered subwoofer with free 4 x 35 watts amp expansion card*

The BassLink II takes up just one cubic foot of trunk space, but produces resounding bass. It integrates a 10" sub, a 10" non-powered speaker, and a 250-watt amplifier. An array of controls, like a remote, lets you tweak your bass until it has the sound you want. For even more great sound, slide the BassLink 4sc (free, while supplies last) into the expansion slot and you've added a 4-channel outboard amp. It'll send 35 watts to each of your car's front and rear speakers, in addition to the sub's 250 watts. The BassLink 4sc can also create a phantom center channel to improve the soundstage without adding an extra speaker.

Requires wiring, see pg. 69

BassLink II shown with BassLink 4sc

Get a free 4sc 4-channel amp expansion card
a $200 value, while supplies last

BassLink II details: variable low-pass crossover (50-120 Hz at 12 dB per octave) • output: 250 watts RMS • wired remote • warr.: 1 year • specs at crutchfield.com.

BassLink 4sc details: 4-channel amplifier expansion board • 35 watts RMS x 4 (50 watts x 4 at 2 ohms) • phantom center channel • warranty: 30 days • more specs at crutchfield.com.

#700BASS4CH $399.99
Includes free BassLink 4sc with BassLink II (while supplies last).

Requires wiring, see pg. 69

*The **BassLink** has a round 10" sub, a round non-powered speaker, and a 200-watt RMS amplifier (does not include BassLink 4sc).*

#108BASSLiN $299.99

BassLink

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75.

Lee can help you set up your bass system.
Toll-free tech support for the life of your gear.

Alpine • LAT powered subwoofers

PLV-7

Alpine's new LAT Subwoofer Systems arrange a series of small woofers end to end for space-saving bass. Sound output is equal to or better than that of much larger subs and enclosures. The PLV-7 has a 500-watt digital amp driving six 7" woofers. The PLT-5 has six 5" woofers, a 250-watt digital amp, and fits in most regular-size, standard-cab pickups.

Details: internal digital amp: 500 watts RMS (PLV-7); 250 watts RMS (PLT-5) • molded plastic cones • 23⅜"W x 13"H x 13"D (PLV-7); 21⅝"W x 13⅜"H x 8⅞"D1 x 6¹³⁄₁₆"D2 (PLT-5) • wired remote • warranty: 1 year • see crutchfield.com for specs.

PLV-7 **#500PLV7** **$699.99** *PLT-5* **#500PLT5** **$599.99**

Bazooka • Bass Tubes®

BTA10100

Bazooka's Bass Tubes powered subs add great sound to any vehicle. They'll fit into most spaces in your car or truck while providing plenty of deep, rich bass. These tubes combine a 100-watt amp with a poly-cone woofer. You can connect them to any system via speaker-level inputs.

Details: frequency response: 39-85 Hz • output: 100 watts RMS • low-pass filter (18 dB/octave at 85 Hz) • warranty: 1 year • see crutchfield.com for more specifications.

BTA6100 (6½" sub)	**#204BTA6100**	**$169.99**
BTA8100 (8" sub)	**#204BTA8100**	**$199.99**
BTA10100 (10" sub)	**#204BTA1010**	**$229.99**

See more Bass Tubes from Bazooka at **crutchfield.com**

New MTX • XT110P *Big bass*

Discover what your music's been missing with the X ThunderLink powered sub. A 100-watt amp powers the 10" sub for dynamic lows, and the enclosure has convenient front controls for bass boost, volume, and crossover adjustments. Included mounting brackets let you securely place it almost anywhere in the car. You also get a wired remote.

Details: frequency response: 39-150 Hz • output: 100 watts RMS • wired remote • preamp- and speaker-level inputs • dimensions: 15⅝"W x 12⅛"H x 8⅝"D • warranty: 1 year • more specs at crutchfield.com.

#236XT110P **$299.99**

Kenwood • KSC-SW1 *"Fits anywhere" powered sub*

Even a hard-to-fit vehicle can benefit from a lot of bass, thanks to the compact KSC-SW1. Kenwood uses a 6½" sub, powered by 150 watts maximum, and a 6½" non-powered speaker to get the most out of this solid system. The die-cast frame is extra rigid, so you won't hear any rattling from the box.

Details: frequency response: 35-120 Hz • maximum output: 150 watts • includes wiring • wired remote • preamp- and speaker-level inputs • dimensions: 15¾"W x 3¹¹⁄₁₆"H x 9¹⁄₁₆"D • warranty: 1 year • more specs at crutchfield.com.

#113KSCSW1 **$249.99**

JVC • CS-BB2 *Amazingly compact*

Want to get bass out of a tight space? Put JVC's CS-BB2 compact powered subwoofer to work in your car. The slim cabinet houses a 6" subwoofer and amplifier, with a low-pass filter built in to tailor the output. A wired remote control gives you fingertip control of the bass volume.

Details: frequency response: 20-200 Hz • output: 32 watts RMS x 2 • includes wiring • wired remote • preamp- and speaker-level inputs • dimensions: 11⁷⁄₁₆"W x 2⁷⁄₁₆"H x 7⅞"D • warranty: 1 year • more specs at crutchfield.com.

#105CSBB2 ~~$199.99~~ **SALE $149.99** *Offer valid through 12/31/06*

Audiobahn • Powered Subs

Save up to $70
Supplies limited

ATB8AT

Audiobahn's all-in-one powered enclosures give you great sound and mount neatly in your trunk. Each enclosure includes a stout built-in amp and woofer. A wired remote rounds out the package.

Details: variable low-pass filter (40-250 Hz, 18 dB/octave) • output (watts RMS): 80 (6"), 100 (8", 10") • includes wiring • warranty: 1 year • more specs at crutchfield.com.

Strapped for space? You *can* have bass

The JVC CS-BB2 fits neatly under the seat of Angie's Jeep TJ

Angie, a home audio merchandising specialist at Crutchfield, loves driving her Jeep. But with the top down, the sound of her stereo can get blown away by wind and road noise.

Adding a compact powered subwoofer has made all the difference. "Not only does it improve the overall sound of my stereo, but it has enough power to really kick out the tunes when it's time to get shaking."

Rockford Fosgate *Enclosures at sale prices*

Offer valid through 12/31/06

The PL2 sub enclosure combines a vented enclosure with a Punch Stage 2 woofer for powerful bass. The woofer has a molded cone for crisp, clear sound, and the fiberboard box is built to match the sub for optimum response.

PL2-110

PL2 single 10" details: frequency response: 20-200 Hz • sensitivity 85.8 dB • power range: 50-200 watts RMS • warranty: 1 year (woofer only) • more details and specifications at crutchfield.com.

MTX ThunderForm enclosures

Thunderous sound, incognito

You've probably got everything but great bass in the hideaway spots in your vehicle. ThunderForms are custom-sculpted enclosures that match specific vehicles' interior color schemes, and many are available pre-loaded with MTX subwoofers and amps. The chart below shows our most popular models. To find the ThunderForm that's right for your car or truck, check out crutchfield.com/whatfits or call 1-800-555-9430.

ThunderForms fit in the unused spaces in your car, truck, or SUV.

This ThunderForm for a 2002-up Dodge Ram Quad Cab boasts two Thunder4500 woofers and a specially designed 200-watt amplifier.

ThunderForms enclosures	Color	Qty/size of subs	Item number	Your price
93-03 Camaro/Firebird	Black	**one 10"	236CF1AT45	$549.99
04-06 Chevy Colorado	Charcoal	**one 10"	236COLCAT4	$549.99
99-02 GM Extended Cab Truck	Charcoal	**two 10"	236CXP2ACT	$649.99
98-03 Dodge Durango	Black	**one 8"	236DD8AT45	$549.99
00-04 Dodge Dakota Quad Cab	Black	*one 10"	236DDQ1T45	$349.99

* Subs included / ** Includes amplifier and subs

Q-Customs by Q-Logic

Hide the sub, not the bass

Get great bass from your subwoofer without your passengers ever seeing the sub. A form-fitting Q-Custom enclosure by Q-Logic puts your component sub where only the ear can detect it by using your unused cargo room or excess space. Most Type 1 component subs (pages 64-66) will fit these enclosures. The chart below shows our most popular models. To see if one fits your vehicle, call 1-800-555-9430 or go to crutchfield.com/whatfits.

Q-Logic subwoofer enclosures match the factory colors in your vehicle's interior.

This Q-Custom enclosure fits inside the center console of a 2000-02 GMC or Chevy truck or SUV.

Q-Customs enclosures	Color	Qty/size of subs	Item number	Your price
02-06 Acura RSX	Black	one 10"	044C1RSA01	$229.99
93-03 Camaro/Firebird	Black	two 12"	044CFT2201	$289.99

• Mod-Pod

Mod-Pods mount below the doors and hold 5¼" speakers. For 1987-up Wrangler models. Sold in pairs.

#663MODPOD **$79.99**

• Quad-Pod

Quad-Pods hold 6½" speakers and 8" subs in dual pods behind the rear seat of CJ7s, TJs, and YJs. Sold in pairs.

#663QUADPOD **$189.99**

• XJ-Pod

The XJ-Pod enclosure holds an 8" subwoofer. Mounts in the rear of 1984-2001 Jeep Cherokees.

#663XJPOD **$89.99**

• Centra-Pod

The Centra-Pod holds two 5¼" speakers and mounts on the transmission hump of 1955-1995 CJs and Wranglers.

#663CENTPOD **$64.99**

Q-Logic subwoofer enclosures *Let Q-Logic do the building for you*

Q-Logic enclosures are designed to help you get the most out of your sub by combining tasteful looks with rugged construction. Built for performance, they're a great option when you don't have the time or tools to build your own box. Just mount your sub according to the Q-Logic's simple numeric system and let the low tones pound.

Four types of boxes

Match the Q-Logic box type number listed here with the box type number listed for component subs on pages 64-66:

- **Type 1** Small sealed boxes, for "tighter" bass. A truck box is slimmer to fit behind truck seats, while a hatch box can hold a deeper sub.
- **Type 2** Medium boxes, for sealed or ported (vented) applications. Ported boxes produce bass with more "thump."
- **Type 3** Big boxes, both sealed or ported.
- **Type 4** Bandpass boxes (a ported chamber houses a woofer that projects into a sealed area, for bass that's efficient and loud).

One enclosure – sealed and ported

Type 2 and Type 3 boxes come as vented boxes with a pre-cut port hole. You can cover the hole with the included plug, and convert your ported box into a sealed one for more accurate bass. The QXs ring accommodates most round subs and seals the box for the best possible sound.

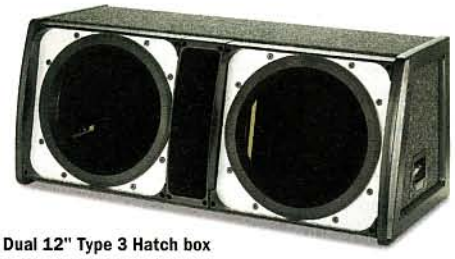
1) Lay out all the pieces when you begin the installation.

2) Insert the QXs ring into the enclosure opening.

3) Mount the woofer to the ring and box, and you're ready to rock.

12" Type 1 Hatch box

10" Type 1 Truck box



Dual 12" Type 3 Hatch box

Dual 12" Type 4 Bandpass box

Sub size	Box style BP=bandpass	Box type	Internal volume (cubic feet per sub) P=ported, S=sealed	External dimensions (inches) D1=Bottom Depth, D2=Top Depth	Item number	Your price (each)

HushMat • Sealing caulk and tape

Apply the finishing touch with HushMat products. The Ultra H-2-O sealing caulk is a water-based paste that can be easily applied with a caulking gun, and is perfect for knocking out noise in corners or other hard-to-reach areas of your vehicle. The HushMat Quiet Tape Kit dampens rattles caused by cables and wire harnesses by securely holding them in place. Just peel the tape strips, stick them on the offending wires, and attach them to the vehicle's surface.

HushMat Ultra H-2-O dries quickly, and is sandable and paintable.

Ultra H-2-O Sealing Caulk **#658C100** **$54.99**

Quiet Tape (five 2" x 6" pieces) **#658PF100** **$12.99**

Dynamat • Trunk kit *Reduce road noise*

Here's the way to better bass response and sound. Apply Dynamat acoustic treatment to your trunk, and end the rattles that come from the pounding of your subwoofer. Dynamat also reduces road noise, so your music sounds clearer. Use the Dynamat Original to line the floor and apply the aluminum-coated Xtreme to the trunk lid and side walls to keep the bass in your trunk sounding tight and clean.

#15419105X $129.99

(This trunk kit contains 3 sheets, 12 sq. ft. total, of Original and 2 sheets, 8 sq. ft. total, of Xtreme.)

Get Dynamat for your doors, too. See page 54 or visit crutchfield.com.

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75.

Cris can help you set up your car sub.

Component Subs

SHOPPING GUIDE

Your ticket to personalized bass

When you drive without dedicated bass in your vehicle, you're only hearing part of your music's message. All types of listeners can enjoy the added depth a component subwoofer system can bring, not just fans of bass-heavy styles of music. Component subs, when properly matched with an enclosure and amplifier, give your music vitality and fullness that are rich and satisfying.

Component subs offer installation choices to reflect your personality and bass needs. Their flexibility lets you design a unique setup from different sizes and styles.

Matt, Crutchfield car A/V copywriter

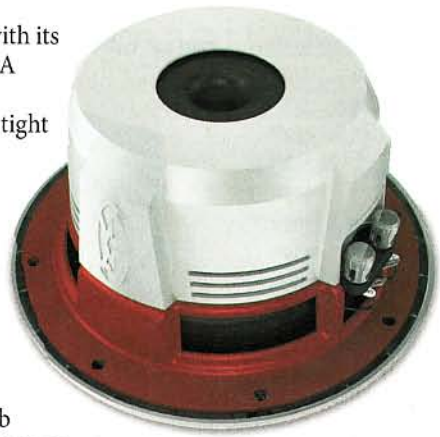
"I love the versatility of a component sub. I can throw my sub in a different enclosure and get a totally new sound. Mixing and matching my subwoofer with various amps lets me dial in just the right kind of thump."

The versatility of a component sub

Choosing a component sub over a pre-loaded enclosure gives you more options. You can pick up an entry-level sub and build your own box for a less than a pre-loaded sub box, and configure your system with an amp and wiring that suits your needs. You can put a bigger sub in a pre-made box for big bass. Or you can design a component sub system around specially molded enclosures for a custom look.

Which sub sounds the best?

The sound your sub will produce has a lot to do with its size and your enclosure. A smaller sub in a sealed enclosure will produce a tight bass note and is better suited to lighter music and jazz. Larger subs, especially when placed in ported enclosures, tend to produce a boomier sound, and are better suited to hip hop and hard rock tracks. Where you place your sub in your vehicle will also have an effect on the sound, and is important when choosing your sub. Call 1-800-555-9340 for more information on placement.



Find great deals on Rockford Fosgate Punch subwoofers on page 64 and at crutchfield.com

You'll also need an amplifier

Component subs can handle all sorts of power, so match the sub's power rating with your amp's output. Check out pages 67-70 to find the right amp for your sub. For more options when setting up your system, consider our dual voice coil subs. When wired in parallel, they can draw big power from an amp, or create a safely fitted multi-sub setup when wired in series. For more information on sub wiring options, see the wiring diagrams at crutchfield.com/subwiring.

What type of enclosure do I need for my component sub?

- The size of your sub, your space limitations, and what type of music you enjoy will determine which one is right for you. We carry a number of pre-made enclosures that suit all types of subwoofers. See pages 60-61, or check out crutchfield.com/enclosures for our full selection.
- Building your own box is also an option. You can build a simple enclosure for relatively little money, or go all out and fabricate a custom multi-sub setup. It all depends on the amount of time you want to put into it and your level of comfort with the construction process. We have the accessories to help you form your own enclosure, as well as tips for putting everything together. See crutchfield.com for more info.

Building your own enclosure gives you the freedom to choose any sub and gives your ride a custom look. Visit crutchfield.com/boxhowto for detailed instructions on box building.

Do I have to alter my vehicle to add a sub?

Pioneer TS shallow-mount subs make it easy to put a sub almost anywhere. See page 65.

Not at all. Component subs actually make it a little easier to retain free space, as you can build the enclosure to fit just about anywhere in your trunk or cargo area. Select your subwoofer size based on how much space you can spare and the enclosure volume the sub requires. Don't forget that a larger power rating usually means needing a larger amp. Give us a call at 1-800-555-9340, and we'll help you find the best one for your bass needs.

See and compare more models at **crutchfield.com/subs.** Chart continues on page 64.

Notes: power handling for dual voice coil models is for both coils combined. N/A in the "box type" column means we don't have a ready-made box, but you can build your own using our accessories. Call 1-800-555-9340 for more information. Chart and chart glossary are continued on page 64. †Sale and ††price-for-two offer good through 12/31/2006. *Buy one get one free offer good while supplies last through 12/31/06.

What's in the chart

Power range: An external power amplifier is required to drive any component subwoofer. Don't try to drive one with your in-dash stereo's built-in amplifier, as it won't sound good and may even damage the stereo. The low number listed is the minimum wattage required to get acceptable sound from the subwoofer. For best results, use an amp that provides a power level (RMS, or continuous watts) on the upper end of the subwoofer's recommended range (RMS). See pages 67-70 for amps.

Frequency range: The range of sounds from lowest to highest that the sub is capable of reproducing. The actual range you'll hear can vary depending upon the type of box, crossover point, and the vehicle in which the subwoofer is installed. Under most circumstances, a typical sub will play slightly deeper than its published figures indicate. So, don't base your choice solely on this specification.

Impedance: The resistance, measured in ohms, offered by a speaker to the flow of alternating current. A sub rated at 2 ohms will produce more output than a 4-ohm sub, given similar input wattage, because the resistance is lower. Check out the definition of dual voice coil subwoofers below to find out more about wiring your sub to get the desired impedance. See pages 67-70 to find a compatible amplifier.

Dual voice coil: While typical speakers have one voice coil, dual voice coil (DVC) subs with two sets of wire terminals allow you the advantage of flexibility in wiring your system. Parallel wiring provides for maximum amplifier output, while series wiring lets you configure multiple woofers to one amplifier at an acceptable impedance. In series/parallel mode, you can wire 4 woofers to a single amp, for example, and still maintain a compatible impedance. See crutchfield.com/subwiring for more details on wiring your amplifier and sub.

What's in the chart

SPL: Sound pressure level, also referred to as efficiency, measured in decibels (dB). The higher the number, the more efficient the sub is at turning amp power into sound, and the louder it plays.

Depth (inches): The depth of the subwoofer when installed from above the mounting surface.

Sealed box volume: Recommended volume in cubic feet. If no range is specified, a variation of up to 20 percent is acceptable.

Ported box volume: Recommended volume in cubic feet. If no range is specified, a variation of up to 20 percent is acceptable.

Box type: Pick up a sub box from pages 60-61 or visit crutchfield.com/enclosures for more options.

1. Small sealed box
2. Medium sealed or ported box
3. Large sealed or ported box

Alpine • Type-E subwoofers

Save big when you buy a pair

Double your bass with two Type-E subs, and enjoy deep notes at a discount. The specially designed pulp cone is treated with Kevlar®, which gives the sub superior strength and tension for hard-hitting bass. That means warm, accurate sound with no distortion when you crank up the volume.

Details: Kevlar-treated pulp woofer cone • Santoprene rubber surround • power handling: 250 watts RMS • warranty: 1 year • specs, page 63.

Infinity • Kappa Perfect subwoofers

Infinity knows the way to "perfect" bass — these high-end Kappa Perfect series subs. They deliver smooth, strong, and loud bass. The lightweight aluminum cone with rubber surround gives you true bass reproduction, and the vented basket means the sub keeps cool as your music stays hot.

Details: aluminum cone • high-roll butyl rubber surround • cast-aluminum basket • single or dual voice coil • warranty: 3 years • specs, page 63.

Kappa Perfect 10.1

10" 4-ohm **#108PER101** **$149.99**** *12" 4-ohm* **#108PER121** **$179.99****

Infinity • Reference Series subwoofers

No matter what kind of bass you like, count on Infinity to reproduce it in realistic fashion. A Reference sub brings vitality to your music with a lightweight cone that delivers sharp and precise low notes. A rubber surround centers the cone, minimizing distortion that could make your bass sound dull and lifeless.

Details: polypropylene woofer cone • large-roll rubber surround • power handling (watts RMS): 250 (10"); 300 (12") • warranty: 1 year • specifications, page 63.

1250W

****Buy one Infinity Kappa Perfect or Reference subwoofer, get one free** While supplies last. Offer good through 12/31/06.

Pioneer • GM subwoofers

Pioneer molds their GM subs' deep blue woofer cones from light, strong materials and suspends them in pliable and sturdy surrounds. A molded gasket ensures an airtight fit, and the 4-layer voice coil holds up to heavy use. These subwoofers are built for use in smaller sealed boxes — perfect for accurate, tight bass.

Details: IMPP cone • urethane surround • power handling (watts RMS): 120 (10"); 150 (12") • warranty: 1 year • specifications, page 63.

TS-W301R

10" **#130TSW251R** **$69.99** PRICE BREAK 2 for $89.99

12" **#130TSW301R** **$79.99** PRICE BREAK 2 for $99.99

Pioneer • TS shallow-mount subs

Pioneer has come up with a way to put big bass in the tightest quarters. These TS series subs are less than 4" deep, so you can mount them in extremely shallow boxes. They'll fit easily behind most truck bench seats while still thumping just as hard as conventional subs. A special suspension uses air to create big sound from these shallow subwoofers, as well as to make them more durable. See crutchfield.com for TS-specific enclosures from Pioneer.

TS-SW3041D

Details: IMPP double cone • fiber surround • power handling (watts RMS): 250 (10"); 350 (12") • warranty: 1 year • see pages 63-64 for specs.

10" **#130TSS2541** **$179.99** *12"* **#130TSS3041** **$199.99**

Boston Acoustics • G2 subs

The G2 can thrive in either a small sealed enclosure or a vented box, so you can decide if you want tight or boomy bass. The 4-layer voice coil handles big power for hours without failing or melting down. The dual voice coil (DVC) option gives you more flexibility in wiring for big sound or multiple subs. Boston's Sure Set fuse design makes it simple to select impedance on the dual voice coil models, plus protects the sub from power surges.

Read the review: crutchfield.com/g2

G210-4

Details: copolymer woofer cone • foam surround • single or dual voice coil design • warranty: 2 years • specifications, page 63.

10" 4-ohm **#065G2104** **or** *10" DVC 4-ohm* **#065G21044** **$179.99**

12" 4-ohm **#065G2124** **or** *12" DVC 4-ohm* **#065G21244** **$199.99**

JBL • Grand Touring subwoofers

JBL GTO subwoofers work great in sealed or ported boxes, and are shallower than most subs from other makers — they'll fit in more vehicles without sacrificing space or performance. The cone's dustcap lends reinforcement for distortion-free sound. Dual voice coils (except 8") let you wire the subs to get more power from your amp.

GT01204D

Details: polypropylene woofer cone • rubber surround • power handling (watts RMS): 200 (8"); 250 (10"); 300 (12", 15") • warranty: 1 year • specifications, page 63.

12" **#109GT1204D** **$99.99**

15" **#109GT1504D** **$139.99**

Kenwood • "Typhoon" subwoofers

You'll be surrounded by great bass with Kenwood's "Typhoon" subwoofers. The graduated ridges on the surface of the cone add firmness and durability. Plus, Kenwood has widened the surround and attached it to the top of the cone for reliability. These design elements control distortion for improved sound.

Details: polypropylene woofer cone • power handling (watts RMS): 175 (10"); 200 (12") • warranty: 1 year • specifications, page 63.

W2510

10" **#113W2510** **$89.99** PRICE BREAK 2 for $119.98

12" **#113W3010** **$99.99** PRICE BREAK 2 for $129.98

Sony • Xplōd P5 subwoofers

P5 subs carry on Sony's legacy of high performance. The stiff cone and expansive surface area give you crisp sound and accurate reproduction of the bass in your music. The P5 is made to work best in small enclosures, so it won't take up a lot of room in your car or truck.

XS-L123P5B

Details: polypropylene cone • rubber surround • power handling (watts RMS): 330 (10"); 380 (12"); 450 (15") • warranty: 1 year • see chart, pgs. 63-64 for specs.

Kicker • Comp subwoofers

Built to deliver heavy-duty bass

C104

Kicker Comp subs feature a rigid polymineral cone with double-stitched, ribbed foam surround that delivers precise low tones. The heavy-duty steel basket provides a rock-solid housing for the cone, while the Inverted Structural Dome cuts down on flexing, which causes distortion. Perimeter venting dissipates heat quickly.

Details: polymineral cone • double-stitched, foam surround • high-strength steel basket • power handling: 50-150 watts RMS • warranty: 1 year • specs, page 63.

10" **#2065C104** **$89.99*** *12"* **#2065C124** **$99.99***

***Buy one Kicker Comp or CompVR subwoofer, get one free** While supplies last. Offer good through 12/31/06.

New Blaupunkt • Velocity Series subwoofers

Vw1200

Velocity series subs tackle massive power to deliver booming, yet accurate bass, and they sport woven carbon fiber/fiberglass hybrid cones for extra durability. Their oversized, 2-ohm dual voice coils make sure your low notes are deep and true, and give you wiring options for a custom, high-output system.

Details: woven carbon fiber/fiberglass cone • rubber surround • power handling (watts RMS): 1,000(10"); 1,200 (12") • warranty: 1 year • see page 63 for specifications.

10" **#023VW1000** **$229.99**

12" **#023VW1200** **$249.99**

MTX • Thunder4500 subwoofers

T4510

Add some bass artillery with the Thunder4500 Series subs, and put low-frequency impact in your system for deep, rich sound. These subs use carbon-filled polypropylene cones with foam surrounds for quality lows, and offer high output with low distortion.

Details: carbon-filled poly cone • foam surround • warranty: 1 year • specs, pg. 63.

10" **#236T4510** **$89.99**

12" **#236T4512** **$99.99**

Blaupunkt • PC Series subwoofers

PCwb1000

Blaupunkt PC subs deliver accurate bass without breaking the bank. A stiff, injected poly cone pounds with strength and durability, while the foam surround allows precise excursion. The strong stamped-steel basket anchors this sub for solid performance, even when pushed hard, giving you steady, reliable bass.

Details: injected-polymer cone • foam surround • power handling: 200 watts RMS • warranty: 1 year • see chart, page 63, for specifications.

10" **#023PCWB10** **$59.99**

12" **#023PCWB12** **$69.99**

Polk Audio • Polk/MOMO subwoofers

MM2104 pictured with optional grille, available at crutchfield.com

When a leader in the racing world teams with a leader in car audio, you get these high-performance Polk/MOMO subs. They sport refined looks and deliver full, pounding bass. The woofer cone is treated with aluminum for strength.

Details: metalized polypropylene cone • butyl rubber surround • suitable for marine use • power handling (watts RMS): 200 (8"); 300 (10"); 400 (12") • warranty: 3 years • specs, pgs. 63-64.

12" **#107MM2124** **$139.99**

Pick the right box for your new subwoofer

Any component subwoofer needs a sturdy enclosure to sound its best, and we have the ideal one for you and your needs. Enclosures from manufacturers like Q-Logic spare you the hassle of building your own box for your subwoofer. Sealed and vented boxes are available for tight or boomy bass, respectively. Several options for enclosures are listed on pages 60-61. For our full selection, see crutchfield.com/enclosures or call us at 1-800-555-9430.

Car Amplifiers

SHOPPING GUIDE

Make your music powerful

You get better sound quality when you add an amp to your car's stereo system. The high notes in your music become brighter, the bass booms with more authority, and upgraded speakers perform more efficiently, without straining. If you want to add a subwoofer, an amp is a necessity. Look for high- and low-pass filters and bass boosts that let you tweak the signal to best match your speakers' characteristics. There's an amplifier with appropriate features for every stereo system — even your factory stereo. For help finding the amp best suited for yours, see crutchfield.com/amps or call 1-800-555-9430.

How many channels and how much power should my amp have?
A 4-channel amp will drive all the speakers in your car (left and right, front and rear). If you decide to add a subwoofer, you can power it with a mono (1-channel) amp. You can use a 2-channel amp to power two speakers, or bridge (combine) the two channels to drive a single sub. It's best to match your amp's RMS power output to the upper range of your speakers' wattage rating.

Todd,
Crutchfield Sales Advisor
"This was my first aftermarket system ever and I decided to go all out. The amps really changed the way my speakers performed: much more volume and increased clarity. Power makes all the difference."

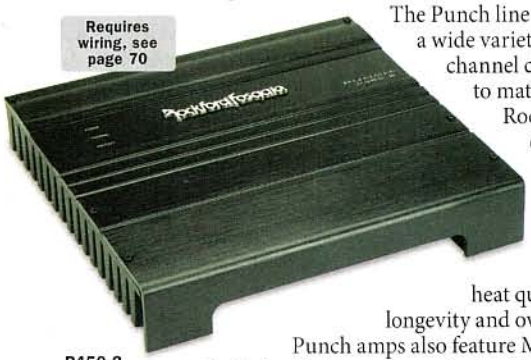
Rockford Fosgate • Punch series amps



Requires wiring, see page 70

P450.2

The Punch line of amps offers a wide variety of power and channel configurations to match your needs. Rockford Fosgate designed these amps with a casing that's about function as much as form — specially designed heatsinks dissipate heat quickly, increasing longevity and overall performance. Punch amps also feature MOSFET circuitry for lightning-fast response and accurate sound reproduction. You hear your music the way it was recorded, without any added noise from the amplifier or other sources.

Details: variable bass boost (0-18 dB at 45 Hz) with remote control • preamp-level inputs • variable high- and low-pass filters (40-400 Hz at 12 dB/octave); low-pass filter only on P600.1BD (35-250 Hz at 12dB/octave) • preamp outputs • CEA-2006 compliant • warranty: 1 year • see page 70 for specifications.

Alpine • V-Power amps *Refined looks, solid reliability*

Requires wiring, see page 70

MRP-M650

V-Power amplifiers give you the sound and quality that made Alpine famous. And with a sleek black casing, these amps stand out in performance *and* appearance.

Highly efficient power supplies give you fast response, and the case's design dissipates heat that can rob your amp of power and shorten its life. High- and low-pass filters (low-pass only on single-channel amps) put you in control of the frequencies that reach your speakers. A variable bass boost ensures plenty of low-end punch, and you can connect a V-Power amp to most stereo systems thanks to the speaker-level inputs.

Details: variable high- and low-pass filters (50-400 Hz, 12 dB/octave) on 4-channel amps • variable low-pass filter (50-200 Hz, 24 dB/octave) on mono amps • variable bass boost (0-12 dB at 50 Hz) • preamp- and speaker-level inputs • MOSFET power supply • CEA-2006 compliant • warranty: 1 year • see chart, page 70, for specs.

Sony • Xplōd amps *Breathe new life into your music*

Sony designed its popular Xplōd amps for outstanding performance. Each amp has an inverted heat sink that gives you smooth looks while keeping vital internal components running cooler and lasting longer. Special speaker-level inputs make it easy to add these amps to your factory stereo by telling the amp to turn on as soon as your speakers get a signal from your radio. Removable terminal covers keep all the wire connections safe and out of sight for a clean look when installed. A low-pass filter and a bass boost feature let you adjust the signals going to your subs.

***Add two 10" subs for just $40 more**
Buy an XM-2002GTR amp and add two 10" Sony XS-L100P5H subs for only $40 – that's an $80 value. Offer good while supplies last.
#700XM2002X $239.99

Details: low-pass filter (50-300 Hz, 12 dB/octave) • variable bass boost (0-10 dB at 40 Hz) • preamp- and speaker-level inputs • preamp outputs • MOSFET power and output stages • CEA-2006 compliant • warranty: 1 year • see chart, page 70, for more specifications.

$50 instant savings Buy a Kenwood amplifier and two pairs of Kenwood car speakers, and you'll save $50 on the combined price instantly. Offer good 11/01/06-12/31/06.

Infinity • Reference amps *Versatility to fit your system*

7541a

Whether you're powering a set of speakers or pumping out low bass from a sub, there's a Reference amp ready for the job. These Infinity amps offer a wide variety of channel configurations, so you can power more speakers with fewer amplifiers. High-output power supplies ensure maximum power delivery and efficient operation. Use the variable high- or low-pass filters to contour the sound and send the right signals to your speakers. Pick up the optional wired remote ($19.99), compatible with all models except 7521a and 7541a, to make bass adjustments from your front seat. Speaker- and preamp-level inputs make it easier to add a Reference amp to any system, including a factory stereo. The preamp outputs let you easily connect multiple amps without running more cables to the back of your stereo.

Details: variable low-pass filters (32-320 Hz) • Dynamic Bass Optimization on mono amps • preamp-/speaker-level inputs • preamp outputs • CEA-2006 compliant • warranty: 1 year • optional bass remote (#108RC100) • see chart, pg. 70, for specs.

7521a	*97W x 2 or 283 x 1*	**#108R7521A**	**$199.99**

Pioneer • GM amps *Power to customize your sound*

GM-6200F

An amp's always a great way to upgrade your in-car listening experience, and Pioneer's GM amps are ready to provide the power and sound quality you're looking for. Efficient power supplies produce the raw energy for these amps, so they'll keep up with demand when you've got the system cranked. The GM-5200T and GM-6200F have frequency filters that are well-suited to any task, whether it's supplying the kick to some subs or powering full-range speakers. A bass boost circuit on the GM-5200T and GM-7200M adds some extra bump to the lows. All three models boast speaker-level inputs so you can add them to any system. The RCA preamp outputs on the GM-6200F make it easy to install additional amps.

Details: high-pass/low-pass filter (80 Hz, 12 dB/octave) on GM-5200T, GM-6200F • low-pass filter (40-240 Hz, 12 dB/octave) on GM-7200M • bass boost on GM-7200M and GM-5200T (0-12 dB at 50 Hz) • preamp- and speaker-level inputs • preamp output on GM-6200F • MOSFET power supply • CEA-2006 compliant • warranty: 1 year • see chart, page 70, for more specifications.

GM-5200T	*125W x 2 or 380 x 1*	**#130GM5200T**	**$159.99**
GM-6200F	*60W x 4 or 150 x 2*	**#130GM6200F**	**$199.99**
GM-7200M	*250W x 1*	**#130GM7200M**	**$179.99**

Kicker • ZX amps *Deliver rock-solid performance*

Requires wiring, see page 70

ZX350.4

When you want to drive your mobile audio system with clean, steady power, nothing fits the bill like the ZX series amps from Kicker. Kicker's styling gives these amps a unique look, and they're designed with convenient features, like top-mounted controls and speaker-level inputs. Contour your sound with filters that can be set for high-pass, low-pass, or full-range operation. This allows you to select the precise frequencies to send to your speakers and subs. If you're looking for a low-frequency kick, the remote-controlled bass boost lets you adjust the thump from the driver's seat.

Details: high-pass/low-pass filters (50-200 Hz, 12 dB/octave; low-pass only on mono amps) • bass boost (0-18 dB at 40 Hz) with wired remote • preamp- and speaker-level inputs • preamp outputs • CEA-2006 compliant • warranty: 2 years • see chart, pg. 70, for more specifications.

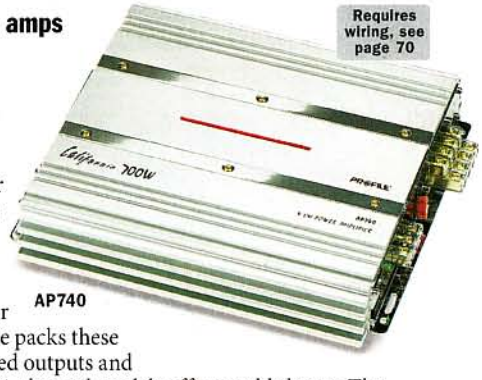
Profile • California amps *3-year warranty*

Requires wiring, see page 70



AP740

A California amp from Profile gives your system a touch of west coast style — not to mention a high-powered kick. Their brushed aluminum cases and red power strip lights make these amps look good, and efficient power supplies make your music sound great. Profile packs these amplifiers with gold-plated outputs and variable filters, and both 4-channel models offer a treble boost. The variable bass boost lets you control the level of your low notes.

Details: preamp- and speaker-level inputs • preamp outputs • variable bass boost (0-12 dB at 45 Hz) • low pass filter (50-250 Hz at 12 dB/octave) • warranty: 3 years • see chart, page 70, for specifications.

Amplifier wiring kits

StreetWires • Amp wiring kits

Give your amp solid connections with a StreetWires amp wiring kit. Each kit has what you need in one handy package, including an 18' power cable, 5' ground cable, fuse, fuse holder, butt connector, terminals, and cable ties. Some kits also include a 16.4' RCA patch cable with built-in remote turn-on lead. The 4-gauge multi-amp kit contains additional 8-gauge cable plus a distribution block for up to 4 amps. See chart on page 70 to find the amp wiring gauge your amp needs. Warranty: lifetime.

EFX • Amp wiring kits *Complete kits for your amp*

Make sure you enjoy the full potential of your new amplifier by hooking it up with quality power and signal connections. These cost-effective kits have everything you need to install your amp: 17' power wire, remote wire, 17' RCA patch cable, 4' ground wire, fuse, fuse holder, and terminals. Check the wiring kit gauge column in the comparison chart on page 70 to find the kit size your amplifier requires. Warranty: 1 year. (No warranty on fuses.)

10-gauge kit **#142PA10** **$19.99**
8-gauge kit **#142PA8** **$29.99**
4-gauge kit **#142PA41** **$49.99**

*Offer valid through 12/31/2006.

What's in the chart?

RMS vs. peak power at 4 ohms: RMS power is the amount of continuous wattage that an amp produces. Peak power is the maximum wattage an amp can deliver in a short burst. Most speakers are rated at 4-ohms.

RMS power at 2 ohms: This specification tells you how much power your amp delivers when presented with a 2-ohm stereo load. You can achieve a 2-ohm load by parallel wiring two 4-ohm speakers on each channel or using 2-ohm speakers.

Bridged power: Combines the power output of two channels into one channel. Bridging allows you to drive one speaker with more power than the amp could produce for two speakers.

Speaker-level inputs: Let you send a signal to the amplifier from the stereo's speaker wires. This is helpful if you don't want to replace your factory stereo, but still want more power for your speakers.

Filters: A low-pass (LP) filter allows only frequencies below a certain point to be amplified and is often used to keep high frequencies from reaching a subwoofer. A high-pass (HP) filter allows only frequencies above a certain point to be amplified — useful for keeping low bass away from small speakers, so they can play more efficiently.

"Continuously variable" filters can be freely adjusted to any frequency between the listed end points. "Selectable" filters let you choose from several preset points.

Bass boost circuit: Increases the output of low frequencies. Many amps allow you to increase the bass level in dB increments (for example, 0-12 dB at 45 Hz).

CEA compliant: These amps meet the Consumer Electronics Association's voluntary power rating standards for fair output comparison.

Wiring gauge: An amp needs a power wire connected to your car's battery, plus a ground wire. Use this number to choose a kit from the selection on page 69 or at crutchfield.com/wiring.

Beltronics • STi Driver *Completely invisible to detectors*

The STi Driver is the first radar detector that's completely invisible to electronic detection. TotalShield™ technology prevents the emission of frequencies that typically trigger advanced radar detector detectors. You also get advance warnings for laser and radar from two forward-facing antennas and multiple laser sensors. An amplified external speaker means you'll hear alerts over road noise and music.

Details: • 3 city modes • 360° total protection • VG2 and Spectre cloaking • POP detection • mute/auto-mute modes • warranty: 1 year.

#083STiDRVR $454.99

What sets the STi Driver apart from other detectors

Most radar detectors emit certain frequencies as they search for radar signals; standard VG2 radar detector detection (RDD) devices work by finding these frequencies. VG2 technology, however, works only on a single frequency and has been defeated by most detectors. Newer "Spectre" RDD devices work on a wide frequency band, and can detect the frequencies a detector emits more easily. The Beltronics STi Driver uses advanced technology to prevent "leakage," or emission of these frequencies. Without leakage, the STi Driver remains completely invisible to all forms of RDD.

STi Driver with case

Beltronics • Pro RX65 radar detector

Instant alert to keep you informed

The Pro RX65 has impressive range and an all-digital design for superb accuracy. With Threat Display, you can track multiple radar signals and their strengths. Warranty: 1 year.

Pro RX65

Details: alerts for radar, laser, SWS, and VG2 • software upgradable • VG2 immunity • Ku band detection • frequency display • voltage meter.

#083RX65 $334.99

• **Pro RX55** *Lots of features, lower price*

The same detector, minus Threat Display, with a black casing.

#083RX55 $234.99

Escort • Passport 8500 X50 Red

Outstanding range and performance

The Passport 8500 X50's state-of-the-art receiver gives it astounding range and sensitivity to radar and laser without increased false alarms. You can view the frequency of the radar signal and the strength of eight radar bands.

X50 Red

Details: 360° detection • AutoSensitivity mode • radar/laser alerts • EZ-Programming • VG2 immunity • red LED display • warranty: 1 year.

#036P85X50R $304.99

• **Passport 8500 X50 Blue** *Enjoy a stylish blue LED display*

#036P85X50B $344.99

Escort • Solo S2

"No strings attached" operation

Simply stick the cordless Solo S2 on your windshield, turn it on, and you're ready to go. With multiple laser and radar sensors, you get long-range warnings and the widest field of view against laser. The S2 also has an advanced power management system to maximize the life of the included batteries.

Details: AutoSensitivity mode • alerts for radar, laser, SWS, VG2 • multiple laser sensors • VG2 immunity • city/highway modes • warranty: 1 year.

#036SOLOS2 $334.99

Whistler • 3500 *Easy to install, easy to operate*

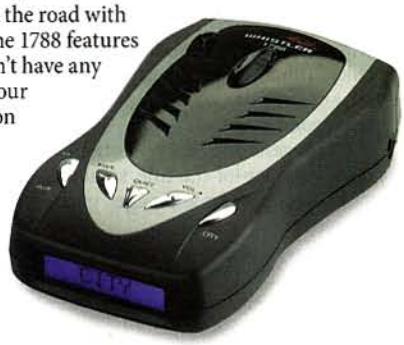
You can place the 3500 radar detector anywhere in your car instead of having to mount it on your windshield. You install it using just a few simple tools, and the sensors send a remote signal to the display so you don't have to run extra wires. You can mount the 3500's display horizontally or vertically on, in, or under your dashboard with the included brackets.

Details: Total Band protection • 3 city modes • 360° total protection • VG2 cloaking • POP mode detection • alert priority • quiet/auto quiet modes • warranty: 3 years.

#229DE3500 $249.99

Whistler • 1788 *Battery-operated radar detector*

It's easy to get great protection on the road with Whistler's 1788 radar detector. The 1788 features a rechargeable battery, so you won't have any distracting cords hanging from your windshield. You also get protection against POP mode radar, which operates in quick bursts to make detection difficult.

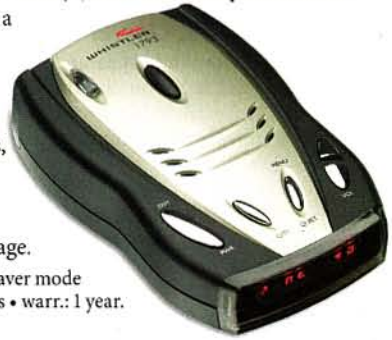


Details: 3 city modes • standard backup power cord • VG2 cloaking • quiet/auto quiet modes • warranty: 1 year.

#229DE1788 $179.99

Whistler • 1793 SE *Dependable, full-featured protection*

Put total protection into your car at a surprisingly modest price with the Whistler 1793 SE. POP mode and 360° protection pick up radar and laser signals with accuracy, while the high-gain lens, Real Voice alerts, and selectable tones let you know about hazards down the road. A built-in voice memo recorder and digital compass completes the package.



Details: 3 city modes • vehicle battery saver mode • VG2 cloaking • quiet/auto quiet modes • warr.: 1 year.

#229DE1793 $129.99

Free, fast shipping on car gear Get free shipping on car A/V orders totaling $129 or more. Limited time offer. Details, pg. 75

Shawn can help you with radar detectors.
Toll-free tech support for the life of your gear.

K&N *High-flow intake kits for guaranteed horsepower*

Fuel Injection Performance Kit 2003-up Dodge Ram 5.9 liter
#513571532 $239.99

Increase your vehicle's horsepower and throttle response in one easy installation. A K&N intake replaces your vehicle's factory air box and provides virtually unrestricted airflow to the engine via the washable, reusable high-flow air filter. The result: improved performance.

K&N intakes are backed by the K&N Million Mile Limited Warranty®. Give us a call at 1-800-555-9430 or check out our website at crutchfield.com/whatfits to find the one for your vehicle.

***Prices range from* $109.99 to $429.99**

See an installation video for an intake system at crutchfield.com/kandninstall

• Air Filters *Improved air flow*

K&N THE WORLD'S BEST AIR FILTER

A washable, reusable, and efficient replacement air filter from K&N will be the last filter you ever need to put in your vehicle. Call 1-800-555-9430 or visit crutchfield.com/whatfits to find out if we have one that works in your vehicle.

***Prices range from* $25.99 to $69.99**

• Recharger Filter Care Kit *Don't toss it, clean it*

This kit cleans your K&N filters and includes a 12-ounce bottle of cleaner and an 8-ounce bottle of filter oil.

#513995050 $8.99

Borla *Exhaust systems that add power and style*

Borla designs their exhaust products to release some of the stranglehold your more restrictive, stock exhaust system has on your vehicle's engine. You install a Borla "cat-back" exhaust at your vehicle's catalytic converter. Borla's patented technology maximizes exhaust gas velocity which improves performance. This translates into more power and torque when you hit the accelerator, and increased fuel economy at cruising speeds.

Borla EXHAUST "The World's Most Winning Exhaust."

Borla exhaust for the 1999-up Chevy Silverado / GMC Sierra
#62614825 $849.99

***Borla cat-back exhaust systems from* $399.99 to $1699.99**

Hypertech • Power Programmer III

Unleash the hidden horsepower in your car or truck with Hypertech's Power Programmer III. Simply plug it into your vehicle's diagnostic port, usually located under the driver's side dashboard, and answer a few yes-or-no questions that appear on the screen. Depending on what type of vehicle you own, you can adjust its top speed, when it will shift gears, and the engine's rev limit. It's easy to return any changes back to the stock settings, and each unit has a limited lifetime warranty. To find the one for your vehicle, call 1-800-555-9430 or go to crutchfield.com/whatfits.

***Power Programmer III* $399.99**

Carriage Works *Billet aluminum grilles and accessories*

Carriage Works billet aluminum grilles "fill out" your vehicle's front end, and dress up your ride with classy, good looks.

Carriage Works machines their grilles from top-of-the-line, solid-stock aluminum for a stronger, more durable fit.

We have grilles for many trucks, SUVs, and select cars. Call us or visit crutchfield.com/whatfits to find the right grille for your vehicle.

Billet grille for 2006-up Dodge Ram
#51142902 $219.99

***Prices range from* $59.99 to $459.99**

Husky Liners *Tough protection for your interior*

Husky Floor Liners keep the carpet and cargo areas in your vehicle looking spotless and brand new. They stand up to mud, water, snow, and anything else you may track into your van, SUV, or truck.

Each liner replaces your factory floor mats or covers your cargo area, and is molded for a perfect fit. The rubberized plastic material has a molded tread pattern for improved grip. All liners are guaranteed not to crack or break, and can even resist damage from gasoline, oil, battery acid, and other chemicals.

Husky Liners are available in black, gray, and tan for the front, second row, and cargo areas of your vehicle. Call us at 1-800-555-9430 or see crutchfield.com/whatfits to find the one you need.

***Prices range from* $69.99 to $119.99**

Photos show Husky Liners in black for a 2003-up Jeep Wrangler. From top:

Front floor liner **#55731731 $74.99**
Rear floor liner **#55761731 $74.99**
Cargo area liner **#55721761 $79.99**

Hella *Brighter, clearer headlights for your vehicle*

Improve the safety and appearance of your vehicle by adding High Performance Xenon Blue bulbs from Hella. Replacing your existing headlight bulbs with these Hellas gives you a crisper, brighter beam to improve visibility and reduce eye fatigue when driving.

We have bulbs for most popular headlight and foglight applications, and conversions for older cars with sealed beams are available. Call us at 1-800-555-9430 or click on crutchfield.com/whatfits to find the right bulbs for your vehicle.

Hella Xenon Blue bulbs HB4 (9006) pair
#529H170082 $39.99

***Prices range from* $39.99 to $44.99**

***Notice:** Certain lighting products may not be street legal in some states. For more information, please check with your local authorities before ordering.*

AirIQ • MobileIQ Silver *Keep tabs on your vehicle through your computer or phone*

No need to worry about handing your keys over to a heavy-footed teen or parking in an undesirable location. The MobileIQ can keep an eye on your car, truck, or SUV when you aren't behind the wheel, giving you information on your vehicle's location, speed, and direction, as well as information on possible tampering, all in real time. You can even set radial boundaries around your vehicle so you're notified when it's moved outside of the preset area. There are theft warnings, like if your car is moved when it isn't running or your vehicle's battery is disconnected. If your vehicle is stolen, you can locate and track it to assist law enforcement in safely finding and returning it.

You can send commands and receive information about your vehicle through AirIQ's website, or track your vehicle using your cell phone, e-mail, PDA, text messages, or pager.

The MobileIQ Silver comes with three months of free service. Call or see crutchfield.com for details.

The MobileIQ's small size makes it easy to mount hidden out of the way, with only some minor wiring required for installation. Warranty: 1 year.

The MobileIQ's small size makes it easy to install.

#667iQSiLV $399.99

Xantrex • XPower Powerpack 400R *Portable power inverter/air compressor/flashlight*

The XPower Powerpack 400R's built-in battery runs a 400-watt DC-to-AC power inverter, a radio, a flashlight, a 12-volt DC output, and an air compressor.

Take it along when camping or tailgating — it has enough power to run a 13" TV, boombox, or laptop. For emergencies, the built-in lamp effectively pierces the darkness at night. And the Powerpack is handy on the highway — you can inflate a tire quickly with the 250 p.s.i. air compressor or jump start a dead car battery (jumper cables included).

#539PP400R $99.99

Midland • GXT600 *Long-range two-way radios*

Not only do GXT600 radios feature some of the strongest transmitters on the market — capable of beaming your voice up to 18 miles — their rugged design ensures that you won't have to worry about durability while you're out in the wild. The radios come with rechargeable battery packs and a dual charging base. You get 22 channels to choose from for crisp, clean transmissions in any situation.

Details: up to 18-mile range • 5 watts of power • NOAA weather band reception • 5 selectable call tones • hands-free mode • 121 privacy codes • use of extended-range GMRS channels requires an FCC license • 6⅝"H x 2⅜"W x 1⅜"D (radios) • warranty: 3 years.

#102G600VP4 $69.99

Crime Guard • 745i⁴ *Security system*

The 745i⁴ alarm system from Crime Guard gives you safety features like a panic button, remote door lock/unlock, and Automatic Transmitter Verification™ that warns if another remote has been programmed to operate your system. The system includes:

- 2-zone/2-stage microwave motion sensor
- dual-stage shock sensor
- dome light and door lock/unlock relays
- 2 auxiliary outputs for extra features
- 2 remotes
- glass-break sensor
- lifetime warranty

#514CG745i4 $199.99

Parrot • Easydrive *Speaker and mic for your Bluetooth® phone*

Simply plug Parrot's Easydrive into your vehicle's 12-volt outlet, and you have a hands-free connection to your Bluetooth phone. The Easydrive has an amplified speaker to clearly reproduce a caller's voice, and a built-in microphone that allows you to speak naturally. The included keypad mounts on your dashboard so you can easily answer calls and hang up with the touch of a button. It's small enough to keep in a bag or briefcase, perfect for business trips and rental cars. Warranty: 1 year.

#333EASYDRV $99.99

Parrot • CK3100 *Hands-free Bluetooth® phone kit with display*

Keep your hands on the wheel when making and receiving calls with the CK3100 from Parrot. This hands-free kit for your Bluetooth phone features an LCD screen that can be mounted on your dash and displays incoming calls, your phone book, and many other menus. Calls can be placed using voice recognition of up to 150 names. The CK3100 transmits calls through your stereo speakers, and a remote-mount microphone with noise reduction and echo cancellation lets callers hear you loud and clear. Warranty: 1 year.

#333CK3100L $179.99 *Requires some wiring for installation.*

Parrot holiday special Purchase a Parrot CK3100L and get the Easydrive at half price. (#700CK31ESY, $229.99) Offer good through 12/31/06.

Parrot • CK3000 Evolution *Connect your hands-free phone to your stereo*

CK3000 keypad

The CK3000 Evolution connects to your factory or aftermarket stereo system so you can hear calls from your Bluetooth phone through your speakers. A remote-mount microphone allows you to make and receive calls using only your voice. A small, three-button keypad controls call connections and lets you scroll through your phone's menus, with voice prompts for each function. Any incoming call mutes your stereo, while the microphone filters out excess noise so your voice is clear and crisp. Warranty: 1 year.

#333CK3000E $124.99 *Requires some wiring for installation.*

Buy Now, Pay Later — No payments for 6 months — or until 2009 on select purchases — with your Sony Financial Services Card†

If you qualify for the Sony Financial Services Credit Card, you may buy now, defer payments, and pay no interest for 6 months on any combination of items. Or you may buy now, defer payments, and pay no interest until January 2009 on the purchase of any one of the following items priced at $399 or more: a TV, a Sony home theater system, a Sony receiver, a Sony Blu-ray or DVD player, or a Sony HD camcorder. You are applying for a credit card; if approved, you will receive a Sony Financial Services Credit Card. This credit card offers flexible financing with low monthly payments. No down payment is required, and there is no penalty for prepayment. SFS orders may require additional verification. Please allow up to 48 hours for processing whenever an SFS account is used.

†Valid on qualifying product purchases. Same as Cash offer on approved Sony Financial Services card purchases. No Finance Charges if purchase paid in full before January 2009 (or 6 months from date of purchase for 6 month offer). If purchase not paid in full or Account not kept current, Finance Charges assessed from purchase date and Minimum Monthly Payments required. Standard Rate 21.99% PAR. Default Rate 24.99% APR. Minimum Finance Charge $2. Certain rules apply to the allocation of payments and Finance Charges on your promotional purchase if you make more than one purchase on your Sony Financial Services card. Call 1-888-367-4310 or review your cardholder agreement for information. This offer will expire no later than 12/31/06. Crutchfield reserves the right to withdraw or modify this offer at any time without prior notice.

Free, fast shipping on most orders details below

Fast order processing

With 95% of the items we sell on hand, most orders received by 6 PM EST Monday-Friday leave our distribution center the same day.

Standard delivery times (estimated)

- 1-2 business days
- 2-3 business days
- 3-4 business days
- 4-5 business days
- 5-6 business days
- 6-7 business days

Get it faster with shipping upgrades – Get your packages in 3 days for just $3 more. Call for other shipping upgrade options.

APO/FPO addresses, Puerto Rico, & US Territories – Most orders are delivered via Priority Mail at the rates listed at right. Allow extra time for delivery. UPS may be available; please call. (Micronesia & Marshall Islands: please call for delivery options.)

What ships for free?

- Any order totaling $249 or more†
- Any order for car products totaling $129 or more† (for eligible items see pages 4-73)

†After any special discounts have been applied, and exclusive of any tax. This is a limited time offer. Exclusions may apply to some orders shipping to APO/FPO addresses, Puerto Rico, U.S. Territories, and to items that require large item special shipping to Alaska & Hawaii (right). Performance Furniture products do not qualify for free shipping (see crutchfield.com for details). For more shipping details, call 1-800-555-9430.

Standard shipping charges:

Merchandise amount	Price for orders **with car product**	Price for orders **without car product**
Up to $99.99	$6.99	$6.99
$100 to $128.99	$10.99	$10.99
$129 to $248.99	Free	$10.99
$249 and up	Free	Free

Large item shipping – Some large items require longer delivery times. These items cannot be delivered to Puerto Rico or some areas of Alaska and Hawaii. See "Large item special shipping" at right for details.

Catalog mailing and offers preference – Call us at 1-800-955-9009 if you'd like us to remove your name from our mailing list. Many of our customers enjoy getting information and special offers from other companies we've carefully screened. However, we will not share your name if you feel otherwise. Please call us toll-free at 1-800-955-9009 to let us know. We never sell our customers' phone numbers or e-mail addresses.

Warranty information – For a free copy of the manufacturer's limited warranty details, write to: Attn: Warranty Request, Crutchfield, 1 Crutchfield Park, Charlottesville, VA 22911. Specify the product's brand & model number.

Last-minute shopping?

Whether it's a gift for someone you love, or something special for yourself, we'll help you get your gear on time. Call us or check crutchfield.com/shipping for up-to-date info on nationwide shipping estimates.

Excludes items that require large item special shipping (see below) and orders shipped to P.O. Boxes, APO/FPO addresses, Puerto Rico, and U.S. Territories.

Large item special shipping

Extra care for large or heavy gear with delivery within 5-7 business days.

Door delivery* Delivery to the door of your house or apartment for items marked "door delivery," including some TVs & speakers.

In-home delivery* Delivery to any accessible room of your home for TVs marked "in-home delivery" (check dimensions to be sure the TV fits through doors and around corners).

* Delivery to addresses in the 50 United States only. Limited delivery available in Alaska and Hawaii, and a $99 per item charge applies. Free return shipping is not available on large items. Extra charges may apply to items that must be carried up more than 5 flights of stairs. Allow extra time for delivery to remote addresses.

30-day money-back guarantee and free return shipping

You can return an item (in like-new condition, with original accessories and packaging) within 30 days of receiving it. We'll pay for return shipping, and when we get the box, we'll refund the full amount of the merchandise, not including original shipping.

Free return shipping excludes items delivered via large item special shipping (above); Performance Furniture products; and return shipments by UPS from the US Territories.

CRUTCHFIELD
Home Audio/Video

Advice you can trust

Our audio/video experts are here to help — before you buy, during your purchase, and as long as you own your gear. They'll give you the service and support you need.

A Crutchfield employee since 1990, Doug used his audio/video know-how to create a home theater for his family. Above, Doug and his family enjoy a movie.

One-on-one help via phone, e-mail or chat

Armed with 14 weeks of training and our huge audio/video database, our Sales Advisors help you find the perfect gear. Get friendly, personal service and answers to your questions.

- Call our Sales Advisors at 1-800-555-9430
- E-mail us at solutions@crutchfield.com
- Visit crutchfield.com to chat live with a Sales Advisor

Get the info you need for smart shopping

- Browse this catalog for shopping guides designed to help you choose the perfect home A/V gear.
- Visit CrutchfieldAdvisor.com for hundreds of exclusive articles, reviews, shopping guides, and videos.
- Get detailed info you just can't find elsewhere. Our Product Research Team takes a hands-on approach, providing in-depth info on thousands of products — see it all at crutchfield.com
- See the gear up close without leaving home. Crutchfield.com offers large, detailed photos of our products. See front and back panels, remote controls, and more.

Enjoy free lifetime tech support

Crutchfield customers enjoy a one-of-a-kind convenience — lifetime toll-free product support from our highly trained Tech Advisors. Get expert help 16 hours a day, 7 days a week.

Expert help with system setup and beyond

Have a question when you get the gear home? Call one of our Tech Support Advisors, like Shawn. They're here to help if something goes wrong, but they can do a lot more, too — they'll help you set up your gear step-by-step, cable-by-cable, if that's what you need. Crutchfield Tech Advisors are available toll-free 16 hours a day, seven days a week, for as long as you own your gear.

Shawn, Tech Advisor

Pat, Mark, Darshan and Sean Product Research Team — licensed to research

Detailed info you can't find elsewhere

Our Product Research Team goes above and beyond to get in-depth info on all the products we sell. Their hands-on research fuels our website, and keeps our Sales and Tech Advisors ahead of the curve. Whether you're shopping online, or working with a Sales Advisor, you'll be able to find the right gear for your needs.

Doug, Sales Advisor

Friendly, expert shopping help

When you call, e-mail, or chat with us online, you'll talk to a Sales Advisor like Doug who has a real passion for A/V gear. Your Sales Advisor will match you up with gear that makes sense for your room, budget, and style.

Read about Doug's home theater system at crutchfield.com/Doug

Create your ideal system

Our **Home System Planning Center** lets you create a new home theater system from scratch, or add to your existing gear. And our online **Product Recommenders™** can help you find the TV, DVD player, receiver, or speaker system that best matches your needs and budget.

Televisions

SHOPPING GUIDE

Which HDTV should you buy?

Some things about choosing a TV are finally getting easier. All types of digital TVs keep improving even as prices keep dropping. And most models include tuners for receiving digital TV broadcasts. That's important because analog broadcasts in the U.S. will officially end by Feb. 17, 2009. Crutchfield's expert Sales Advisors and Tech Support crew can help you make a smooth transition to digital HDTV. For the most up-to-the-minute information and prices, call us or visit crutchfield.com.

Steve, Senior Home A/V Editor, keeps his eye on all of the latest televisions.

What size screen is right for you and your room?

With conventional tube TVs, you had to sit at least 8 feet from a 32" screen to ensure a clear picture. (Any closer, and you'd start to notice the scanning lines that form the picture.)

Today's HD-capable TVs have higher-resolution screens that let you put a larger set in your room and/or sit much closer. High-quality video material like DVDs and HDTV programs look amazing on these sets. But you may also find that the noise and distortion in lower-quality analog signals (like standard broadcast and cable TV) are exposed and magnified. That's why our viewing distance chart offers a range for each screen size. If most of your viewing is DVD-quality or better, you'll see more details by sitting closer. If you watch more regular (non-HD) video, sit farther back for a smoother picture.

Suggested viewing distances for HDTV-capable TVs

Screen size	Viewing distance range*
30"	3¾-6¼ feet
34"	4¼-7 feet
42"	5¼-8¾ feet
50"	6¼-10½ feet
56"	7-11¾ feet
62"	7¾-13 feet
70"	8¾-14¾ feet

* a range is provided because the ideal distance will depend on factors like signal quality

Naturally, personal preference factors into viewing distance, too, just like in a movie theater: some people sit up front, some in back, and some prefer the middle. Over the years, I've heard from plenty of customers who wished they'd bought a bigger TV … but never a smaller one. That's why I recommend getting the largest screen that fits your budget and room.

Digital TVs come in different flavors. Check the label.

As you flip through the following TV pages, you'll see different icons that indicate each TV's HDTV capability:

- **EDTV** – "Enhanced-Definition" TVs are usually plasma or flat-panel LCD models. They can display a 480p picture, which is DVD-quality, but not as detailed as true high definition.
- **HDTV-ready** – these TVs can *display* a high-def digital signal (720p and/or 1080i), but do not include a tuner for receiving digital broadcasts.
- **HDTV** – High-Definition TVs can *receive and display* over-the-air digital HDTV broadcasts (when connected to an appropriate antenna).
- **Digital Cable Ready** – HDTVs that include a CableCARD™ slot allow cable subscribers to get HD programming *without* a separate cable box. (Get CableCARD details from your cable company.)

TVs from Crutchfield are shipped with care

We make sure your new TV arrives safely and speedily. TVs too large for UPS to ship receive free "white glove" in-home delivery. Other retailers charge hundreds of dollars. To learn more, see crutchfield.com/whiteglove

Guide to TV Types

Complete glossary of TV terms at **crutchfield.com/TVglossary** ■ See our complete selection at **crutchfield.com/TV**

	Display Type	Screen Size	Wall Mountable	Viewing Angle (side to side)	Contrast Ratio & Black Level	Potential for Screen Burn-In	Pros	Cons
Flat-panel	Plasma	37"-65"	Yes	Excellent	Very Good	Moderate	▪ screen's phosphor coating creates lifelike color that is closest to conventional tube TVs	▪ vulnerable to burn-in although it's much less of an issue for newer models ▪ screen may reflect room lights
	LCD	15"-65"	Yes	Good to Very Good	Good	None	▪ panels weigh less than plasma and use less energy ▪ burn-in not an issue	▪ picture slightly less natural than top plasmas
Big-screen	DLP	42"-72"	No	Good	Very Good to Excellent	None	▪ blacks and shadow detail among the best in digital big-screens ▪ smooth motion handling	▪ a few viewers sensitive to "rainbows"
	LCD	42"-62"	No	Good	Good to Very Good	None	▪ most affordable digital big-screen TV ▪ 3-chip design eliminates "rainbows"	▪ contrast, black level somewhat limited (solved by use of "dynamic iris")
	LCoS/ SXRD	50"-70"	No	Good	Very Good to Excellent	None	▪ highest pixel density among big-screens ▪ 3-chip design eliminates "rainbows"	▪ newer technology – few models offer it

LC-46D62U

LC-42D62U

Sharp • *AQUOS high-definition 1080p LCD TVs 42", 46" & 52"*

Sharp has been building top-quality LCD TVs longer than anyone else, and these "D62-Series" models are a big leap forward in both performance and value. The large, glare-resistant screens combine 1080p picture resolution with enhanced contrast and lightning-quick response time. Images look pinpoint sharp and clear, with smooth, smear-free motion. Sharp makes the 46" and 52" panels in their new state-of-the-art 8th-generation factory, which can produce these large LCD screens with extraordinary precision.

All three models have built-in tuners for receiving local over-the-air HDTV broadcasts. These sets display all signals at 1080p (1920 x 1080 pixels), and also *accept* 1080p signals from high-definition players (see pgs. 88-89). The super-sleek cabinets have recessed bottom-mounted speakers and a lustrous piano-black finish.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) • 4-Wavelength Backlight System (3-Wavelength for the LC-42D62U) • 10,000:1 dynamic contrast ratio (6000:1 for LC-42D62U) • 2 HDMI inputs (1080p-compatible) • warranty: 1 year. See chart on pg. 81 for more info, and dimensions.

42" **#284LC42D62** **$2299.99** **Free "white glove" in-home delivery**

46" **#284LC46D62** **$3299.99** **Free "white glove" in-home delivery**

52" **#284LC52D62** **$4499.99** **Free "white glove" in-home delivery**

Sony • *BRAVIA "V-Series" high-definition 1080p LCD TVs 40" & 46"*

Sony's lowest-priced 1080p BRAVIA TVs deliver performance that's only a slight step down from the more expensive XBR models. And many people prefer the practical styling of the "V-Series" models. The space-saving bottom speaker design lets you maximize screen size for your location.

The 40" KDL-40V2500 and 46" KDL-46V2500 include built-in digital TV reception so you can enjoy crystal-clear over-the-air HDTV broadcasts (antenna required). For less-than-pristine program sources, Sony's BRAVIA Engine™ video processing enhances contrast, reduces noise, and ensures natural-looking color. The advanced fluorescent backlight improves image quality two ways. First, it's a "wide-gamut" design that reproduces a wider range of colors — colors look both deeper and more accurate. Also, the light level is adjustable, so you can choose a brighter picture for daytime viewing, or lower the brightness to enhance the contrast when viewing with the lights dimmed.

You'll want to feed these handsome TVs the highest-quality video you can, and both models have the inputs to handle it. Along with two component video inputs, you get two 1080p-compatible HDMI inputs. For an exceptional 1080p video source, check out Sony's BDP-S1 Blu-ray Disc player on pg. 89.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) • BRAVIA Engine digital video processing • adjustable "wide color gamut" backlight • 2 HDMI inputs (1080p-compatible) • warr.: 1 year. See chart on pg. 81 for more info, and dimensions.

KDL-40V2500

KDL-32S2010

Sony • *BRAVIA high-definition LCD TVs 32", 40" & 46"*

BRAVIA is to LCD TVs what Trinitron® has been for tube TVs: a guarantee from Sony that you'll enjoy years of superb picture quality and rock-solid reliability — even from Sony's lowest-priced BRAVIAs.

All three models include built-in tuners for both digital and analog over-the-air broadcasts. Just connect an antenna to pull in HDTV programs that will amaze you with their gorgeous, ghost-free clarity. These sets use advanced liquid crystal panel technology that divides pixels into segments. This widens the optimum viewing angle, improving color and contrast when viewing from the side. An adjustable backlight is another great feature, improving black levels more effectively than a simple brightness control. The 32" model will bring eye-popping high-definition images to a bedroom, den or even a kitchen, while the 40" and 46" models deliver true home theater impact.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) • BRAVIA Engine digital video processing • warranty: 1 year. See chart on pg. 81 for more info, including dimensions.

New Toshiba • *Cinema Series Pro® high-definition 1080p LCD TVs 42" & 47"*

The 42" 42LZ196 and 47" 47LZ196 represent Toshiba's ultimate statement on LCD TV performance and design. These are two of the most beautiful HDTVs available at any price — the lustrous piano-black finish will enhance the décor of your living room or master bedroom. Both models can receive flawless high-definition programs via over-the-air broadcasts and cable TV (cable HD reception requires a CableCARD).

What sets these TVs apart from Toshiba's other high-end LCDs is more advanced video processing and picture controls. For example, the ColorMaster Pro system lets you fine-tune hue, saturation, and brightness for six individual colors. These are also Toshiba's only TVs with 1080p-capable HDMI inputs. Feed a 1080p signal from Toshiba's new HD-XA2 HD DVD player (see pg. 88), and select the TV's Native Mode to see a pixel-perfect 1080p picture with no video processing. That's as good as it gets.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) and cable TV service (CableCARD™ required) • ColorMaster Pro™ color management system • 1080p Native Mode • PixelPure Hi-Bit™ 12-bit digital video processing • 2 HDMI inputs (1080p-compatible) • Ethernet port for easy access to digital photos and MP3s • warranty: 1 year. See chart on pg. 81 for more info, including dimensions. *Contact your local cable TV provider for details on the availability and costs of CableCARD-related services.*

47LZ196

Toshiba • *Cinema Series® high-definition 1080p LCD TVs 42" & 47"*

1080p screen resolution is now the "gold standard" for HDTVs, so it's not surprising to find it on these two high-performance Cinema Series TVs. The 42" 42LX196 and 47" 47LX196 are "Digital Cable Ready" TVs with the ability to receive high-definition signals via over-the-air broadcasts and cable TV signals. To make full use of the built-in cable tuner, ask your local service provider about a CableCARD. It replaces the cable company's digital cable box, and offers advantages like simpler hookup and slightly better picture quality. Thanks to built-in TV Guide On Screen, you'll still have an easy-to-use program guide that requires no monthly subscription fee.

These versatile sets include two digital HDMI inputs for your highest-quality sources, plus a standard computer input so you can enjoy web-surfing and PC gaming. You can play for hours with no worries because LCD displays run no risk of screen burn-in.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) and cable TV service (CableCARD required) • TV Guide On Screen® program guide (where available) • PixelPure Hi-Bit 12-bit digital video processing • Ethernet port for easy access to digital photos and MP3s • warranty: 1 year. See chart on pg. 81 for more info, including dimensions. *Contact your local cable TV provider for details on the availability and costs of CableCARD-related services.*

Toshiba • *High-definition LCD TVs with built-in DVD players 26", 32" & 37"*

37HLV66

Toshiba's space-efficient LCDVD™ combo models provide appealing options for a master bedroom, child's room, or even a modest home theater. With an upconverting DVD player built right into the cabinet, these sets reduce cable clutter and serve as a complete DVD viewing system you can easily move from room to room. The slot-loading disc player also handles regular music CDs. You'll enjoy easy control of all these entertainment options with the well-laid-out remote control, which has glow-in-the-dark buttons.

These HDTVs can receive both regular and high-definition over-the-air broadcasts (antenna required). In addition to component video and HDMI inputs, these versatile sets include a standard computer input and an Ethernet port that provides a gateway to Toshiba's built-in networking capability. Simply connect your laptop PC and you can access MP3 files and digital photos stored on its hard drive using only the TV's remote.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) • PixelPure Hi-Bit 12-bit digital video processing • built-in upconverting DVD player (720p) • adjustable backlight • Ethernet port for easy access to digital photos and MP3s • warranty: 1 year. See chart on pg. 81 for more info, including dimensions.

Panasonic • *High-definition plasma TVs with CableCARD slot and TV Guide On Screen 42", 50" & 58"*

The "600-Series" models start with Panasonic's exceptional plasma picture quality and add flexible connection options, PC compatibility, and several other key conveniences. If you're looking for a plasma TV that excels as a true entertainment center, these models really stand out from the crowd.

These "Digital Cable Ready" TVs include built-in tuners for both over-the-air and cable digital TV reception. To make full use of the cable tuner, ask your local service provider about a CableCARD. This "smart card" goes in a dedicated slot in the TV's back panel and replaces your set-top cable box. Using a CableCARD will simplify your hookup and operation and usually provides a slightly clearer picture. The built-in TV Guide On Screen® program guide replaces your cable company's program guide, providing listings for over-the-air and cable programs in your area.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) and cable TV service (CableCARD required) • TV Guide On Screen program guide (where available) • 1-tuner Picture-in-Picture • warranty: 1 year. See chart on pg. 81 for more info, and dimensions. *Contact your local cable provider for details on the availability and costs of CableCARD-related services.*

Samsung • *High-definition plasma TVs 42" & 50"*

Samsung's plasma TVs have improved dramatically in the past two years and these top-of-the-line "73-Series" models can hold their own with the best available. The super-clean all-black finish of these sets gives them a striking look. Whether you place one on an A/V stand or mount it on the wall, you'll enjoy a vivid, crystal-clear picture from anywhere in the room.

If you live in an area with lots of over-the-air HDTV broadcasts, these sets belong on your list because Samsung's digital tuners are champs at pulling in stations. Both models include "Digital Cable Ready" tuners, so you can get broadcast and cable HD programs. (To make full use of the built-in cable tuner, ask your service provider for a CableCARD.)

Are videogames part of your entertainment mix? Samsung worked with Microsoft to develop an enhanced game mode that pumps up the visual and sonic excitement. And Samsung designs their plasmas to resist screen burn-in, so you can play on and on.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) and cable TV service (CableCARD™ required) • 13-bit video processing (549 billion colors) • FilterBright Plus anti-glare filter • Auto Pixel Shift to resist screen burn-in • warranty: 2 years. See chart on pg. 81 for more info, including dimensions. *Contact your local cable provider for details regarding the availability and costs of CableCARD-related services.*

Hitachi • *UltraVision® CineForm™ high-definition plasma TVs 42" & 55"*

These two TVs use different panel designs to achieve the same result: a superb picture. The 42" 42HDT79 uses ALiS (Alternate Lighting of Surfaces) screen technology, which has a 40% higher pixel count than conventional 42" plasmas. The screen's 1024 x 1080 pixels can display more detail than typical 42" plasmas with 1024 x 768-pixel resolution. The 55" 55HDT79 has a 1366 x 768-pixel progressive-scan screen. Both models include a *motorized* swivel base that you can operate with the TV's remote, for convenient fine-tuning of the viewing angle from your favorite chair.

These "Digital Cable Ready" HDTVs add the easy-to-use TV Guide On Screen program guide — just press the Guide button on the remote to find your favorite shows. The color-coded grid makes it a snap to sort through programs for viewing, or scheduling recordings. Picture adjustments provide precise color control, including the ability to store a separate color setting for accurately displaying digital photos. An adjustable color decoder helps you get skin tones just right. Hitachi's slick Roll & Click™ remote has a pair of thumbwheels that let you quickly change channels or adjust the volume.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) and cable TV service (CableCARD required) • TV Guide On Screen® program guide (where available) • selectable Digital Color Management III • adjustable color decoder • illuminated remote • USB port for viewing digital photos • Day and Night Memory picture settings • warranty: 1 year. See chart on pg. 81 for more info, including dimensions. *Contact your local cable provider for details regarding the availability and costs of CableCARD-related services.*

Sony • *Grand Wega™ SXRD™ high-definition 1080p rear-projection TVs 50", 55" & 60"*

Sony's "A2000-Series" TVs make the magic of SXRD projection technology more affordable than ever before. Most videophiles and reviewers agree that SXRD delivers the finest big-screen picture currently available. Images possess jaw-dropping detail and depth, but the most striking quality is a silky smoothness that just looks more natural.

These TVs use the same 1080p SXRD image chips as the XBR models described above. And like the XBRs, these sets include Sony's "Advanced Iris" system for tweaking the projection lamp's output. It works two ways: you can adjust overall brightness to compensate for your room's lighting conditions, or select a "dynamic iris" mode, which optimizes contrast and black level on the fly, scene by scene. All 1080p TVs display 1080p pictures, but not all actually *accept* 1080p signals — these models do. That lets you enjoy maximum picture quality from Sony's Blu-ray Disc™ player (pg. 89) and future 1080p sources.

The A2000s' design places the speakers beneath the screen for a more compact look.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) • 1080p 3-SXRD light engine (1920 x 1080 pixels) • Advanced Iris for improved contrast and black level • DRC MultiFunction v1 video processing • 2 HDMI inputs (1080p-compatible) • warranty: 1 year. See chart on pg. 83 for more info, including dimensions.

KDS-60A2000

Sony • *Grand Wega high-def rear-projection TVs 46", 50" & 55"*

Last year, Sony's completely redesigned Grand Wega models were the best-selling big-screen TVs in the country. These 2006 models offer subtly enhanced picture quality and hookup flexibility, plus a new 46" screen size. All three models share a crowd-pleasing cabinet design that is exceptionally clean and space-efficient. You can now experience the addictive clarity and detail of high-definition images in rooms and locations you might not have considered before.

Sony gets the color right by using three high-definition LCD image chips (one each for red, green and blue signals). You'll enjoy vibrant, flicker-free images that are both life-sized and lifelike. Sony's intelligent "dynamic iris" technology includes a circuit that continuously samples the brightness content of the video signal and adjusts the iris opening on the fly to deliver a punchy, high-impact picture at all times. The versatile set of inputs includes three component video, including a side-mounted set for easy access.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) • 720p 3-LCD light engine (1280 x 720 pixels) • Advanced Iris adjustable/dynamic iris for improved contrast and black level • DRC MultiFunction v1 video processing • warranty: 1 year. See chart on pg. 83 for more info, including dimensions.

Samsung • *High-definition 1080p rear-projection DLP TVs 50", 56" & 61"*

Samsung's "87-Series" big-screens use a 1080p image chip for picture quality with noticeably more detail, depth and clarity than 720p models. High-quality video sources look absolutely stunning on these sets, and all three models include a built-in over-the-air tuner so you can begin watching local HDTV programs by simply connecting an antenna. 1080p is a pixel-perfect match for 1080i HDTV programs as well as the new high-def HD DVD and Blu-ray Disc players (see pgs. 88-89). These sets work especially well with high-def players because the HDMI inputs accept 1080p signals.

The other major upgrade compared to Samsung's 720p models is a "dynamic iris" for major improvements in black level, shadow detail, and overall contrast. A circuit inside the TV samples the brightness level of the video signal, and the iris shutter opens and closes on the fly, controlling the light output with split-second precision to optimize contrast scene by scene. And BrilliantColor video processing ensures colors that are both more accurate and more intense than ever before.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) • 1080p DLP light engine (1920 x 1080 pixels) • dynamic iris for improved contrast and black level • BrilliantColor processing with 5-segment color wheel for more accurate colors and increased brightness • 2 HDMI inputs (1080p-compatible) • warranty: 1 year. See chart on pg. 83 for more info, and dimensions.

Samsung • *High-definition 1080p rear-projection DLP TVs with CableCARD capability and TV Guide On Screen 50", 56" & 61"*

Samsung's "88-Series" big-screens offer exceptional viewing versatility thanks to a built-in digital cable TV tuner and a wide assortment of HD-capable inputs. All three models use DLP (Digital Light Processing) display technology, with picture resolution that's the highest available: 1080p. The more typical 720p DLP TVs have about one million pixels while 1080p delivers over *two* million. You'll see more detail and texture in every scene.

The built-in TV Guide On Screen program guide provides listings for over-the-air and cable TV signals in your area. It lets you find your favorite shows and see which ones are in HD. You can also schedule recordings to a separate VCR, DVR, or DVD recorder. These TVs include two IEEE 1394 jacks for connecting compatible HD recorders.

Details: widescreen HDTV — receives and decodes digital TV signals from over-the-air broadcasts (antenna required) and cable TV service (CableCARD required) • 1080p DLP light engine (1920 x 1080 pixels) • dynamic iris for improved contrast and black level • TV Guide On Screen® program guide (where available) • warranty: 1 year. See chart below for more info, including dimensions. *Contact your local cable provider for details regarding the availability and costs of CableCARD-related services.*

REGZA

Toshiba's total mastery of TV technology continues

Televisions have changed so much and so rapidly in recent years that it's easy to lose your bearings if you're shopping for a new one. But our experience has been that the same companies who built some of the best tube TVs have also mastered getting the best picture from flat-panel HDTVs.

One of those companies is Toshiba, and nothing demonstrates their considerable TV expertise more convincingly than their REGZA line of premium flat-panel LCD TVs. REGZA is short for Real Experience Guaranteed by AmaZing Architecture. So now you know. Luckily, like most of the world's top high-tech companies, Toshiba puts more money into engineering than marketing. A *lot* more.

Superior LCD technology yields superior picture quality

REGZA HDTVs cover the most popular current screen sizes, from 26" to 47". All models include a versatile set of audio/video connections featuring HDMI and PC inputs. See pg. 79 for detailed descriptions, or visit crutchfield.com

All REGZA TVs use Toshiba's new CineSpeed™ LCD panel, with response time that's 33% faster than on previous models. In the past, LCD screens were limited by slow response times that made it difficult for them to keep up with rapid on-screen motion, resulting in distracting motion "trails" or "ghosts." REGZA panels display motion cleanly, for greater realism on fast-action material like sports.

Toshiba's powerful PixelPure Hi-Bit™ 12-bit digital video processing creates 16 times as many gradations as more typical 8-bit processors. By creating over 4,000 steps between the whitest whites and the deepest blacks, REGZA TVs deliver smoother, more lifelike images at all times.

42LZ196

Which REGZA TV is right for you?

REGZA

All REGZA LCD TVs include:

- CineSpeed high-speed LCD panel to minimize motion smearing for a clearer picture on fast-action scenes
- PixelPure Hi-Bit 12-bit digital video processing

47LX196

CINEMA SERIES® HD

REGZA Cinema Series models add:

- dual HDMI inputs
- an Ethernet port for accessing music files and digital photos stored on your PC or home network
- the SoundStrip™ thin-line speaker system

CINEMA SERIES® HD PRO

REGZA Cinema Series Pro models add:

- 1080p resolution on all models, plus the ability to accept 1080p video signals via the HDMI inputs
- Native Mode for pixel-for-pixel accuracy on 1080p video sources, with no unnecessary processing
- the ColorMaster Pro™ color management system

TOSHIBA

Image is Everything.™

REGZA XHD™ 1080p TVs

The 42" and 47" XHD models are Toshiba's top-performing REGZA TVs, providing the ultimate in high-definition LCD TV performance. XHD models have full 1080p resolution (1920 x 1080 pixels). That's essential for a TV to be able to display all the picture detail in 1080-line HDTV broadcasts and HD DVD high-definition discs.

1080p goes native for the purest possible picture

Toshiba's "best of the best" are the Cinema Series Pro models like the 42" 42LZ196 pictured at left. These are Toshiba's only TVs of any type that can display *and accept* 1080p video signals. That's an important distinction, especially if you're considering one of the new 1080p-capable high-def players, like Toshiba's HD-XA2 HD DVD player (see pg. 88).

REGZA 1080p TVs include a "Native Mode" feature that optimizes 1080-line HDTV signals. These signals match the screen's resolution pixel for pixel, eliminating the need for "scaling" (resolution conversion). Scaling enhances low-quality signals but can actually degrade HDTV signals. Also, most TVs employ automatic "overscanning," which conceals up to 10% of the picture around the borders. Native Mode displays 100% of the picture.

Pixel Pure Hi-Bit

CineSpeed

XHD 2X RESOLUTION

Native Mode

REGZA LCDVD™

TV and DVD make an ideal combination. Probably the most convenient way to enjoy both is with one of Toshiba's popular LCDVD combo models. A full-function DVD player is actually built into the TV.

With screen sizes ranging from 26" to 37", there's a model that's right for a bedroom, office, kitchen or home theater. Enjoy DVD movies (and music CDs) in locations where you may have limited space for additional components.

Increase convenience while you decrease clutter

37HLV66

By including the DVD player in the TV, you not only save space, but also cut down on both cable and remote control clutter. There are other advantages, too.

Toshiba doesn't use an ordinary DVD player in their combo models. It's an "upconverting" player that gives video a sharper, cleaner look that's closer to high definition. Purchased separately, this type of player would cost $100 or more, and you'd also need an expensive HDMI cable to ensure the best-quality connection between player and TV. An LCDVD combo model gives you the same great video performance in an elegantly streamlined design.

37HLV66

HD DVD™

The ultimate picture and sound quality comes on a disc

Toshiba launched HD DVD less than six months ago, and knowledgeable reviewers and videophiles are already saying that HD DVD has "won the first round" in the high-definition disc format war.

■ HD DVD delivers the finest picture and sound ever

HD DVD was designed from the ground up to deliver maximum picture quality with the latest high-definition TVs. HDTV owners who have been disappointed by a lack of consistent quality in HD content are thrilled to have a superb high-definition source they can enjoy anytime.

HD DVD's superior picture and sound starts with the discs themselves. These high-capacity discs hold much more information than standard DVDs. This increased capacity enables HD DVD to provide the finest picture and sound quality available.

■ The second-generation players are even better

Toshiba's first-generation players received raves for their outstanding performance, but some owners were bothered by slow disc-loading and operational quirks. By comparison, the new HD-A2 ($500) and HD-XA2 ($1,000) players are slimmer and lighter, with faster disc loading, smoother operation, and even better picture and sound quality.

The HD-XA2 is a technological tour de force. It's one of the first components to include the higher-bandwidth HDMI 1.3 interface, which can handle higher-resolution video and audio. And the HD-XA2 delivers 1080p video, and not just on HD DVDs, but also on standard DVDs. Silicon Optix' acclaimed video processing includes 1080p upconversion.

See pg. 88, or visit crutchfield.com/HDDVD, for more details on these remarkable players.

What reviewers (and viewers) are saying about HD DVD:

"The best high-def picture we've ever seen."

"It ended up taking very little time for me to become accustomed to the stellar picture and cleaner, more open sound of HD DVD. Basically, I'm ruined – I'll never be able to watch a regular DVD again with an uncritical eye. It was as though a window onto the movies had been cleaned, and I was able to see into their texture in a way that's impossible with DVD."

*— Rob Sabin, **Sound & Vision** magazine, June '06*

"...for now, all I can say is, Wow!"

"Well, okay, there's more I can say. The picture quality was fantastic – crisp, clean, and clear as a bell. The color was vivid and rich without being oversaturated, the depth was astonishingly three-dimensional, and the detail was tack sharp. As for the audio, it was superb as well. The benefits of Dolby Digital Plus were most evident listening from the multichannel analog outputs, which sounded much richer and fuller than the digital output."

*— Scott Wilkinson, **The Perfect Vision** magazine, July/August '06*

"Biggest bang for the buck!"

"I purchased the Toshiba HD-A1 on July 3, and the unit was delivered two days later – awesome Crutchfield service! I connected the Toshiba to my 60" TV via the HDMI cable and instantly realized I made the correct choice. The first titles I viewed were *The Last Samurai*, *Serenity* and *Goodfellas*.

The picture quality is a videophile's dream come true. The brilliant colors, deep blacks and great detail create a remarkable filmlike image, and the sound quality really took me by surprise – I now have a true movie theater experience in my living room. But the pleasant surprises did not end there; my jaw dropped when I tried my first DVD (*Blackhawk Down*). For a moment I thought I was watching HD. The upconverted picture quality at 1080i is totally unbelievable! Only a year ago I'd paid $1500 for the Denon 3910 to enjoy its great video and audio performance. The Toshiba outperforms the Denon in both audio and video quality.

After viewing at least thirty movies, there has not been one glitch. Some will take issue with the remote control, as the lettering is way too small, but this is easily resolved by programming your favorite remote with Toshiba's code."

— Peter, Crutchfield customer, July '06

TOSHIBA

Image is Everything.™

gigabeat®

TOSHIBA
Image is Everything.™

Music, movies, and more

Hundreds of songs in your pocket

Load up the gigabeat with your favorite songs. With a computer you can easily make MP3 or WMA files from CDs and transfer them over to the player. Or just go online – the gigabeats are compatible with many music download and subscription sites.

Movies in the palm of your hand

All gigabeat players are compatible with the Starz Vongo online movie subscription service. Sync the gigabeat to your PC network, import your selected movies, and suddenly you've got a hand-held film festival.

TV shows on the go

Record TV shows on a TiVo Series 2™ DVR or a Media Center PC? Just sync the gigabeat with your PC to transfer the programs you've recorded onto the player.

New sound for your Xbox® games

Customize your Xbox 360™ gaming experience. Through a PC network you can use music from the gigabeat as your game's soundtrack.

Your camera's best friend

Don't worry about filling up your digital camera's memory. The gigabeat connects directly to most cameras for automatic image transfer, storage and slideshow viewing.

gigabeat MEV30K Portable Media Center

If you like video and like it on the go, then this gigabeat is the player for you. Its large 3" x 2" color screen delivers a bright, detailed image that can be comfortably viewed even at arm's length.

Just set the gigabeat anywhere and watch hands-free. The player will stand upright on any flat surface, and its built-in speaker lets you listen without headphones. It's like watching TV — a TV that fits in your pocket.

The gigabeat's generous 30-gigabyte hard drive can hold over 20 days of near-CD-quality music, or over 5 days of video. See page 99 for more details on this player.

gigabeat MEV30K

gigabeat S-series Portable Media Centers

If music's your thing, consider the S30 and S60 gigabeat players. In addition to playing MP3 and WMA files, the S-series players come with a built-in FM tuner. Enjoy the latest songs, follow the big game, or just find out what the weather's going to be like tomorrow. And 30 station presets with customizable labels ensure that you'll always be able to find your favorite station quickly.

The player's backlit screen displays images in clean, bright color, and you can orient your pictures and video for either horizontal or vertical viewing.

The gigabeat comes in two different capacities. The 30-gigabyte hard drive of the S30 can store up to 498 hours of near-CD-quality music, or up to 127 hours of video. The 60-gigabyte S60 can hold double that amount — over 40 days of music, or *10 days* of video. See both models on page 99.

gigabeat S30

gigabeat S60

High-Definition Disc Players

HD DVD and Blu-ray are two new high-definition disc formats designed from the ground up to maximize the viewing experience available on today's high-definition TVs. Owners of HDTVs who may be disappointed by a lack of consistent quantity or quality in HD programming now have a top-quality high-definition source they can enjoy anytime.

While Blu-ray and HD DVD aren't compatible with each other (HD DVD discs won't play in a Blu-ray player, and vice versa), they have a lot of common traits:

- **Better picture quality** – Both are true high-def formats capable of 1080i and 720p resolution (some models can also output 1080p). You'll see exceptionally clean, detailed video with deeper, richer colors than DVD.
- **Better sound quality** – Both offer the same multichannel sound formats you're accustomed to with DVD. Plus, some players feature advanced new decoding, like Dolby® Digital Plus, Dolby TrueHD and DTS-HD. They give movie soundtracks new levels of clarity and detail.
- **Compatibility with your current DVD collection** –Blu-ray and HD DVD players can also play standard DVDs. And if your TV has an HDMI input, they can even improve the look of your DVDs by upconverting the video to a resolution that more closely matches your HDTV.

Why should I buy a high-def disc player?

The DVD format was certainly a huge leap compared to VHS tapes, but it has some shortcomings as an entertainment medium for the high-definition era. DVD's compression scheme and disc structure were designed for standard-definition video. As TVs have grown bigger and better, the limitations of the DVD format have become more apparent. HD DVD and Blu-ray let you fully tap into your HDTV's high-resolution display potential.

New Toshiba • HD-A2 *HD DVD high-definition disc player with Dolby Digital Plus, Dolby TrueHD, and DTS-HD*

Take home theater to the next level with the sleek HD-A2 from Toshiba. This HD DVD player creates stunning high-definition images that are even sharper and more vibrant than HD television broadcasts. Movies come alive with startling detail and exceptional depth.

HD DVD discs have a much greater storage capacity than regular DVDs, and can hold multiple hours of true high-definition material. This increased disc capacity allows for higher-definition audio, too — including advanced new versions of Dolby Digital and DTS surround sound. The 'A2 can even decode 5.1-channel Dolby TrueHD soundtracks, which employ lossless compression to deliver a remarkably faithful reproduction of the movie theater experience.

The versatile HD-A2 can also play standard DVDs and CDs, as well as home-burned CD-Rs and CD-RWs. And the remote has buttons that glow in the dark, for easy operation when the lights are low.

Details: plays HD DVD high-definition discs (selectable 720p/1080i output available through HDMI output — HDMI cable included; 720p/1080i output also available via component video on discs lacking the copy-protection flag) • selectable 720p/1080i video upconversion for DVD (available through HDMI only) • decoding for Dolby Digital, Dolby Digital Plus, Dolby TrueHD, DTS, and DTS-HD (5.1-channel Dolby TrueHD available through HDMI only) • Ethernet port for future upgrades • 2 front-panel USB ports • remote (multibrand for TV) • 16 15/16"W x 2½"H x 13½"D • warranty: 1 year parts, 90 days labor. Visit crutchfield.com for more info. *Note: This player has stereo (but not 5.1-channel) analog outputs.*

#052HDA2 $499.99

New Toshiba • HD-XA2 *HD DVD high-definition disc player with 1080p output and upconversion*

Underneath its brushed aluminum casing, the HD-XA2 features cutting edge technologies designed to please videophiles and audiophiles alike. Its ultra-high-resolution 1080p output and advanced video processor take full advantage of HD DVD technology to create stunning images with an unparalleled level of depth, detail, and color accuracy. The 'XA2 also enhances the look of regular DVDs by upconverting them to 1080p.

On the audio side, this player can decode DTS-HD, Dolby Digital Plus, and Dolby TrueHD — new formats with less compression than their regular DVD counterparts for fuller, richer surround sound. Multichannel audio outputs let you enjoy these advanced soundtracks using any receiver with a 5.1-channel analog input.

The 'XA2 is also one of the first components to offer an HDMI 1.3 interface. The higher bandwidth of this future-ready connection offers the potential for even richer, more natural colors and higher-resolution audio.

Step-ups from HD-A2: HDMI 1.3 output • selectable 1080p output for HD DVD (via HDMI output only) • 1080p video upconversion for DVD (via HDMI output only) • coaxial digital audio output • 297MHz/12-bit video D/A converter • 32-bit SHARC® audio processor • RS-232 port for third party controllers • backlit remote (multibrand for TV) • 17 3/16"W x 2 15/16"H x 13 9/16"D. Visit crutchfield.com for more info.

Panasonic • DMP-BD10 *High-definition Blu-ray Disc™ player with 1080p HDMI output and Dolby Digital Plus*

Get the most out of Blu-ray Disc's outstanding picture and sound quality with the DMP-BD10. It can play Blu-ray Discs in 1080p resolution, making it an ideal match for today's popular 1080p-capable televisions. Panasonic's proprietary P²HD processing samples over 15 billion pixels per second to create a detailed picture with lifelike textures, and uses 16-level motion detection to ensure smooth, blur-free motion. The 'BD10's high-quality video D/A converter is capable of reproducing over 4 trillion colors for strikingly true-to-life images.

The 'BD10 also offers Dolby Digital Plus decoding. Compared to "regular" Dolby Digital, this new surround format uses less compression and offers eight discrete audio channels instead of six. You can enjoy this fuller, richer surround sound using any receiver with an 7.1-channel analog input.

Details: plays Blu-ray high-def discs (selectable output resolution: 1080p signals available through HDMI output only; 720p/1080i signals available through HDMI or component video) • plays DVDs and CDs • selectable 720p/1080i/1080p video upconversion for DVD (available through HDMI only) • 296MHz/14-bit video DAC • decoding for Dolby Digital, Dolby Digital Plus, DTS, and multichannel uncompressed PCM • BD-Java interactive capability • remote • 192kHz/24-bit audio DACs • 16 15/16"W x 2 5/16"H x 13"D • warranty: 1 year parts, 90 days labor. Visit crutchfield.com for more information.

#133DMPBD10 $1299.99

Samsung • BD-P1000 *High-definition Blu-ray Disc player with 1080p HDMI output*

Experience all of the beautiful high-resolution detail that your HDTV can provide. Samsung's BD-P1000 uses the latest technology to deliver exceptionally vivid, lifelike video from high-definition Blu-ray Discs. It even offers ultra-high-resolution 1080p output for the best picture from 1080p-capable TVs. It's the start of a new era in home theater — movies come alive with startling clarity and vibrant color.

The BD-P1000 owes its high-def capabilities to Blu-ray's high storage capacity. Blu-ray Discs can hold a lot more picture information than regular DVDs, which means you'll see consistently more accurate, true-to-life images. And the larger your screen, the more apparent the improvement becomes.

The BD-P1000 also plays standard DVDs, and will make your entire DVD library look better than ever by upconverting the video to 1080p (or 720p or 1080i — you can choose the resolution that most closely matches the display capabilities of your HDTV). This versatile player can also play audio CDs, including home-burned CD-Rs and CD-RWs.

Details: plays Blu-ray high-definition discs (selectable output resolution: 1080p signals available via HDMI out only; 720p/1080i signals available through HDMI or component video) • selectable 720p/1080i/1080p video upconversion for DVD (available via HDMI output only) • decoding for Dolby Digital, DTS, plus multi-channel uncompressed PCM • BD-Java interactive capability • 10-in-2 Multi Memory Card slot • remote (multibrand for TVs) • 192kHz/24-bit audio DACs • 17"W x 3 1/8"H x 14 1/2"D • warranty: 1 year parts, 90 days labor. Visit crutchfield.com for more information.

#305BDP1000 $999.99

Sony • BDP-S1 *High-definition Blu-ray Disc player with 1080p HDMI output*

Great news for HDTV owners — Sony's BDP-S1 uses groundbreaking Blu-ray technology to give you a pristine, vibrant picture with true-to-life texture and depth. It can play Blu-ray Discs in 1080p, the highest HD signal resolution available. Just hook the 'S1 up to your TV's digital video input to enjoy exceptional high-resolution detail. And for folks with HDTVs that don't have a digital video input, this player can also send high-def video signals up to 1080i over a component video connection.

The key to the BDP-S1's top-notch video performance is the Blu-ray Disc. This high-capacity format can hold up to five times as much information as a regular DVD, giving you a sharper and more accurate picture. Blu-ray Discs also feature interactive menus that allow you to check out the extras without stopping the movie first.

Details: plays Blu-ray high-def discs (selectable output resolution: 1080p signals available through HDMI output only; 720p/1080i signals available through HDMI or component video) • selectable 720p/1080i/1080p video upconversion for DVD (available through HDMI only) • decoding for Dolby Digital and DTS, plus multichannel uncompressed PCM • BD-Java interactive capability • remote (multibrand for TV) • 192kHz/24-bit audio DACs • 17"W x 4 1/8"H x 14 1/4"D • warranty: 1 year. Visit crutchfield.com for more information.
Note: does not play CDs.

Receivers

Great home theater starts here

A receiver is command central for your home theater system, providing the multichannel power and surround decoding you need to re-create the movie theater experience. Call us at 1-800-555-9430 or visit our website for complete info.

Inputs and outputs for building a system
Get enough connectivity to hook up all your A/V gear. Call us or see crutchfield.com for full details on each receiver's inputs and outputs.

Multi-room sound
Some home theater receivers offer dual-room/dual-source output, which lets you enjoy home theater sound in your main room while a housemate listens to stereo music in a 2nd room.

Allison,
Crutchfield Service Coordinator
"As a big football fan, I love the way my receiver greatly enhances the experience with surround sound. It puts you in the middle of the field. It's better than being at a game – unless you score sideline tickets."
30 more receivers at crutchfield.com

System control at your fingertips
All receivers come with remotes that can, at the very least, control other same-brand components. Most have multibrand remotes that will operate all major brands of A/V gear, and some add learning capability, which gives you more complete control of your system.

Sony • STR-DG500 *Easy home theater setup with auto calibration*

Add surround sound to all your home entertainment. Sony's STR-DG500 can drive six home theater speakers with authority, and its built-in surround processing delivers engrossing wraparound sound for DVD movies, TV shows, CDs, and even video games. Digital Cinema Auto Calibration makes home theater setup quick, simple and precise. Just plug in the included microphone, set it in your favorite seat, and the 'DG500 automatically adjusts the volume and delay settings for each speaker in your home theater. The result is especially accurate, powerful surround sound, custom-tailored for your room.

Details: 100 watts x 6 into 8 ohms (20-20k Hz) at 0.09% THD • remote operates compatible Sony gear • 17"W x 6¼"H x 13¼"D • warr.: 2 yrs. More info at crutchfield.com.

#158STDG500 $199.99

Onkyo • TX-SR504 *High-current power, XM Ready with XMHD Surround capability, iPod® integration*

Experience all of your movies, music, TV shows, and video games in wraparound 360° sound. The Onkyo TX-SR504 boasts seven channels of high-current power, advanced surround processing, and rugged Onkyo construction. The 'SR504 is also XM ready and compatible with XM's new HD Surround music channels. See page 10 for the additional XM Mini-Tuner and Home Dock you'll need for XM reception (XM subscription also required). Plus, you can listen to music stored on your iPod with Onkyo's optional DS-A2 iPod dock (see it at crutchfield.com).

Details: 75 watts x 7 into 8 ohms (20-20,000 Hz) at 0.08% THD • multibrand remote • 17⅛"W x 5¹⁵⁄₁₆"H x 15⅜"D • warranty: 2 years. More info at crutchfield.com.

#580TXSS04B $299.99

Yamaha • RX-V459 *XM Ready, MP3 music enhancement*

The RX-V459 delivers dynamic surround sound for all your DVDs, CDs, and TV shows. It teams up 6 channels of high-current power with Yamaha's advanced Cinema DSP modes. This receiver is also XM Ready and compatible with XM's new HD Surround channels — see page 10 for the additional XM Mini-Tuner and Home Dock you'll need to tune in over 170 satellite radio channels (XM subscription also required). A front-panel input makes it easy to plug in an iPod® or another MP3 player. Switch on Yamaha's Compressed Music Enhancer mode and you're ready to hear your MP3 collection at its best.

Details: 90 watts x 6 into 8 ohms (20-20k Hz) at 0.06% THD • multibrand remote • 17⅛"W x 6⅜"H x 16"D • warranty: 2 years. More info at crutchfield.com.

#022RXV459 $299.99

Denon • AVR-1507 *High-current power, XM Ready with XMHD Surround capability, iPod® integration*

The AVR-1507 packs the power to drive seven speakers and all the surround decoding you'll need to turn every source in your A/V system into convincing surround sound. The '1507 is also XM Ready and compatible with XM's new HD Surround channels, which deliver music in multichannel sound. See page 10 for the additional XM Mini-Tuner and Home Dock you'll need for XM reception (XM subscription also required). Plus, you can add Denon's optional iPod dock (see it at crutchfield.com/dock) to make your iPod a fully integrated component in your A/V system.

Details: 75 watts x 7 into 8 ohms (20-20,000 Hz) at 0.08% THD • multibrand remote • 17⅛"W x 5¹³⁄₁₆"H x 16⁷⁄₁₆"D • warranty: 2 years. More info at crutchfield.com.

Denon • AVR-1707 *Fast, accurate setup; dual-room audio*

The AVR-1707 boasts all of the features of the AVR-1507 (page 90), and adds lots of extras for more convenience and flexibility. Home theater setup is both quick and precise with Denon's Auto Setup feature — it balances levels and fine-tunes delay settings for each speaker in your system. Dual-room/dual-source audio lets you power speakers in two rooms simultaneously — home theater in one, stereo in a second. Component video conversion lets you send all video sources to your TV via a single component video connection for easy switching between them.

Details: 75 watts x 7 into 8 ohms (20-20,000 Hz) at 0.08% THD • multibrand remote • iPod integration with optional Denon ASD-1R dock • 2-room/2-source audio • 17⅛"W x 5¾"H x 17⅝"D • warranty: 2 years. More info at crutchfield.com.

#033AV1707 $449.99

Denon • AVR-1907 *85 watts x 7 channels, on-screen display*

Make Denon's AVR-1907 the center of a great-sounding home entertainment system. You'll experience high-impact multi-channel sound from your movies, music, and TV shows thanks to 85 watts x 7 channels of high-current Denon power. It's got all the features of the AVR-1707 (left), as well as useful extras like an on-screen display that puts receiver menus on your TV for easier system setup. It also provides more connectivity options, including a front-panel optical digital input for quick, easy video game hookup with full digital surround sound capability.

Details: 85 watts x 7 into 8 ohms (20-20k Hz) at 0.08% THD • component video conversion • optical digital out • 2-room/2-source audio • iPod integration with ASD-1R • Auto Setup • 17⅛"W x 6¼"H x 17⅝"D • warr.: 2 yrs. More info at crutchfield.com.

#033AV1907 $549.99

Denon • AVR-2307CI *100 watts per channel, 1080p HDMI video switching, Auto Setup calibration with Room EQ*

Denon's AVR-2307CI delivers a riveting home theater experience every time you turn it on. Armed with plenty of advanced surround processing capabilities and 100 watts per channel of muscular, high-current amplification, this receiver will drive up to seven speakers with power and precision.

It offers all of the great features and entertainment options described for the receivers above, including iPod integration and XM Radio capability with XMHD surround sound. Plus you get 1080p-compatible HDMI video switching — this lets you connect two high-resolution video components and switch between them easily, while maintaining the best possible picture quality for both. If you've got an HDTV with only one HDMI digital video input, you'll really appreciate this convenient feature.

Denon's Auto Setup and Room EQ Adjust takes the hassle out of speaker configuration. Just plug in the included microphone and place it in your favorite listening seat. The '2307CI then uses a series of test tones to balance speaker levels and fine-tune the delay and EQ settings for each speaker. The result is optimized system performance for your specific speakers and room. And when you're listing to music, Pure Direct mode shuts down all unused circuitry — even the front-panel display — to deliver the cleanest possible stereo sound.

Details: 100 watts x 7 into 8 ohms (20-20k Hz) at 0.08% THD • XM Radio Ready • XMHD surround sound • phono input • dual-room/dual-source audio • Pure Direct mode • iPod integration with ASD-1R dock • HDMI switching (2 in, 1 out) • component video conversion • RS-232C port for control via an automated system • multibrand remote • 17⅛"W x 6¾"H x 17½"D • warranty: 2 years. More info at crutchfield.com.

#033AV2307C $799.99

Denon • AVR-2807 *110 watts per channel, digital video switching, Audyssey auto-calibration, 2-room/2-source video*

Denon designed the AVR-2807 to fill your room with enveloping, 360° surround sound. It boasts seven channels of Denon's acclaimed high-current amplification, plus advanced digital processing for a high-impact home theater experience. You get 1080p HDMI switching for two high-def video sources, plus analog-to-HDMI conversion that lets you send *all* of your video sources to an HDMI-capable TV using a single digital cable. This streamlines video switching and preserves maximum picture quality for each source.

The '2807 also includes Audyssey Laboratories' MultEQ XT, a sophisticated auto-calibration system. MultEQ XT collects data from up to six different seats in your room and fine-tunes the response of each speaker in your system, ensuring precise response across a wide listening area.

With the addition of Denon's iPod dock (see it at crutchfield.com/dock), you can enjoy your digital music through your main A/V system. A version of the iPod's menus appear on your TV and on the '2807's front-panel LCD, and you can use the receiver's remote to select songs and create playlists.

The '2807 treats your digital sources right with advanced Burr-Brown digital-to-analog converters. And its heavy-duty build includes an anti-resonant chassis and an oversized power supply that help to ensure pristine audio and video performance at all times.

Details: 110 watts x 7 into 8 ohms (20-20k Hz) at 0.05% THD • XM Radio Ready *(not XMHD compatible)* • ALPHA 24 Plus upsampling for front 2 channels • dual-room/dual-source output (A/V for 2nd room) • Pure Direct mode • component video conversion • RS-232C port for control via an automated system • learning/multibrand remote • 17⅛"W x 6¾"H x 17½"D • warranty: 2 years. More info at crutchfield.com.

Toll-free tech support for the life of your gear

Yamaha • RX-V559 *Component video conversion, iPod integration*

This receiver begins with all the features of the RX-V459 (see page 90), but offers even more convenient, flexible operation. When you add the optional Yamaha YDS-10 dock (below), your iPod becomes a fully integrated component in your A/V system. You can view its menu on your TV and select songs, photos, or videos with the 'V559's remote. Component video conversion lets you send all video to your TV through a single component video connection. This streamlines switching between video sources while maintaining great picture quality for each one.

Details: 95 watts x 6 into 8 ohms (20-20k Hz) at 0.06% THD • iPod integration • XM Ready • 17⅛"W x 6¾"H x 16⅛"D • warranty: 2 years. More info at crutchfield.com.

#022RXV559 $399.99

Yamaha • RX-V659 *Auto calibration, 2-room/2-source audio*

The RX-V659 packs seven channels of high-current power to deliver plenty of home theater thills. It boasts all of the great features described for the RX-V559 (left), plus some cool extras.

Yamaha's YPAO auto calibration makes accurate system setup quick and easy. Just plug in the included microphone and place it in your favorite seat. The 'V659 takes care of the rest, individually adjusting the volume, delay, and EQ settings for each of your home theater speakers.

Dual-room/dual-source output lets you listen to home theater in your main room while a housemate enjoys stereo music in another room.

Details: 100 watts x 7 into 8 ohms (20-20,000 Hz) at 0.06% THD • XM Ready • iPod integration (requires the YDS-10, below) • component video conversion • multibrand remote • 17⅛"W x 6¾"H x 17¼"D • warranty: 2 years. More info at crutchfield.com.

#022RXV659 $499.99

Yamaha • YDS-10 *Make your iPod part of your home audio/video system*

Yamaha's YDS-10 control dock makes it easy to enjoy your iPod's music with the superior sound quality of your compatible Yamaha receiver. The dock connects using a single control cable, letting you operate your iPod with the receiver's remote. You can view your photos or videos on your TV screen, and also display your iPod's menu for easier navigation. To ensure that you'll have plenty of battery life for on-the-go listening, your iPod automatically charges while it's docked.

Details: for all docking iPods, including video iPods, iPod photos, iPod nanos and iPod minis • compatible with the Yamaha RX-V559, RX-V659, and RX-V1700 receivers • allows iPod control with Yamaha receiver remotes • charges iPod while docked • control cable included • 3⁹⁄₁₆"W x 1⁵⁄₁₆"H x 4¼"D • warranty: 1 year

#022YDS10 $99.99

iPod not included

Yamaha • RX-V1600 *THX® Select2, 120 watts x 7, HDMI switching and conversion, 3-room/3-source audio*

This THX Select2-certified powerhouse delivers 120 watts x 7 channels of high-current amplification, plus exclusive THX processing enhancements designed to transform all of your movies, music, and TV shows into convincingly theater-like sound. The RX-V1600 combines time-tested Yamaha quality with cutting-edge features like HDMI digital video switching, advanced auto speaker calibration, and exceptional three-room flexibility. It's also XM Ready — see page 10 for the additional XM Mini-Tuner and Home Dock you'll need for XM reception (XM subscription required).

HDMI digital video capability lets you switch easily between two high-definition sources, like an HDTV tuner and an HD DVD player. The 'V1600 can also convert non-digital video sources to progressive 480p HDMI signals, for compatibility with any TV with an HDMI input. All you'll need to connect this receiver to your TV is a single HDMI cable.

Yamaha's YPAO auto-calibration system enables quick, easy, and highly accurate home theater setup. Plug in the included microphone and the receiver fine-tunes the volume, delay, and equalizer settings of every speaker in your home theater for optimized surround sound.

For multi-room convenience, this receiver also lets you re-assign two to four surround amplifier channels to power stereo speakers in other rooms. This lets you play three different audio sources in three different areas of your home at the same time, without the need for any additional amplifiers. And to give you complete control of every component in your system, Yamaha includes a learning/multibrand remote. You even get a basic second remote that, when used in conjunction with an optional remote control extender system, gives you control of your system from your second or third room.

Details: 120 watts x 7 into 8 ohms (20-20,000 Hz) at 0.04% THD • HDMI switching (2 in, 1 out) • 17⅛"W x 6¾"H x 18"D • warranty: 2 years. More info at crutchfield.com.

#022RXV1600 $999.99

RX-V1700

• RX-V1700 *More power, 1080p HDMI switching, iPod integration, XM HD Surround, Compressed Music Enhancer*

The RX-V1700 boasts 130 watts x 7 channels of high-current Yamaha power. Advanced 1080p-compatible HDMI switching lets you enjoy the highest picture resolution possible from today's newest generation of high-definition televisions and disc players. Add the Yamaha YDS-10 control dock (above), and you can play your iPod's music through your best speakers and view its photos and videos on your TV. Yamaha's special Compressed Music Enhancer mode employs sophisticated digital processing to provide top-notch sound quality from your MP3s. The 'V1700 also adds compatibility with XM Satellite Radio's HD Surround channels, which offer music in spacious multichannel sound. (This receiver is not THX Select2-certified.)

#022RXV1700 $1199.99

Home Speakers

SHOPPING GUIDE

Treat yourself to great sound

Whether you're going for a pair of smooth-sounding stereo speakers or an enveloping home theater system, we've got you covered. On the following pages, you'll find a wide selection of some of the finest speakers we carry. Visit crutchfield.com/speakers for our complete selection or give us a call at 1-800-555-9430.

Luke, Customer Service

"I've used a surround sound system for years now. I couldn't imagine watching movies or playing video games without it. If a character is yelling from behind you, you hear them from behind. If something jumps out at characters on-screen, then *you* jump. It's just great. A movie or video game simply does not feel complete without surround sound."

149 more home speakers at crutchfield.com

Get enveloping surround sound with an all-in-one speaker system

To enjoy today's multichannel formats for movies and music, you'll need an A/V receiver (pages 90-92) and the right speakers. Pre-matched **home theater speaker systems** include the front, center, and surround speakers, as well as a subwoofer — all the speakers you'll need to experience a seamless 360° soundfield. Pre-matched systems are often compact, so you'll enjoy big sound without crowding your room with big speakers (see pgs. 93-95).

Build your own system for custom-tailored sound

For high-impact sound that's ideally suited for your room, you can't beat a custom-assembled home theater speaker system. Choose from our selection of **tower speakers**, **bookshelf speakers**, **center speakers**, and **on-wall speakers** (see pages 94-97).

No room for speakers? No problem

In-wall and **in-ceiling speakers** provide great sound without cluttering your room. They easily install into your walls or ceiling without taking up a single inch of floor space. Visit crutchfield.com/inwall and crutchfield.com/inceiling for our full selection.

Free installation guides and lifetime tech support — real help for do-it-yourselfers

When you purchase on-wall, in-wall, or in-ceiling speakers from Crutchfield, we include our detailed 8-page installation guides free with your order. Whether you're installing these speakers in your existing home, or pre-wiring a new home under construction, these guides give you the info you need to complete a safe, smooth installation. And you can count on toll-free help from our expert Tech Advisors if you need additional assistance.

Infinity • TSS-450 *Compact home theater speaker system*

Infinity's TSS-450 includes all the speakers you'll need for full-on 5.1 surround sound — four satellites, a center speaker, and a powered sub — at an excellent value. Team the system with a home theater receiver (pgs. 90-92) and hear enveloping surround sound from movies and music. The front and surround speakers sport a ½" tweeter and 2½" mid, while the center speaker features a tweeter and two midranges. All five speakers are compact for unobtrusive placement even in small rooms. Included brackets let you easily wall-mount the front and rear speakers, and the center channel speaker sports an adjust-able rear foot for steady positioning atop your TV. The included 100-watt subwoofer with 8" driver fills in the bass for full-bodied sound.

Supplies limited

Speakers: adjustable wall brackets for front & surround speakers included • 3½"W x 5¹⁄₁₆"H x 3½"D (satellites); 8⅛"W x 3⁹⁄₁₆"H x 3⁹⁄₁₆"D (center). **Powered sub:** 10⁵⁄₁₆"W x 16¼"H x 16¼"D. Speaker wire & subwoofer cable included. Warr.: 5 yrs. (3 yrs. sub amp).

Charcoal **#108TSS450C**
Platinum **#108TSS450P**

$299.99 *Originally $349.99*

We also sell the satellites from the TSS-450 system individually, so you can add an extra speaker or two for 6.1 or 7.1 surround sound. Call 1-800-555-9430 or visit crutchfield.com for details.

Polk • RM6005 *Complete surround sound speaker system*

Now's your chance to get a great price on a complete home theater speaker system. The RM6005, part of Polk's award-winning line of RM systems, delivers spacious surround sound. It includes four identical satellites for front and surround, a voice-matched center channel speaker, and a powered subwoofer — you get all the speakers you'll need for seamless home theater sound right out of the box.

Each satellite uses a ½" silk dome tweeter and a 3" midrange, while the center speaker teams the same tweeter with dual mids. All the speakers are compact and wall-mountable, so they won't crowd your space — ideal for smaller rooms. And the included PSW10 powered subwoofer pairs a 50-watt amplifier with a 10" woofer for potent bass response.

Speakers: keyhole slots and threaded inserts for easy wall mounting • 3½"W x 5⁷⁄₁₆"H x 4"D (satellites); 10¹⁄₁₆"W x 4⁵⁄₁₆"H x 3⅜"D (center). **Powered subwoofer:** 50-watt amp • 10" front-firing woofer • 14"W x 14⅜"H x 16⁹⁄₁₆"D. Warranty: 5 yrs. (3 yrs. sub amp).

$399.99 each

Polk • RM10 *5-speaker system*

RM10 in pewter

The RM10 speaker system delivers pure, lifelike sound, and it's a great cosmetic match for a flat-panel TV. The front and rear speakers include a ¾" tweeter and a 3¼" woofer, while the center speaker houses the same tweeter with dual woofers. For hard-hitting bass, simply add a subwoofer (see right).

Details: keyhole slots and threaded inserts for easy wall-mounting • 4½"W x 7⅛"H x 5⅛"D (front and rear satellites) • 12½"W x 4⁷⁄₁₆"H x 5³⁄₁₆"D (center) • warranty: 5 years.

Pewter finish **#107RM105PP**
Black finish **#107RM105PB** **$539.99**

• RM20 *Larger front speakers, richer sound*

The RM20 uses the same center and surround speakers as the RM10 (above), but has larger, dual-woofer front speakers (4⁷⁄₁₆"W x 12½"H x 5³⁄₁₆"D). Add a Polk sub (right) for deep bass impact.

Pewter finish **#107RM205PP**
Black finish **#107RM205PB** **$699.99**

RM20 dual-woofer front speakers in pewter

We also sell the fronts & surrounds from the RM10 & RM20 systems separately. Call or visit crutchfield.com

Polk • PSW303 *100-watt powered subwoofer*

PSW404

The PSW303 teams an 8" woofer with a 100-watt amp for big bass sound. A specially designed foam ring around the woofer gives it improved back-and-forth flexibility, allowing the driver to move more air for harder-hitting performance. Plus, a slot-loaded vent reinforces the bass output, while limiting turbulence and distortion.

Details: frequency response 35-160 Hz (-3dB) • variable 60-160 Hz crossover • line-level, LFE, and speaker-level inputs • 11⁷⁄₁₆"W x 12⅜"H x 17⅞"D • warranty: 5 years (3 years for the amp).

#107PSW303 **$299.99 each**

• PSW404 *Get a larger woofer and twice the power*

Lower the boom — the PSW404's 200-watt amp and 10" woofer provide extra oomph for your movies and music. Frequency response 32-160 Hz (-3dB). 13⅜"W x 14⁹⁄₁₆"H x 18¼"D.

#107PSW404 **$399.99 each**

• PSW505 *Potent bass down to 28 Hz*

The PSW505's 300-watt amp and massive 12" woofer deliver remarkable bass impact. Frequency response 28-125 Hz (-3dB). 15⅛"W x 16⁹⁄₁₆"H x 18⅝"D.

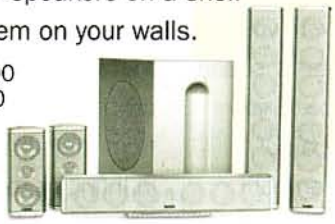
Sleek Infinity TSS speaker system

Infinity's award-winning TSS Series speakers combine great home theater sound with a stylish design that complements the latest big-screen and flat-panel televisions. You can place the speakers on a shelf or tabletop, or even mount them on your walls.

Front speakers (pair): TSS-SAT4000
Center speaker: TSS-CENTER4000
Rear speakers (pair): SAT 1100
Subwoofer: TSS-SUB750



Platinum **#7004PKG2KP** **$1999.96**
Charcoal **#7004PKG2KC** **$1999.96**

System includes speakers only; TV not included.

Infinity • TSS-SAT4000 • TSS-CENTER4000 *Streamlined home theater speakers with flexible placement options*

Build your own home theater speaker system using these slender Infinity TSS speakers. They're not only a perfect cosmetic match for today's popular flat-panel and big-screen TVs, but they also deliver a level of sound quality that does justice to that bold, vibrant picture. The TSS speakers sport Infinity's exclusive M.M.D. driver material, which features a stiff aluminum core for crisp, accurate sound. And the sleek, stylish extruded aluminum cabinets virtually eliminate sound-muddying resonance. Use the TSS-SAT4000s as front and rear speakers in a high-impact home theater setup, or team them with the compact, voice-matched satellite speakers from the TSS-750 and TSS-1100 systems below (sold individually at crutchfield.com). Once you've picked the speakers, just add a subwoofer to complete your system (see the cosmetically matched TSS subs at our website).

Flush-mounted TSS-SAT4000s and TSS-CENTER4000 with flat-panel TV

The TSS-SAT4000 and TSS-CENTER4000 are identical speakers, except the satellite is designed to be positioned vertically, while the center speaker is oriented for horizontal placement.

Details: two 3½" M.M.D. midrange drivers, four 3½" M.M.D. woofers, and a ¾" M.M.D. tweeter • 4⁵⁄₁₆"W x 22⅞"H x 4⁹⁄₁₆"D • warranty: 5 years.

TSS-SAT4000 satellite speaker
Platinum **#108SAT4KP** **$499.99 each**
Charcoal **#108SAT4KC** **$499.99 each**

TSS-CENTER4000 center speaker
Platinum **#108CTR4KP** **$499.99 each**
Charcoal **#108CTR4KC** **$499.99 each**

You can wall-mount the TSS speakers with the included swiveling bracket (above left), or install them in your wall with the optional flush-mount kit (above right). Plus, the 'SAT4000 comes with three vertical table stands of different heights for use with different size TVs (pictured left). And the 'CENTER4000 includes a cradle for rock-steady horizontal placement.

Infinity • TSS-750 *Award-winning speaker system*

The TSS-750 has impressed critics and consumers alike. It won *Electronic House* magazine's prestigious Product of the Year award in 2003 and continues to be one of the best-selling speaker systems in America. All of the drivers in this system feature Infinity's groundbreaking M.M.D. material — it's stiff yet responsive for seamless, realistic home theater performance. The 150-watt powered sub with 10" driver adds deep, high-impact bass. This system makes a classy cosmetic match for the latest TVs.

Primus 250

Infinity Primus® Series — Clear, vibrant Infinity sound

Infinity

Clean styling and detailed sound are the hallmarks of Infinity's Primus speakers. Their trim, classic lines blend in nicely with your room's décor, and their clear, dynamic sound enhances your listening experience. Enjoy your favorite stereo music with a pair of Primus speakers, or put together an entire voice-matched Primus home theater system.

With the Primus Series, Infinity set out to create high-performance speakers that approach the sound quality of models costing much more — and we think they've done it. Using cutting-edge driver technology, Primus speakers deliver vibrant, lifelike sound. The secret to the Primus line is their **Metal Matrix Diaphragm** drivers (**M.M.D.™**). Derived from the same material used in Infinity's most expensive speakers, M.M.D. drivers are strong and rigid for clear, distortion-free sound.

Infinity's M.M.D. drivers deliver precise, powerful sound for your music and movies.

Tower Speakers

These solidly built Infinity Primus towers make an excellent pair of stereo speakers for larger rooms. And their high sensitivity rating means you can play them loud without straining your amp. They can also anchor an impressive front soundstage in a multi-channel home theater setup. Whether you want to rock out to your favorite CDs or immerse yourself in cinematic surround sound, the Primus towers deliver big, dynamic sound that's sure to impress.

Details for all Primus tower speakers: M.M.D. drivers • bass-reflex design • 5-way binding posts • video-shielded • 8-ohm impedance • warranty: 5 years.

Polk RTi Series

Accurate sound for serious listeners

polkaudio the speaker specialists®

Polk's RTi Series speakers offer a modern décor-friendly look, plus the warmth of a real wood finish in your choice of black oak or cherry. These handsome speakers provide rich and clear stereo sound for listening to your favorite music. You can also build a terrific RTi home theater system — Polk has carefully voice-matched these speakers to one another to ensure precise performance in demanding surround sound applications. Every RTi Series speaker uses Polk's exclusive **Dynamic Balance** tweeters and woofers. These drivers undergo laser testing to identify and eliminate resonance points for cleaner sound. Plus, Polk's **Power Port** technology helps bolster bass response without introducing audible distortion. And an **ARC (Acoustic Resonance Control)** port greatly reduces cabinet resonance for smooth, natural sounding midrange.

RTi8 in black oak

RTi10 in cherry

Bookshelf Speakers

Polk's RTi Series bookshelf speakers produce surprisingly powerful sound for such a compact design. Their sturdy cabinets use internal bracing to virtually eliminate sound-muddying resonance and include Polk's Power Port technology for clear, deep lows.

Details for all RTi bookshelf speakers: handle up to 125 watts • 8 ohms • sensitivity 89 dB • ARC port • dual 5-way binding posts • keyhole slots for wall mounting • video-shielded • warranty: 5 years.

RTi6 in cherry

Subwoofer

Polk's PSW10 delivers deep, accurate bass, thanks to its built-in 50-watt amplifier and 10" front-firing woofer. Internal bracings reinforce this sub's sturdy cabinet for superior clarity. The PSW10 is a great way to round out a home theater system and add depth to stereo music.

Details: frequency response 40-160 Hz (-3dB) • variable 80-160 Hz crossover • line-level input • speaker-level inputs/outputs • 14"W x 14⅜"H x 16³⁄₁₆"D • black oak vinyl finish • warranty: 5 years (3 years for the amp).

#107PSW10B **$199.99 each**

Get a free Polk PSW10 subwoofer or $200 off another Polk home sub when you buy Polk home speakers (not including a sub) totalling $499 or more. Systems already including a sub are excluded from this offer. Call or visit our website for details. Offer valid 11/6/06 - 1/9/07.

New Apple • iPod 30GB *Enjoy movies, TV shows and other video as well as photos, music and games*

video iPod 30GB in black

The new Apple video iPod features an improved LCD screen that's 60% brighter than the previous model's display. You'll see your videos and pictures in crisp, vibrant colors. The player's 30-gigabyte hard drive holds three weeks' worth of music, 25,000 photos, or up to 40 hours of video. And you're not limited to your personal collection of music and videos. You can easily add songs, TV shows, full-length movies and even classic video games purchased from the iTunes Store.

The patented, easy-to-use Click Wheel lets you zoom quickly through the player's menus. And with the iPod's new alpha-numeric search function, you can quickly "drill down" through your library to find the video, song or photo you're after. Using an optional iPod dock (see crutchfield.com), you can display movies and photos on a TV screen to share with friends.

Details: plays MP3, WAV, AAC, AIFF (uncompressed), Apple Lossless, and Audible files (formats 2, 3 and 4) • displays photos converted from JPEG, BMP, GIF, TIFF and PNG formats • plays video in MPEG-4 and MOV formats • 2½" backlit LCD screen • high-speed USB interface (cable included) • earbud headphones • built-in lithium ion rechargeable battery provides up to 14 hours music playback; up to 3.5 hours video playback • 2 7/16"W x 4 1/8"H x 7/16"D • weight: 4.8 oz. • warranty: 1 year.

White **#472VID30GW**

New Apple • iPod nano 2GB *Sleek music player and photo viewer with a durable aluminum body*

4GB iPod nanos in blue, pink, silver, and green

The new 2-gigabyte iPod nano stores up to 33 hours of near-CD-quality music and features a beautiful brushed aluminum finish. The backlit LCD screen displays your photos and album cover art in bright, vivid colors. And Apple's elegantly simple Click Wheel lets you zoom through menus quickly to find the song or picture you're looking for.

The iPod nano comes with some handy extras. Its clock has a sleep timer and alarm function, a multiple time zone display and a stopwatch. You can also transfer your calendar and personal contacts from your PC. The player's password-protected screen lock keeps your information safe.

The rechargeable battery lasts up to 24 hours, so you're sure to have entertainment at your fingertips. And with its embedded flash memory, the iPod nano never skips — no matter how active you are.

Details: plays MP3, WAV, AAC, AIFF (uncompressed), Apple Lossless, and Audible files (formats 2, 3 and 4) • displays photos converted from JPEG, BMP, GIF, TIFF and PNG formats • color backlit LCD screen • earbud headphones • built-in lithium ion rechargeable battery provides up to 24 hours music playback; up to 5 hours for photo slideshow with music • weight: 1.41 oz. • 1⅝"W x 3½"H x 9/16" • warranty: 1 year.

Silver **#472NANO2GS** **$149.99**

• iPod nano 4GB *Get twice the memory and a choice of colors*

The 4-gigabyte iPod nano can hold up to 66 hours of near-CD-quality music, and comes in a variety of colorful brushed aluminum finishes.

Silver **#472NANO4GS** *Green* **#472NANO4GR**
Pink **#472NANO4GP** *Blue* **#472NANO4GB** **$199.99**

8GB iPod nano

• iPod nano 8GB *Store over 5 days of near-CD-quality music*

This iPod nano features 8 gigabytes of embedded memory that can hold up to 132 hours of near-CD-quality music.

Black **#472NANO8GB** **$249.99**

New Apple • iPod shuffle *Amazingly compact 1GB digital music player*

The 1-gigabyte iPod shuffle is an ultra-compact player with an elegantly simple design — it's about the size of a matchbook and can pack 18 hours of your favorite songs. Create a hand-picked playlist in iTunes® and load it onto the shuffle. You can listen to your songs in order or in random "shuffle" mode.

This player features a built-in clip, so you can attach it to your belt, shirt pocket, or just about anywhere. The included high-speed USB dock connects to your Mac® or PC for convenient charging and music transfer. Its rechargeable battery delivers 12 hours of continuous operation, to help you get through your day.

Details: plays MP3, WAV, AAC, AIFF, and Audible (2, 3, and 4) formats • "shuffle" and "order" modes • high-speed USB interface (USB dock included) • earbud headphones • built-in belt clip • built-in lithium polymer rechargeable battery provides up to 12 hours of playback • weight: 0.55 oz. • 1⅝"W x 1 1/16"H x 7/16" • warranty: 1 year.

Toshiba • gigabeat® MEV30K Portable Media Center *Video/photo/MP3/WMA player with built-in speaker*

Watch videos, play music, or just enjoy a photo slide show with this versatile player from Toshiba. The gigabeat is slightly larger than a wallet and fits easily in one hand. You can also stand it upright on a flat surface for hands-free viewing. Its 30-gigabyte hard drive stores up to five days of video, over 20 days of near-CD-quality music, or tens of thousands of photos. A large 3" x 2" color screen displays pictures and videos with vivid colors and crisp detail.

The gigabeat comes preloaded with Microsoft's Windows® Mobile® software and uses the same simple interface found on the Media Center edition of Windows XP. An easy-to-use toggle control and handy shortcut buttons let you quickly find the files you want to play.

Using your home computer network, you can transfer recorded TV shows from a Media Center PC or TiVo Series 2™ DVR to the gigabeat. Or load it up with movies from a compatible online subscription service, like Starz Vongo. You can also add songs via music download and subscription services such as Napster and Rhapsody. You can even send music from your player through a PC to your Xbox 360™ console and use your own tunes for video game soundtracks.

Connect your digital camera directly to the gigabeat using the included adapter for easy image transfer. The player detects the camera and automatically loads your pictures. You can also plug in a USB flash memory card and transfer video and music files from it.

Use the provided A/V cable to connect the gigabeat to your audio/video system. Show videos and photos on your TV, and play music on your best-sounding speakers. When you're out and about, you can listen through the player's built-in speaker or the included earbud headphones. The gigabeat's rechargeable battery gives you up to 8 hours of video playback or 30 hours of audio on a full charge.

Details:
Plays WMV 9 & 10 video files • plays MP3, WMA, and WAV audio formats • displays JPEG images • high-speed USB interface • AC adapter • PlaysForSure™ compatibility • 14 15/16"W x 3"H x ¾"D • weight: 4.45 oz. • warranty: 1 year.

#05230GVID $299.99

Toshiba • gigabeat® S30 Portable Media Center *Video/photo/MP3/WMA player with FM radio*

gigabeat S30

The Toshiba gigabeat S30 can store up to five days of video, over 20 days of near-CD-quality music, or tens of thousands of photos on its 30-gigabyte hard drive. It also features a built-in FM tuner for musical variety.

Connect the gigabeat to your computer and fill it up with TV shows recorded on a networked TiVo Series 2™ DVR or Media Center PC. Or transfer movies from a compatible online subscription service, like Starz Vongo. Through a PC, you can even send music from your gigabeat to your Xbox 360™ console to create your own video games soundtracks. The player's rechargeable battery gives you up to 12 hours of audio playback on a full charge, or up to 2.5 hours of video.

Details: Plays WMV 7, 8 & 9 video files • plays MP3, WMA, and WAV audio formats • displays JPEG images • FM tuner with 30 presets • high-speed USB interface • PlaysForSure™ compatibility • 2⅜"W x 4"H x ½"D • weight.: 4.45 oz. • warranty: 1 year.

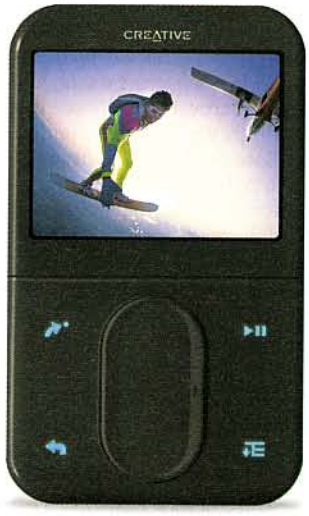
#052MES30VW $249.99

• gigabeat S60 *Tote twice as many songs and videos*

The gigabeat S60 offers 60GB of memory — that's enough to store up to 1,000 hours of near-CD-quality music, or 10 days' worth of video. 4.9 oz.

#052MES60VK $299.99

Creative • Zen Vision:M *Video/photo/MP3/WMA player with voice recorder and FM radio*



Creative's Zen Vision:M portable player is so versatile and loaded with features, it won CNet's "Best in Show" award at the 2006 Consumer Electronics Show. The roomy 30-gigabyte hard drive stores up to five days of video, over two and a half weeks' of near-CD-quality music, or tens of thousands of photos and pictures.

Listen to your MP3 and WMA music collection or catch the big game with the player's built-in FM tuner. There's also an integrated microphone, so you can easily make voice memos to yourself, or even record an entire classroom lecture.

Videos and pictures look sharp and clean with rich, full color on the player's 2½" screen. Or enjoy your home movie clips and downloaded videos on your TV using the provided audio/video cable. And with up to 14 hours of playback on a full charge, the Vision:M can keep you entertained from sunup to sundown.

Details: plays MPEG-1, MPEG-2, MPEG-4-SP, WMV 9, Motion-JPEG, DivX™ 4 & 5, and XviD video files • displays JPEG digital photos • plays MP3, WMA, protected WMA, and WAV files • earbud headphones • carrying case • high-speed USB interface (cable included) • up to 14 hours audio (or 4 hours video) playback with included rechargeable lithium ion battery • 2½"W x 4⅛"H x 13/16"D • 5.7 oz. • warranty: 1 year parts; 90 days labor.

Room-filling stereo sound from a compact system

Bose Wave® music system in graphite gray

Bose • Wave® music system

Tabletop radio and CD player

Enjoy warm, spacious, natural sound from your favorite CDs and radio stations with the compact Bose Wave® music system. Its innovative acoustic design delivers a rich sonic spectrum from a surprisingly small cabinet. A credit card-style remote conveniently operates the Wave® music system, leaving the casing uncluttered by buttons.

Details: slot-loading CD player • plays CDs, CD-Rs, CD-RWs & MP3 CDs • digital tuner with 6 AM/6 FM presets • Bose® link for connection to a compatible Bose system in another room • clock with wake-up and sleep timers • video-shielded • auxiliary input • 14½"W x 4³⁄₁₆"H x 10"D • warranty: 1 year.

Graphite gray **#018WRCD2GG** *Platinum white* **#018WRCD2PW** **$499**

• Wave® radio II *Tabletop radio with outstanding Bose sound*

The Wave® radio II lacks a CD player, but offers the same room-filling sound as the Wave® music system.

Graphite gray **#018BWR2GG** *Platinum white* **#018BWR2PW** **$349**

Platinum white Wave® Multi-CD Changer, shown with the Wave® music system (sold separately)

Bose • Wave® Multi-CD Changer *Expand your Wave® music system into a 4-disc player*

This changer connects to the Wave® music system (left), adding three more CD slots. And one remote operates both, allowing you to select songs from all four discs, or mix it up with random play.

Details: 3-slot CD changer for use with Wave® music system only • remote control • 14½"W x 2⅝"H x 10½"D • warranty: 1 year. *Will not work with the Bose Wave® radio, the Wave® radio/CD, or the Wave® radio II.*

Graphite gray **#018GGCDCHG**
Platinum white **#018PWCDCHG** **$249**

The key to the Bose Wave® music system's extraordinary sound is its dual waveguide speaker technology. Two 26" chambers, folded into intricate patterns, enable this compact system to produce amazingly rich, full-bodied stereo sound.

Save $50 on a Bose Wave® music system plus Multi-CD Changer

Buy the Bose Wave© music system together with a Wave© Multi-CD Changer and save $50 on your order. Offer ends 12/31/2006.

Enjoy relief from airline noise as you travel

Bose • QuietComfort® 3 *Acoustic Noise Cancelling® headphones*

The Bose QuietComfort® 3 headphones not only reduce distracting outside noise, but also make your music sound great. Patented Acoustic Noise Cancelling® minimizes unwanted sounds like engine roar, while delivering warm, full audio from portable music players or in-flight films. Bose's patented TriPort® acoustic headphone design allows deep, rich bass from a lightweight earcup design, which means they're especially comfortable for long hours of listening.

Bose designed these headphones with travel in mind. The included rechargeable battery provides up to 20 hours of operation, and comes with its own compact wall charger. A single-sided cord helps prevent tangling, and has an adapter for airline systems. You can even disconnect the cord from the headphones to enjoy noise reduction without audio playback. The carrycase holds the headphones and all the included accessories, so its easy to keep everything with you.

Details: includes adapter for airline systems • power and controls built into headset • 20 hours playing time with included rechargeable battery • zippered semi-hard carry case • weight: 5.6 oz. • warranty: 1 year.

#018QC3 **$349**

• QuietComfort® 2 *Around-the-ear Acoustic Noise Cancelling® headphones*

The Bose QuietComfort® 2 headphones are ideal for those who prefer an around-the-ear design. They deliver the same level of noise reduction and sound quality as the QuietComfort® 3 headphones, and are just as comfortable to wear for extended periods of listening. These headphones do not include a rechargeable battery, but give you up to 35 hours of operation with the included "AAA" battery. Weight: 6.9 oz.

#018QC2S **$299**

QC™3 headphones (left) and QC™2 headphones (right), shown for size comparison

Bose Acoustic Noise Cancelling® headphone technology uses a tiny microphone to sense low-frequency outside noise. Internal circuitry then creates an out-of-phase signal to reduce it, leaving the sound you want inside the earcup.

Free MP3 player with QuietComfort® headphone purchase

Get a free Lexar 256MB MP3 player pre-loaded with 38 songs when you buy either the QuietComfort® 2 or QuietComfort® 3 headphones Offer ends 1/31/07.

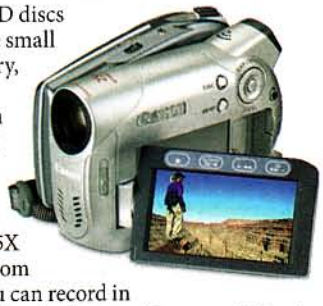
Capture life's greatest moments with a compact, easy-to-use camcorder

Baby's first steps. Graduation day. Even your friends' most ridiculous party tricks. When it comes to storing up good times, a camcorder is a must-have. Today's camcorders come in a variety of formats, sizes, and capabilities. Which one is right for you? Let Crutchfield help you find the model that best suits your needs. Please call our Sales Advisors for expert advice, or visit crutchfield.com to see our full selection and read helpful reviews and how-to-choose articles.

Canon • DC100 *25X zoom DVD camcorder*



Save your memories straight to mini DVD discs with Canon's compact DC100. While the small design makes this camcorder easy to carry, the 2.7" LCD screen lets you see exactly what you're filming. High-quality Canon optics and processing deliver crisp, vivid video of your special occasions.

Enjoy easy shooting with the DC100's special features. You'll get a clear view of distant objects, thanks to 25X optical zoom. Image stabilization and zoom control help to steady your shot. And you can record in full-resolution 16:9 mode — great for folks who have a widescreen TV and want their home movies to fit perfectly.

Details: digital photo mode • DIGIC DV image processor • uses mini DVD-R and mini DVD-RW • image stabilizer • night mode • full-resolution 16:9 widescreen mode • A/V output (including S-video) • 2 9/16"W x 3 9/16"H x 4 15/16"D • warranty: 1 year. See crutchfield.com for more info.

#280DC100 $499.99 *before instant savings*

Sony • DCR-SR40 *30GB hard drive camcorder*

DCR-SR80

Shoot great-looking home movies with the DCR-SR40. This cam records hours of video and snaps digital photos straight to a built-in 30GB hard drive. With plenty of helpful extras, you'll capture your next adventure with bold, vivid colors — from a ski trip in the mountains to a family reunion in your backyard.

Details: 20X optical zoom • recording capacity: 7 to 20 hours (depending on quality setting) • digital photo mode • Super SteadyShot® • NightShot Plus® • Handycam® Station included • 2¾"W x 2⅞"H x 4⅝"D • warranty: 1 year parts, 90 days labor. See crutchfield.com for more info.

Digital Cameras

Which camera is right for you?

There are so many choices. But don't be overwhelmed. Digital cameras are fun and easy to use. Plus, they can capture high-quality pics that are comparable to film photos when printed. All of our models offer fully automatic shooting modes that are great for beginners. Some cameras also provide extensive zoom to zero in on distant subjects, and manual controls for more pro-style shooting. For expert advice, please call our Sales Advisors, or visit crutchfield.com to see our full selection of digital cameras and read helpful how-to-choose articles.

Travis,
Crutchfield Graphic Designer
"In my spare time, I'm a volunteer firefighter. At the scene of an emergency, a digital camera is a great way to capture images for skill enhancement and personnel training. I also use digicams for making recruitment and fundraising brochures."

Sony • DSC-W30 *Clean styling, 6-megapixel recording*

Take your best shot — Sony's DSC-W30 will help you get the perfect photo every time. This slender camera's sophisticated 3X optical zoom lens renders sparklingly clear images, and its 6-megapixel CCD captures them in vivid detail. A durable, compact body lets the 'W30 go with you everywhere.

DSC-W50

Details: 3X optical zoom • 2" LCD screen • movie mode with sound • high ISO (film speed equivalent) sensitivity mode for better low-light performance • 32MB internal memory • 16:9 widescreen photo mode • PictBridge • high-speed USB port • uses optional Memory Stick Duo™ cards • 3 13/16"W x 2½"H x 1"D • warranty: 1 year. More info at crutchfield.com.

#158DSCW30 $199.99

• DSC-W50 *See your pics more clearly with a 2½" LCD*

The DSC-W50's larger 2½" LCD screen makes composing and reviewing your photos even easier.

#158DSCW50 $229.99

Sony • DSC-W70 *Ultra-compact 7.2-megapixel cam*

Sony's DSC-W70 lets you capture life's most important moments with remarkable clarity. It combines a 7.2-megapixel image sensor with a precision lens for vivid, detailed pictures. The bright 2½" viewscreen makes it easy to frame your shots and review images. A strong, pocket-sized metal body makes this camera a worthy traveling companion.

Along with simple, user-friendly operation the DSC-W70 offers an array of useful features. There's 58MB of built-in memory, so even if you forget to bring a Memory Stick Duo card along, you can still catch the action. A 3X optical zoom brings you closer to distant subjects. And the cam's high-sensitivity settings are ideal for shooting in low-light environments, such as concerts or plays, without using the built-in flash.

Details: movie mode with sound • 16:9 widescreen photo mode • PictBridge • high-speed USB port • 58MB internal memory • uses optional Memory Stick Duo cards • 3¾"W x 2⅜"H x 1"D • warranty: 1 year. More info at crutchfield.com.

#158DSCW70 $279.99

Sony • DSC-W100 *Sleek design, 8.1-megapixel photos*

The DSC-W100 houses impressive photographic firepower in its slim, silver body. Its sophisticated 3X zoom lens and 8.1-megapixel recording capability combine for beautifully clear pictures. Pop it in a pocket or purse, and you're ready to capture life's special moments in gorgeous detail, wherever and whenever they happen.

Sony kept this slender cam attractively simple, but they squeezed in some important conveniences. For example, you get a large 2½" LCD for composing your photos and sharing them with friends. Preset scene modes help you take great shots without being an expert. And when you're feeling inspired, the cam's manual exposure controls let you get even more creative.

Details: 3X optical zoom • movie mode with sound • high sensitivity mode for better low-light performance • 16:9 widescreen photo mode • PictBridge • high-speed USB port • 64MB internal memory • uses optional Memory Stick Duo cards • 3 15/16"W x 2½"H x 1 3/16"D • warranty: 1 year. More info at crutchfield.com.
